The Crystal Text:

The Crystal Text Clark Coolidge, 1995 The occasion for this poetic meditation is a colorless quartz crystal sitting upon the writer's desk The crystal is as still and irreducible as a death's head in St Jerome's study or Cezanne's studio But what would the crystal reveal if it could speak How might the issue of its presence be brought into language The poet of The Crystal Text by means of a rare stamina of attention and listening vulnerability seeks to become the medium of the crystal's transmissions Like many other Coolidge works The Crystal Text sounds the depths of a visionary excavation of present being Faced daily Coolidge's quest is to know anything to write everything And what is revealed here in the glancing light of his language's mineral beauty is the writing mind itself Its precision its weights and measures its peerless word choice and shutter speed all combine in passages of inspired momentum to bring the reader cognitions of a unique and exemplary kind

Geopoetry Dale Enggass,2025-06-17 At its core geopoetics proposes that a connection between language and geology has become a significant development in post World War II poetics In *Geopoetry* Dale Enggass argues that certain literary works enact geologic processes such as erosion and deposition and thereby suggest that language itself is a geologic and not a solely human based process Elements of language extend past human control and open onto an inhuman dimension which raises the question of how literary works approach the representation of nonhuman realms Enggass examines the work of Clark Coolidge Robert Smithson Ed Dorn Maggie O Sullivan Jeremy Prynne Jen Bervin Christian B k and Steve McCaffery and he finds that while many of these authors are not traditionally connected to ecocritical writing their innovations are central to ecocritical concerns In treating language as a geological material these authors interrogate the boundary between human and nonhuman realms and offer a model for a complex literary engagement with the Anthropocene
