Spatial Disparities And Social Behaviour:

Spatial Disparities and Social Behaviour Jürgen Friedrichs, 1982 Inclusion and Democracy Iris Marion Young, 2002

Democratic equality entails a principle that everyone whose basic interests are affected by policies should be included in the process of making them. Yet individuals and groups often claim that decision making processes are dominated by only some of the interests and perspectives in the society. What are the ideals of inclusion through which such criticisms should be made and which might guide more inclusive political practice? This book considers that question from the point of view of norms of democratic communication processes of representation and association and how wide the scope of political jurisdictions should be. Democratic theorists have not sufficiently attended to the ways processes of debate and decision making often marginalize individuals and groups because the norms of political discussion are biased against some forms of expression. Inclusion and Democracy broadens our understanding of democratic communication by reflecting on the positive political functions of narrative rhetorically situated appeals and public protest. It reconstructs concepts of civil society and public sphere as enacting such plural forms of communication among debating citizens in large scale societies. The book considers issues of the scope of the polity at two levels: global and local. The scope of a polity should extend as wide as the scope of social and economic interactions that raise issues of justice. Today this implies the need for global democratic institutions. At a more local level, processes of residential segregation and the design of municipal jurisdictions often result in the ability for actions in one locale to affect those in other locales without those making the decisions having to include some of those affected in the decision making process. Metropolitan governments which preserve significant local autonomy may therefore be necessary to promote political equality.

The Uncertain Future of the Urban Core Christopher M. Law, 2017-10-12

Originally published in 1988, inner city problems in advanced countries are being exacerbated by the decentralisation of economic activities and higher income groups. Only offices and tourism offer some prospects of growth but these vary in their potential from one city to another. This book assesses changes in the structure of urban areas concentrating on the process of decentralisation and the consequences for the inner city and city centre. It examines and evaluates policies and makes suggestions for the future management of the city.

Economic Evolution and Demographic Change Günter Haag, Ulrich Mueller, Klaus G. Troitzsch, 2012-12-06 The articles collected in this volume have two features in common they want to integrate economics demography and geography and they want to overcome the stationary approach in modelling in favour of a dynamic one The book is subdivided into three parts where Part I is focussing on economic evolution Part II on geographical development and Part III is related to demographic change The present volume aims at providing a new look at this triangle in view of the classical background of discussions by introducing new research ideas focussing in nonlinear dynamics and stochastic modelling Thus the main purpose of this book is to make a contribution to the interdisciplinary work needed to integrate the efforts between these three research fields and to serve as a research source in demonstrating the current state of art in dynamic modelling The book is addressed to social scientists in general and those in particular with a background in economics geographics and demographics It should also be of interest to mathematicians physicists and systems analysts interested in model building and applications of nonlinear dynamics
