Studying War Anthropological Perspectives:

Studying War Stephen P. Reyna, R. E. Downs, 2023 First Published in 1993 Routledge is an imprint of Taylor Francis an informa company **The Ethics of Anthropology and Amerindian Research** Richard J. Chacon, Rubén G.

Mendoza, 2011-12-15 The decision to publish scholarly findings bearing on the question of Amerindian environmental degradation warfare and or violence is one that weighs heavily on anthropologists This burden stems from the fact that documentation of this may render descendant communities vulnerable to a host of predatory agendas and hostile modern forces Consequently some anthropologists and community advocates alike argue that such culturally and socially sensitive and thereby politically volatile information regarding Amerindian induced environmental degradation and warfare should not be reported This admonition presents a conundrum for anthropologists and other social scientists employed in the academy or who work at the behest of tribal entities This work documents the various ethical dilemmas that confront anthropologists and researchers in general when investigating Amerindian communities The contributions to this volume explore the ramifications of reporting and specifically of non reporting instances of environmental degradation and warfare among Amerindians Collectively the contributions in this volume which extend across the disciplines of archaeology anthropology ethnohistory ethnic studies philosophy and medicine argue that the non reporting of environmental mismanagement and violence in Amerindian communities generally harms not only the field of anthropology but the Amerindian populations themselves **An Anthropology of War** Alisse Waterston, 2009 The contributors reflect on their ethnographic work at the frontlines and recount not only what they have seen and heard in war zones but also what is being read studied analyzed and remembered in such diverse locations as Colombia and Guatemala Israel and Palestine Iraq Afghanistan and Haiti They reflect on the important issue of accountability and offer explanations to discern causes patterns and practices of war

Indoctrinability, Ideology, and Warfare Irenäus Eibl-Eibesfeldt, Frank K. Salter, 1998 Violent ethno nationalist conflicts continue to mar the history of the twentieth century yet no satisfactory answer as to why humans are susceptible to indoctrination by ideologies leading to inter group hostility has thus far been found This volume brings together an international team of leading scientists to address this complex issue from disciplines as diverse as anthropology psychology psychobiology sociology philosophy ethology sociology and political science Treating the processes of indoctrination as a biological phenomenon with physiological and psychological aspects these essays explore the answers to this pressing question in humanity s evolutionary past Armed groups: Studies in National Security, Counterterrorism, and Counterinsurgency Jeffrey H. Norwitz, 2008 Discussion of armed groups which are considered to include classic insurgents terrorists guerrillas militias police agencies criminal organizations war lords privatized military organizations mercenaries pirates drug cartels apocalyptic religious extremists orchestrated rioters and mobs and tribal factions To study armed groups use of history political science anthropology sociology theology and economics are traditional areas of research The book also

delves into matters of ethics technology intelligence education the law diplomacy military science and even mythology The book is divided into five sections History and armed groups Present context and environment Religion and inspiration thinking differently about armed groups the shape of things to come **Warfare in Cultural Context** Axel E.

Nielsen, William H. Walker, 2014-02-05 Warfare is a constant in human history Contributors to this book contend that agency and culture inherited values and dispositions such as religion and other cultural practices beliefs and institutions are always woven into the conduct of war Using archaeological and ethnohistorical data from various parts of the world the contributors explore the multiple avenues for the cultural study of warfare that these ideas make possible Contributions focus on cultural aspects of warfare in Mesoamerica South America North America and Southeast Asia **The Blackwell Companion to the**

Study of Religion Robert A. Segal, 2009-02-04 This prestigious Companion offers the most comprehensive survey to date of the study of religion Featuring a team of international contributors and edited by one of the most widely respected scholars in the field The Blackwell Companion to the Study of Religion provides an interdisciplinary and authoritative guide to the subject Examines the main approaches to the study of religion anthropology the comparative method economics literature philosophy psychology sociology and theology Also covers a diverse range of topical issues such as the body fundamentalism magic and new religious movements Consists of 24 essays written by an outstanding team of international scholars Reviews within each chapter an outline of a particular subfield and traces its development up to the present day Debates how the discipline may look in the future Represents all the major issues methods and positions in the field Peace and War Mary LeCron

Foster, 2020-03-02 Is war necessary In Peace and War prominent anthropologists and other social scientists explore the cultural and social factors leading to war They analyze the covert causes of war from a cross cultural perspective ideologies that dispose people to war underlying patterns of social relationships that help institutionalize war and the cultural systems of military establishments Overt causes of war environmental factors like the control of scarce resources advantageous territories and technologies or promoting the welfare of people like oneself are also considered The authors examine anthropologists role in policy formation how their theories on the nature of culture and society help those who deal with global problems on a day to day basis They argue that both covert and overt mechanisms are pushing the world closer to a devastating war and offer strategies to weaken the effects of these mechanisms This anthropological and historical analysis of the causes of war is a valuable resource for those studying war and those trying to understand the place of social science in framing pacific options *What Causes War?* Greg Cashman, 2013-07-29 Now in a thoroughly revised and updated edition

this classic text presents a comprehensive survey of the many alternative theories that attempt to explain the causes of interstate war For each theory Greg Cashman examines the arguments and counterarguments considers the empirical evidence and counterevidence generated by social science research looks at historical applications of the theory and discusses the theory's implications for restraining international violence Among the questions he explores are Are humans

aggressive by nature Do individual differences among leaders matter How might poor decision making procedures lead to war Why do leaders engage in seemingly risky and irrational policies that end in war Why do states with internal conflicts seem to become entangled in wars with their neighbors What roles do nationalism and ethnicity play in international conflict What kinds of countries are most likely to become involved in war Why have certain pairs of countries been particularly war prone over the centuries Can strong states deter war Can we find any patterns in the way that war breaks out How do balances of power or changes in balances of power make war more likely Do social scientists currently have an answer to the question of what causes war Cashman examines theories of war at the individual substate nation state dyadic and international systems level of analysis Written in a clear and accessible style this interdisciplinary text will be essential reading for all students of international relations

Regional Approaches to Mortuary Analysis Lane Anderson Beck, 2013-11-11 In this volume archaeologists offer a new direction for burial research by expanding the models for mortuary analysis from a site specific to a regional level Contributors explore how regional mortuary approaches allow the introduction of new questions about peer polity interactions and regional alliances extending traditional settlement system and exchange analyses This volume features case studies examining mortuary sites as components of the archaeological landscape
