Self-Studies of Science Teacher Education

Practices Shawn M. Bullock, Tom Russell, 2012-03-21 Part of a vital Springer series on self study practices in teaching and teacher education this collection offers a range of contributions to the topic that embody the reflections of science teacher educators who have applied self study methodology to their own professional development The material recognizes the paradox that lies between classroom science and the education of science teachers the disciplines of science are often perceived as a quest for right answers an unintentional by product of the classroom focus on right answers in student assessment in science In contrast the profession of teaching has few right answers and frequently involves the management of conflicting tensions A dilemma thus arises in science teacher education of how to shift perspectives among student teachers from reductionist to more inclusive attitudes that are open to the mercurial realities of teaching The self studies presented here are unique fresh and stimulating They include the input of a beginning science teacher as well as science teacher educators from a range of backgrounds and varying levels of experience In addition the volume presents a truly international perspective on the issues with authors hailing from five countries Providing analysis at the leading edge of education theory this collection will make fascinating reading for those teaching science as well as those teaching science teachers

Self-Studies of Teacher Education Practice Online Mary F. Rice, Ramona

Maile Cutri, Juanjo Mena, 2024-05-20 This edited volume explores the emotional work of being an online teacher educator The chapter authors discuss the intense work involved in planning teaching and navigating intuitional contexts in order to build a relationship between online teaching and the Self Study of Teacher Educator Practice S STEP methodology Additionally the authors of the chapters in the book used the S STEP methodology to move their practices and their teacher educator identities beyond emergency crisis uses of online teaching common during campus building closures Each chapter offers different ways that S STEP methodology can be used to sustain oneself as an online teacher educator Although there are specific strategies and practices this is not a how to book for online teacher educating it is an exploration of online teachers

and groups of online teachers supporting themselves and each other by studying and learning from their practices

Studying Teacher Education Marilyn Cochran-Smith, Kenneth M. Zeichner, 2009-09-10 This volume reports the work of the American Educational Research Association's Panel on Research and Teacher Education. It offers a synthesis of research on teacher education policies and practices in the US and an agenda for future research.

Self-Study of Language and Literacy Teacher Education Practices Judy Sharkey, Megan Madigan Peercy, 2018-08-16 Self-Study in Teacher Education Practices (STEP) contribute to teacher education in culturally and linguistically diverse communities and contexts. The chapters reflect the scholarly inquiry of teacher educators dedicated to investigating and improving their practice.

Research in Education, 1972 **Teaching, Learning, and Enacting of Self-Study Methodology** Jason K. Ritter, Mieke Lunenberg, Kathleen Pithouse-Morgan, Anastasia P. Samaras, Eline Vanassche, 2018-03-15 This book offers a collection of original peer-reviewed studies by scholars working to develop a knowledge base of teaching and facilitating self-study research methodology. Further, it details and interconnects perspectives and experiences of new self-study researchers and their facilitators in self-study communities in different countries and across different continents. Offering a broad range of perspectives and contexts, it opens up possibilities for encouraging the collaborative and continuous growth of teaching and facilitating self-study research within and beyond the field of teacher education. The breadth of the scholarship presented expands scholarly discussions concerning designing, representing, and theorising self-study research in response to pressing educational and social questions. By documenting and understanding what teaching and learning self-study looks like in different contexts and what factors might influence its enactment, the book contributes to building a kaleidoscopic knowledge base of self-study research. Overall, this book demonstrates the impact on participants' professional learning and validates the authenticity and generative professional applications of self-study methodology for and beyond teacher education, providing implications and recommendations for practitioners on a global level.

Lesson Study: Research and Practice in Mathematics Education Lynn C. Hart, Alice S. Alston, Aki Murata, 2011-01-11 Lesson study is a professional development process that teachers engage in to systematically examine their practice with the goal of becoming more effective. Originating in Japan, lesson study has gained significant momentum in the mathematics education community in recent years. As a process for professional development, lesson study became highly visible when it was proposed as a means of supporting the common practice of promoting better teaching by disseminating documents like standards, benchmarks, and nationally validated curricula. While the body of knowledge about lesson study is growing, it remains somewhat elusive and composed of discrete research endeavors. As a new research area, there is no coherent knowledge base yet. This book will contribute to the field by bringing the work of researchers and practitioners together to create a resource for existing work. This book describes several aspects of Lesson Study; amongst others, it gives an historical overview of the concept, it addresses issues related to learning and teaching mathematics, it looks at the role of the teacher in the process. The last two sections of the book look at how

lesson Study can be used with preservice mathematics teachers and at university mathematics methods teaching
