Motivating Persistence in the Face of Failure

Catherine Chi Chase, 2011 Failure often presents a valuable learning opportunity however students may need motivational scaffolds to protect them from the negative psychological ramifications of failure This work explored the effectiveness of a motivation based intervention called an ego protective buffer EPB that was designed to enhance persistence after failure An ego protective buffer EPB maintains a stable sense of competence by lessening the impact of failure on one's psyche The specific instantiation of an EPB tested here was designed to elicit a combination of internal and external attributions for failure External attributions protect one's sense of competence by averting the blame for failure away from the self while internal attributions encourage students to take some responsibility for remedying the failure situation Based on this theory we embedded an EPB into the rule structure of a computer based genetics game and unleashed it on 143 seventh graders In the EPB condition students were told that winning in the game was a probabilistic outcome dependent on a combination of chance and skill on the part of the students In the Control condition students were told that winning in the game was a deterministic outcome dependent on students skill only Students played the game during two class periods Measures include pre and posttests motivational survey measures and in game behaviors The EPB did have an effect on learning but only amongst high failing students High failing EPB students learned just as much as their low failing counterparts This was not so in the Control condition where high failing students learned far less than their low failing counterparts So the high failing EPB group was behaving as if they were buffered from the effects of failure We also found evidence of a possible mechanism behind this learning effect In the high failing EPB condition students were equally likely to persist after success and failure while in the Control condition students were far more likely to persist after success exhibiting risk averse behaviors This difference was more exaggerated in a within subjects comparison contrasting the same individuals in situations of high and low failure Finally persistence after failure was associated with learning across the full sample of subjects Regardless of

condition or failure rate students who persisted more after failure also learned more This study together with the author's related body of work provides compelling evidence that an EPB is a viable intervention for encouraging persistence in the face of failure

The Fear of Failure Martin K. Ettington, In our modern society there are lots of pressures to succeed Whatever that means Most of us absorb the idea that we need to succeed in life and thus they have the corollary fear of failure One of my favorite movies is *The Razor's Edge* with Tyrone Powell It is the story of a young man in the 1920s who has the opportunity to make it big in conventional jobs but he isn't interested Instead he follows an alternative path which leads him to India where he seeks enlightenment His friends who followed the conventional career path experienced terrible lives when most of them were wiped out in the great depression Even one who made it big financially was mainly interested in earthly status which doesn't make a difference in the long run My point is that we need to be thoughtful about how we envision the future of our lives so we live life with meaning and don't have unrealistic expectations Thinking about life this way is the first way to avoid having a fear of failure In this book we review the reasons people have fears of failure persons who changed failure into success and how to modify our lives to change our fears of failure into a path for success and happiness

Daniels,2016-02-28 F'd Up The UPside of Failure provides insight into why some people view failures as opportunities a necessary step toward success while others simply quit or have an aversion to the effort required to push through In my first book Undefeatable the message is clear failure is inevitable Don't fear them The upside to failure describes the lessons that emerge out of the failure and the new skills we acquire from them Failures teach us critical thinking creative problem solving

skills and effort work required and attitude motivation The upside of unintentional failure is the aftermath the time of reflection and birthing new ideas It s what we can learn about ourselves and specific skills that we can gain from that failure or unsuccessful experience The upside is the benefit of opening up a new pathway of unexplored strength and resolve which would have not otherwise been realized had we not experienced the failure in the first place *Fear of Failure* Robert Charles Birney,Harvey Burdick,Richard Collier Teevan,1969 **In Search of Failure** Ben Byram-Wigfield,2004 Let s face it We are all going to fail Sometimes There are few things more certain in life Quite frankly there are times when your best is just not good enough For every winner there must inevitably be a host of people who were pipped to the post The law of averages alone would suggest that one of them is going to be you at least once in your life This is the sad but certain truth that we must all learn But is it such a sad truth after all It is strange that we all seem to have such difficulty learning this simply fact Every day this integral part of life is looked upon with shame and sadness with feelings of embarrassment and inadequacy with several bottles of scotch and with crying on stairs Instead what we ought to be doing is embracing our failure Only then can we explore our fullest potential to fail and so achieve the greatest part of our humanity This book teaches you how to come to terms with yourself as the miserable failure that you undoubtedly are and how to enjoy yourself because of rather than in spite of your short comings and misdeeds **The Lancet** ,1911 The World's Work ,1910 New York Produce Review and American Creamery ,1917
