, 1987 **A Normal Totalitarian Society** Vladimir Shlapentokh, 2017-07-05 Shlapentokh undertakes a dispassionate analysis of the ordinary functioning of the Soviet system from Stalin's death through the Soviet collapse and Russia's first post communist decade Without overlooking its repressive character he treats the USSR as a normal system that employed both socialist and nationalist ideologies for the purposes of technological and military modernization preservation of empire and expansion of its geopolitical power Foregoing the projection of Western norms and assumptions he seeks to achieve a clearer understanding of a civilization that has perplexed its critics and its champions alike **Commercial Lending to the Soviet Bloc** United States. Competitive Strategies for the 21st Century Thomas G. Mahnken, 2012-08-08 The U S today faces the most complex and challenging security environment in recent memory even as it deals with growing constraints on its ability to respond to threats Its most consequential challenge is the rise of China which increasingly has the capability to deny the U S access to areas of vital national interest and to undermine alliances that have underpinned regional stability for over half a century Thus the time is right for the U S to adopt a long term strategy for dealing with China one that includes but is not limited to military means and that fully includes U S allies in the region This book uses the theory and practice of peacetime great power strategic competition to derive recommendations for just such a strategy After examining the theory of peacetime strategic competition it assesses the U S China military balance in depth considers the role of America s allies in the region and explores strategies that the U S could adopt to improve its strategic position relative to China over the long term

The New Great Power Coalition Richard N. Rosecrance, 2001 The Great Power coalition of the early 19th century succeeded in keeping the peace among the major states of England France Prussia Russia and Austria For the last century and a half however no truly encompassing coalition has emerged and in its absence the 20th century was plagued by world wars and peripheral conflicts Only now at the outset of the 21st century is a new Great Power coalition possible This book examines the prospect of a Great Power coalition that would be sustained by the development of overlapping international clubs The new set of Great Powers the United States Japan the European Union China and Russia can be increasingly bound together through a combination of status and economic incentives international norms and regimes and the emulation of national and regional best practices The construction of such a coalition presents special problems and opportunities for the United States In the years ahead America will need to adjust its policies to bring China and Russia into membership of such a group or see them progressively adopt recalcitrant and antagonistic attitudes toward world affairs
