Soviet Military And The Future:

Soviet Military Power, 1987 *Soviet Military Strategy in the 1990s* David M. Glantz, 1991 **Gorbachev And The Soviet Future** Lawrence W. Lerner, 2019-04-08 This book presents articles that provide a detailed account on the role of Gorbachev in Soviet's future political reform educational reform economy military policy toward the United States and Western Europe and relations with the developing world **Soviet Military Power, 1987**, 1987 Soviet Military Power 1987 reviews new development in the USSR's armed forces over the past year and places these in the context of current doctrine and strategy These developments again underscore that the USSR is building new generations of offensive strategic and theater nuclear forces as well as conventional land sea and air forces and strategic defense forces going far beyond legitimate requirements for defense **The Military Strategy of the Soviet Union** David M. Glantz, 2019-10-01 Armed revolution and civil war gave birth to the Soviet Union world War II propelled it to global pre eminence and the Cold War contributed to the Soviet Union's demise Given Marxism Leninism's ideological preoccupation with war and threats of war it is understandable that the spectre of war should play a vital role in the life and fate of the Soviet state This study of Soviet military strategy is based upon the twin pillars of Soviet political military actions and Soviet writings on the subject of military strategy Thanks to the policy of glasnost it incorporates Soviet materials hitherto unavailable in the West It aims to be not simply a retrospective account of what was but to form part of the context for what will be in the future Gorbachev and the Future of the Soviet Military Institution Harry Gelman, 1991 Soviet Military Doctrine Harriet Fast Scott, William F. Scott, 2019-06-21 The purpose of this book is to document from basic Soviet sources the development of Soviet military doctrine and its impact upon the Soviet Armed Forces Soviet military doctrine is defined as the military policy of the Communist Party In one way or another this policy affects the lives of all of us as a possible threat to free institutions and political processes as well as to our economic life and well being Generally we approach Soviet military policy in terms of military balances and weapons comparisons in the number of men under arms the speed of aircraft of the Soviet bloc versus that of NATO aircraft the number of ballistic missiles and their throw weights Studying such balances is of critical importance in defining to some degree existing forces But it is only through a deep and thorough study of the military policy of the Communist Party which translates directly into military doctrine that we can obtain the background that might aid in negotiating with the Soviets on arms control matters or in making decisions that will enable those nations outside of the Soviet bloc to deter future Kremlin military moves **The Future of Soviet Military Power** Lawrence L. Whetten, 1976 *The Future of U.S.-Soviet Relations* United States. Congress. Senate. Committee on Foreign Relations, 1990 *The Future Of The Soviet Navy* Bruce W. Watson, Peter M Dunn, 2020-01-28 The efforts of the Soviet Union since the mid 1950s to develop naval power have produced one of the strongest navies in the world but this achievement has not been without serious costs The construction of increasingly complex submarines ships and aircraft has required greater investment of

resources and manpower This volume addresses whether the Soviet Union will continue naval expansion and what directions technological development will take in the future In particular the contributors consider trends in submarine aircraft carrier and surface combatant systems and examine what implications these developments have for U S defense planning over the next two decades
