metaphorical capacities In so doing they invite the people of God to be conformed to Christ and to participate in the praise of Christ and in the praise of creation which by the Spirit's power raises its peculiar voice to the Father in heaven for the sake of the world that God so loves      **Cultural Industries and the Production of Culture** Dominic Power, Allen J.

*Copyright* Lior Zemer,2017-03-02 As information flows become increasingly ubiquitous in our post digital environment the challenges to traditional concepts of intellectual property and the practices deriving from them are immense The romantic understanding of the lone author as an endless source of new creations has to face these challenges In order to do so this work presents a collectivist model of intellectual property rights The core argument is that since copyright works enjoy profit from significant public contribution they should not be privately owned but considered to be a joint enterprise made real by both the public and author It is argued that every copyright work depends on and is reflective of the author s exposure to externalities such as language culture and the various social events and processes that occur in the public domain therefore copyright works should not be regarded as exclusive private property The study takes its organizing principle from John Locke defining and proving the fatal flaw inherent in debates on copyright on the one hand the copyright community is eager to arm authors with a robust property right over their creation while on the other this community totally ignores the fact that the exposure of the individual to externalities is what makes him or her capable of creating material that is copyrightable Just as Locke was against the absolute authority of kings the expressed view of the study is against the exclusive right an author can claim

**Aesthetics and the Art of Musical Composition in the German Enlightenment** Johann Georg Sulzer,1995 Can an abstract theory of *Empfindsamkeit* aesthetics have any value to a musician wishing to study composition in the classical style The eighteenth century German theorist and pedagogue Heinrich Koch showed how this question could be answered with a resounding yes Starting with the systematic aesthetic theory of the Swiss encyclopedist Johann Sulzer Koch was creatively able to adapt Sulzer s conservative ideas on ethical mimesis and rhetoric to concrete problems of music analysis and composition In this collaborative study Thomas Christensen and Nancy Baker have translated and analysed selected writings of Sulzer and Koch respectively bringing to life a little known confluence of philosophical and musical thought from the German Enlightenment Koch s appropriation of Sulzer s ideas to the service of music represents an important development in the evolution of Western musical thought
