

SOVIET X-PLANES

Experimental and Prototype Aircraft, 1931 to 1989

Yefim Gordon with Bill Sweetman

Soviet X Planes

Michael H. Gorn, Giuseppe De Chiara

Soviet X Planes:

Soviet X-planes E. Gordon, Yefim Gordon, Bill Sweetman, 1992 Detailed review of Soviet experimental aircraft from the early 1900s to the latest Russian prototypes of today Describes about 150 aircraft types each with relevant data including many three view drawings

X-Planes Manfred Griehl, 2012-10-24 Renowned German aviation specialist Manfred Griehl has collected a unique and valuable selection of photographs of Luftwaffe projects that never made it into battle They remained on the drawing board or at prototype stage either because they were deemed unsuitable or the developers simply ran out of time and the projects never went into production Most photographs come from the development sites and testing grounds of the major manufacturers of Nazi Germany companies such as Dornier Junkers Focke Wulf and Heinkel all received funding from the government to develop bigger and faster aircraft A huge amount of private testing went on with major organizations such as Daimler Benz BMW and Siemens investing huge amounts in new engine systems and other advances such as radar This book also details the innumerable alterations that were made to existing service aircraft to equip them for new roles There are examples of Fw190s developed for the delivery of chemical and toxic weapons the high altitude Junkers EF 61 the early prototype WNF 342 helicopter as well as numerous examples of developmental jet fighters that could very well have been realized had it not been for the effectiveness of the Allied bombing campaign in restricting the supply of necessary materials

[X-Planes from the X-1 to the X-60](#) Michael H. Gorn, Giuseppe De Chiara, 2022-01-01 Foreword by Dr Roger D Launius Former NASA Chief Historian For the past 75 years the U S government has invested significant time and money into advanced aerospace research as evidenced by its many experimental X plane aircraft and rockets NASA s X Planes asks a simple question What have we gained from it all To answer this question the authors provide a comprehensive overview of the X plane s long history from the 1946 X 1 to the modern X 60 The chapters describe not just the technological evolution of these models but also the wider story of politics federal budgets and inter agency rivalries surrounding them The book is organized into two sections with the first covering the operational X planes that symbolized the Cold War struggle between the U S and the U S S R and the second section surveying post Cold War aircraft and spacecraft Featuring dozens of original illustrations of X plane cross sections in flight profiles close ups and more this book will educate general readers and specialists alike

Soviet V/STOL Aircraft Michael J. Hirschberg, 1997 This important case study reports on the V STOL development activities in the Soviet Union As in the West the Soviets also began using flying test rigs in the late 1950s By combining the lift engines with modifications to existing engines the Soviets were able to deploy the Yak 38 Forger only two years after the Harrier The Forger was in service for 15 years before the political situation forced its retirement from service Packed with illustrations references glossaries and bibliographies this case study is a necessary resource for the studies of V STOL aircraft and systems designers

[The Race for Hitler's X-Planes](#) John Christopher, 2012-10-01 During World War 2 Hitler s engineers had pioneered an incredible array of futuristic secret weapons from the Me 262 the first operational jet

fighter to the deadly V2 inter continental ballistic missile With the Third Reich shattered and lying in ruins in the summer of 1945 the Allies launched a frantic race to grab what they saw as the justifiable spoils of war The Americans and Russians in particular were anxious to secure not only the aircraft and the research and production facilities but also the key German scientists and engineers This Nazi technology would define the balance of power in the phoney peace of the Cold War era launching an arms race that shaped our modern world for decades to come But what of Britain s role in this supermarket sweep The Race for Hitler s X Planes tells the untold story of the British mission to Germany Into the Black Rowland White,2016 On April 12 1981 NASA s Space Shuttle Columbia blasted off from Cape Canaveral a state of the art flying machine and the world s first real spaceship a winged rocket plane the size of an airliner and capable of flying to space and back before preparing to fly again Less than an hour after departure tiles designed to protect the ship from the blowtorch burn of re entry were missing from the heat shield White recaptures the historic moments leading up to the launch of the Columbia her daring maiden flight and her life and death struggle to return using interviews NASA oral histories and recently declassified material Megafast Planes John Farndon,2016-01-01 Are you ready to take off with the world s fastest supersonic aircraft Strap yourself in for a trip in the MiG 25 Foxbat interceptor and clock up to 2 100 mph 3 380 km h Soar in the NAA X 15 rocket plane which set a record of 4 520 mph 7 274 km h in 1967 Hop into the world s fastest jet the NASA Hyper X 43 scramjet but hang on it has the potential to go 7 000 mph 11 265 km h Detailed illustrations put you in the cockpits of these mighty streaking aircraft while bite sized facts explain how they work their pilots daring risks and the thrill of supersonic flight *Soviet and Russian Lunar Exploration* Brian Harvey,2007-08-17 When in July 1969 the Americans decisively beat the Soviet Union in the race to put an astronaut on the moon this event had profound historical scientific and political implications This book tells the story of the Soviet and Russian lunar programme from its origins to the reconsideration of a lunar programme in the present day federal Russian space programme Following Sputnik the first Soviet lunar flights achieved the key goals of hitting circling and photographing the moon in 1959 The Soviet Union planned to achieve the biggest prize of them all the first person to land on the moon and built all the key spaceships required to do so such as a lunar orbiter and lander Brian Harvey describes the techniques devised by the USSR for lunar landing from the LK lunar module to the LOK lunar orbiter and tested versions in Earth orbit He asks whether these systems would have worked and examining how well they were tested concludes that they would have the Soviet Union lost the moon race for political not technical reasons Designs for moon bases were even drawn up In the end the Soviet Union ran an impressive series of robotic missions from 1968 to 1976 to circle the moon map the far side conduct scientific observations from orbit recover samples and rove over the surface The scientific haul from these missions is surveyed what was actually learned about the moon its rocks and the lunar environment that will be useful for the present plans by the United States to return to the moon and for other countries such as India and China to conduct their own lunar exploration The book opens in Surgut Siberia in

August 1976 with a largely forgotten event the return to Earth after a three day journey from the moon under a single parachute of the tiny Luna 24 cabin with a core sample drilled deep into the Sea of Crises a remarkable scientific and engineering achievement It ends with an examination of projected missions from plans to explore the far side and set up lunar observatories to the Luna Glob explorer of the 1990s There is also discussion of lunar tourism using a modernized version of the Zond spacecraft which flew around the moon from 1968 to 1970

Soviet Secret Projects Tony Buttler, Yefim Gordon, 2004 Among the best selling aviation titles of recent years have been Midland's Lutwaffe and British Secret Projects series Soviet secret projects now come under the spotlight This first volume covers bomber concepts from the various design bureaus from the 1940s onwards Many unusual and sophisticated aircraft are featured in these pages allowing comparisons between what the Soviets were working on and what was being produced in the West during that period

Technology and the Air Force Jacob Neufeld, 2009-06 Proceedings of a symposium co sponsored by the Air Force Historical Foundation and the Air Force History and Museums Program The symposium covered relevant Air Force technologies ranging from the turbo jet revolution of the 1930s to the stealth revolution of the 1990s Illustrations

Ignite the flame of optimism with Get Inspired by is motivational masterpiece, Find Positivity in **Soviet X Planes** . In a downloadable PDF format (*), this ebook is a beacon of encouragement. Download now and let the words propel you towards a brighter, more motivated tomorrow.
