Threat Analysis Center**

Soviet Radioelectronic Combat:

Soviet Radioelectronic Combat David Chizum, 2019-09-18 Radioelectronic combat REC embraces the entire range of possibilities for manipulating the electromagnetic spectrum to military advantage Options include electronic warfare physical destruction of electronic targets signals intelligence and radio electronic concealment and deception Developed in the early 1970s by the Soviets it is still poorly understood in the West This study analyzes REC as a method of warfare with which Western military thinkers must reckon seriously at all levels of combat planning It also provides a solid base of information on REC s origins functional structure and basic military goals Equally important it defines REC s greatest threat as conceptual rather than technological Manipulating the electromagnetic spectrum depends more on thoughtful planning and centralized control than on sophisticated equipment further the Soviets appear to be ahead of the West in integrating the concept as an institutional part of military activity Based primarily on Soviet sources this book not only traces the evolution of REC but also serves as a model for understanding the development of other Soviet combat concepts Soviet Army Operations United States. Army Intelligence and Threat Analysis Center, 1978 **The Soviet Navy** Bruce W. Watson, Susan M Watson, Calland Carnes, Brian Larson, 2020-01-09 Since Admiral Sergei G Gorshkov was appointed to the office of commander in chief of the Soviet Navy in 1956 the Soviet Union has made a massive investment in naval construction training and operations As a result the Soviet Navy has grown from a coastal defense force to one of the world s two strongest navies This book offers a detailed assessment of every major aspect of the Soviet Navy from fleet structure and training facilities to command and control procedures and warfare and intelligence collection capabilities Understanding Soviet Military Developments United States. Department of the Army. Office of the Assistant Chief of Staff for Intelligence, 1977 **Soviet Military Power** , 1983 **Air Defense Artillery** , 1985 *The Effects of Soviet Army Communications Jamming on the AIM Division Signal Battalion* John R. Williamson, ARMY COMMAND AND GENERAL STAFF COLL FORT LEAVENWORTH KS., 1980 This study attempts to show that the U S Army AIM division signal battalion can not provide reliable communications support when confronted with the current Soviet radioelectronic combat threat The investigation is centered on the fact that the division maneuver commanders are not familiar with the difficulties and complexities of the communications electronics mission in an electronic warfare environment and currently rely too heavily on electronic communications to maintain command and control on the battlefield The AIM division signal battalion mission and its current radio systems are explained in detail The doctrine equipment and known capabilities of the Soviet communications jamming organizations are examined Recent computer based technical analyses of the effectiveness of the Soviet radioelectronic combat threat on division level communications is presented The author concludes that current AIM division signal battalions would not be able to maintain reliable command and control communications systems on the modern electronic battlefield when confronted with the full effects of the Soviet radioelectronic combat threat author
