The Routledge Handbook of the Byzantine City Nikolas Bakirtzis, Luca Zavagno, 2024-01-31 The Byzantine world contained many important cities throughout its empire Although it was not urban in the sense of the word today its cities played a far more fundamental role than those of its European neighbors This book through a collection of twenty four chapters discusses aspects of and different approaches to Byzantine urbanism from the early to late Byzantine periods It provides both a chronological and thematic perspective to the study of Byzantine cities bringing together literary documentary and archival sources with archaeological results material culture art and architecture resulting in a rich synthesis of the variety of regional and sub regional transformations of Byzantine urban landscapes Organized into four sections this book covers Theory and Historiography Geography and Economy Architecture and the Built Environment and Daily Life and Material Culture It includes more specialized accounts that address the centripetal role of Constantinople and its broader influence across the empire Such new perspectives help to challenge the historiographical balance between margins and metropolis and also to include geographical areas often regarded as peripheral like the coastal urban centers of the Byzantine Mediterranean as well as cities on islands such as Crete Cyprus and Sicily which have more recently yielded well excavated and stratigraphically sound urban sites The Routledge Handbook of the Byzantine City provides both an overview and detailed study of the Byzantine city to specialist scholars students and enthusiasts alike and therefore will appeal to all those interested in Byzantine urbanism and society as well as those studying medieval society in general

Intersectionality and the City Lucie Bernroider, Anthony Miro Born, Christy Kulz, Sung Un Gang, 2025-06-06 This

book combines intersectional perspectives and urban research to demonstrate the importance of intersectionality as a concept that can complement refigurational understandings of social change as the outcome of spatial conflicts. Showing how intersectionality enables us to grasp the intersecting categories of inequality in these spatial tensions, it remains attentive to the role of social difference and power in these processes as well as to modes of normativity and resistance. With case studies gathered from a range of national contexts, it provides rich empirical insights into the relationship between urban spatialities, power dynamics, and embodied social inequalities, addressing the manner in which different conflicts are made manifest intersectionally in and through situated urban spaces. The chapters consider issues such as the gendering and racialization of urban spaces, urban marginality and environmental pressures, intersectional power dynamics in research, heteronormative and cisgender-centric structures in the city, aging in the city, young people, control and insecurity, police violence, migrant emplacement and activism, racialized gentrification and commoning, and pandemic safety and protest, to explore the uneven outcomes of spatial planning and urban development. As such, it draws attention to the interplay of various forces in the production of exclusion and injustice and will therefore appeal to scholars of sociology, geography, and urban studies with interests in inequality, social change, and resistance to exclusion.
