Jensen, Tim Richardson, 2004-08-02 Making European Space explores how future visions of Europe's physical space are being decisively shaped by transnational politics and power struggles which are being played out in new multi level arenas of governance across the European Union At stake are big ideas about mobility and friction about relations between core and peripheral regions and about the future Europe's cities and countryside The book builds a critical narrative of the emergence of a new discourse of Europe as monotopia revealing a very real project to shape European space in line with visions of high speed frictionless mobility the transgression of borders and the creation of city networks The narrative explores in depth how the particular ideas of mobility and space which underpin this discourse are being constructed in policy making and reflects on the legitimacy of these policy processes In particular it shows how spatial ideas are becoming embedded in the everyday practices of the social and political organisation of space in ways that make a frictionless Europe seem natural and part of a common European territorial identity *Models in Urban Geography Part -ii*, **A Century of British Geography** Ron Johnston, Michael Williams, 2022-09-11 These essays trace the evolution of British geography as an academic discipline during
