It is no easy task to find a teaching technique that can truly change the course of a child with special needs. Thirty years ago when Janet Tubbs began working with children who had low self-esteem and behavioral problems, she developed a successful program using art, music, and movement. Believing that unconventional children required unconventional therapies, she then took her program one step further: she applied it to children with autism, ADD, ADHD, and Asperger's Syndrome. Her innovative methods and strategies not only worked, but they actually defied the experts. In this new book, Janet Tubbs has put together a powerful teaching tool to help parents, therapists, and teachers work with their children. *Creative Therapy for Children with Autism, ADD, and Asperger's* is divided into two parts. Part One provides an overview of Autism Spectrum Disorders and introduces and explains Janet's novel approach to teaching. Her goal is to balance the child's body, mind, and spirit through proven techniques. Part Two provides a wide variety of exercises, activities, and games that are both fun and effective. Each is designed to reduce hyperactivity, increase and prolong focus, decrease anger, develop fine motor skills, or improve social and verbal skills. All are part of a program created to help these children relate to their environment without fear, anxiety, or discomfort. A child may appear stubborn and difficult, but that doesn't mean that the child isn't intelligent, curious, or creative. With the right treatment, such a child can be reached, taught, and set on the road to improvement. The lessons provided in this book may be just what you and your child have been waiting for. *The Cumulative Book Index*, 1980. A world list of books in the English language.

Written for mainstream and special needs teachers, it covers speech, playfulness, and pretence, verbal and non-verbal communication, and self-awareness and self-esteem. Taking a developmental approach, the book is divided into two parts: Simple child-focused activities (Units 1-2) for children in a special school setting who are at an early stage of engagement, and Group-oriented activities (Units 3-9) for use in inclusive settings where mixed groups of children with and without autism can work together to develop personal and social skills. Each unit focuses on one skill area at a time and follows a similar format which includes a brief theoretical background, a clear set of aims, an assessment profile, and a set of drama activities to develop the focus skill. Complete with case studies, photocopyable resources, and step-by-step guidance on how to deliver a drama programme, this practical resource will be invaluable for all those who are looking for new ways of engaging children on the autism spectrum. *Contemporary Perspectives on Research in Creativity in Early Childhood Education* Olivia Saracho, 2012-05-01.
