The Architecture of the Playing Field Richard L. Cleary, 2025 The author argues that sports and architecture share many concerns as both center the interplay of settings and bodies in motion He sets out to study their conceptual and physical intersection and to show what the aesthetics and spatial relationships of playing fields can tell us about sports and the cultures that create them Cleary's scholarly background and personal experience as a fencer and soccer referee led him to the questions that drive this project In this relatively brief meditation on physical space in sports he argues convincingly that related inquiries in one domain can inspire new readings in others while respecting the unique qualities of each The Sports Center fan the architecture enthusiast and the balletomane have more to discuss than they may think The subjects of Cleary's intriguing new readings range widely from the translucent courts of the 2019 Women's World Squash Championships to the introduction of the three point line in basketball to the similarities between Dutch architects and Dutch soccer's emphasis on flexibility and multivalence
