Deliberating Environmental Policy in India Sunayana Ganguly,2015-11-06 As one of the world s largest and most bio diverse countries India s approach to environmental policy will be very significant in tackling global environmental challenges This book explores the transformations that have taken place in the making of environmental policy in India since the economic liberalization of the 1990s It investigates if there has been a slow shift from top down planning to increasingly bottom up and participatory policy processes examining the successes and failures of recent environmental policies Linking deliberation to collective action this book contends that it is crucial to involve local actors in framing the policies that decide on their rights and control over bio resources in order to achieve the goal of sustainable human development The first examples of large scale participatory processes in Indian environmental policy were the 1999 National Biodiversity Strategy Action Plan and the 2006 Scheduled Tribes and Other Traditional Forest Dwellers Act This book explores these landmark policies exploring the strategies of advocacy and deliberation that led to both the successes and failures of recent initiatives It concludes that in order to deliberate with the state civil society actors must engage in forms of strategic advocacy with the power to push agendas that challenge mainstream development discourses The lessons learnt from the Indian experience will not only have immediate significance for the future of policy making in India but they will also be of interest for other countries faced with the challenges of integrating livelihood and sustainability concerns into the governance process *The Search for Deliberative Democracy in China* E. Leib,B. He,2006-10-02 This book investigates whether the theory of deliberative democracy developed in the West to focus democratic theory on the legitimation that deliberation can afford has any application to Chinese processes of democratization It discovers pockets of theory useful to guide Chinese practices and also Chinese practice that can educate the West *Interpretive Policy Analysis* Frank Fischer,Sybille Münch,Douglas Torgerson,2025-09-10 This comprehensive book explores the development of interpretive policy analysis IPA over the past three decades as an approach to bring social meaning into the study of policy processes It examines present circumstances and future directions providing a detailed overview of theory and practice in the field **Understanding New Media** Kim H. Deliberation and Development Patrick Heller,Vijayendra Rao,2015-07-13 Deliberation is the process by which a group of people each with equal voice can via a process of discussion and debate reach an agreement Deliberation and Development attempts to do two things First it rethinks the role of deliberation in development and shows that it has potential well beyond a narrow focus on participatory projects Deliberation if properly instituted has the potential to have a transformative effect on many if not all aspects of development and especially in addressing problems of collective action

coordination and entrenched inequality This has broad implications both at the global and local level Second the book demonstrates that taking deliberation seriously calls for a different approach to both research and policy design and requires a much greater emphasis on the processes by which decisions are made rather than an exclusive focus on the outcomes Deliberation and Development contributes to a broader literature to understand the role of communicative processes in development

Governing Biodiversity through Democratic Deliberation Mikko Rask, Richard Worthington, 2015-05-15 This book discusses political controversies involved in global biodiversity policy and the practical opportunities that are opened up in solving them through increased citizen participation and democratic deliberation It examines the emerging practice of deliberative global governance and its political consequences The collection focuses on the intersection of global biodiversity policy and the promise of deliberative democracy In doing so it examines how new discursive logics emerge in global citizen deliberation that might destabilize the impasses encountered in biodiversity negotiations how a global citizens voice emerges in deliberative processes despite the dominance of national institutions in the lives of those citizens the most effective and innovative ways to amplify the results of large scale deliberations to policy makers and broader audiences and how future citizen deliberations can be designed to make them fair feasible and consequential processes in general and for biodiversity issues in particular This highly original contribution to the field provides theoretical discussions empirical analyses and local experiences of biodiversity policy making it an invaluable resource for students and scholars of environmental politics governance and sociology particularly those interested in deliberative democracy citizen participation and biodiversity

Mapping cultural policies of the Small Island Development States UNESCO, 2024-05-23 Public Deliberation James Bohman, 2000 An understanding of the ways in which public deliberation can be extended to meet the needs of modern societies even in the face of increasing pluralism inequality and social complexity

Deliberating in the Real World John Parkinson, 2006-06-15 Deliberative democracy has become the central reference point for democracy theorists over the last decade or so influencing normative frameworks and the ways we conceptualize the workings of democratic societies It has also been linked with a burst of experimentation with new procedures that involve citizens directly in deliberations about public policy But there is a contradiction at the heart of deliberative democracy it seems that it cannot deliver legitimate agreements Deliberative decisions are said to be legitimate when all those subject to them take part in free and equal debate but in complex societies that can never happen Few people can deliberate together at any one time certainly not in any strict sense so how can the results of a deliberative event be legitimate for non participants And why would people with passionately held views sit down and deliberate when there seems little advantage in them doing so This book explores these problems in theory and practice searching for a solution that does not merely dismiss a strict understanding of deliberative democratic criteria It reconsiders the theory of legitimacy and deliberative democracy but goes further by examining cases of deliberation on health policy in the United Kingdom to see what problems emerge in practice

and how real political actors deal with them The result is a complete rethink of the institutional limits and possibilities of deliberative democracy one which abandons the search for perfection in any one institution and looks instead to the concept of a multifaceted deliberative system *Making Middle-Class Multiculturalism* Jennifer Elrick, 2022-01-10 Making Middle Class Multiculturalism re interprets the historiography of the emergence of Canada's universal immigration policy for skilled workers and family immigrants in the 1950s and 1960s **The United States and Canada** Paul J. Quirk, 2019-07-11 The United States and Canada share the longest border in the world maintain one of the closest alliances and are notably similar in many ways Yet the two countries also have important differences including sharply contrasting political institutions In *The United States and Canada* Paul J Quirk has gathered a distinguished cast of contributors to present an integrated comparative examination of the political systems of the United States and Canada with special attention to the effects of political institutions and their interaction with political values geographic and demographic factors and other influences The volume explores the differences between the American presidential or separation of powers system and the Canadian parliamentary system focusing on electoral and party systems executive leadership and the legislative process bureaucratic influence and federalism It proceeds to examine patterns of governance in a wide range of issue areas economic policy climate change policy healthcare policy civil rights integration and immigration and abortion and gay rights A sweeping comparative account this volume serves as an authoritative guide for anyone interested in why the two countries differ and where they might be headed *Good Society* Robert Bellah, Richard Madsen, Steve Tipton, William Sullivan, Ann Swidler, 2011-02-23 THE GOOD SOCIETY examines how many of our institutions from the family to the government itself fell from grace and offers concrete proposals for revitalizing them **Handbook of Education Policy Research** Lora Cohen-Vogel, Peter Youngs, Janelle Scott, 2025-07-17 The second edition of the Handbook of Education Policy Research the largest volume published in AERA's history addresses a variety of policy and contextual issues in early childhood K 12 and postsecondary education that have received extensive empirical attention during the past 15 years With the pandemic and social turmoil as a backdrop the editors build on the breadth and depth of the first edition while expanding the scope of the project to include subjects methods theories and analyses that have contributed powerfully to the study of education policy and politics in the 2010s and 2020s The field has become more comprehensive and inclusive and the authors represent a diversity of racial ethnic and gender identities and intellectual and disciplinary orientations Most chapters come from multiple authors reflecting the multi sourced development of research in education policy since the first volume was published This compilation consists of 70 chapters and nine commentaries that map past present and future directions of the field and richly attend to critical issues of interest to students researchers policy makers and practitioners **Public Leadership** Paul 't Hart, John Uhr, 2008-11-01 Leadership is routinely admired vilified ridiculed invoked trivialised explained and speculated about in the media and in everyday conversation Despite all this talk there is surprisingly little consensus

about how to answer basic questions about the nature place role and impact of leadership in contemporary society This book brings together academics from a broad array of social science disciplines who are interested in contemporary understandings of leadership in the public domain Their work on political administrative and civil society leadership represents a stock take of what we need to know and offers original examples of what we do know about public leadership Although this volume connects scholars living in and mostly working on public leadership in Australia and New Zealand their contributions have a much broader scope and relevance

Democratic Justice and the Social Contract Albert Weale, 2013-08-15 This book offers a theory of democratic justice According to the theory justice emerges from collective agreement among political associates who enjoy approximate equality of power Such situations can be seen as social contracts and we find an empirical model for social contracts in the examples of successful common property resource regimes In these regimes participants craft collective rules of access to the means of production on an equal basis and producers are entitled to the full fruits of their labour To interpret this theoretically an account of practical rationality in terms of individual and public deliberation is required In tracing the move from small scale to large scale societies three important transformations become apparent in political institutions in the economy and in the functions of the household All are relevant to the understanding of justice In great societies representative parties making policy and law in shifting coalitions in parliaments elected by proportional representation exemplify political equality and so instance one form of democratic justice In the economy corporate hierarchies modify the full fruits principles not always in the direction of justice Redistribution is justified as a means of smoothing income across the life cycle rather than by appeal to economies of scale or a simple principle of need The sense of democratic justice requires commitment to the maintenance of those institutions that protect common interests whilst acknowledging where there are differences of interest This sense of democratic justice needs to be upheld by effective governance

Public Policymaking in Hong Kong Eliza W. Y. Lee, 2013 Why and how has civic engagement emerged in the policy process of Hong Kong as an Asian semi democratic state This book attempts to answer this question through examining six cases that straddle diverse policy domains It identifies three explanatory factors namely the profile of a policy domain the structure of societal interest and the strength of the civil society sector as important in shaping the state's strategy in managing society hence its propensity to engage These factors affect the outcome through dynamic interaction between the state and societal actors The findings outlined in the book show that the development of civic engagement in Hong Kong consists of both society led and state led cases Society led development brought about a high degree of openness and inclusiveness whereas state led civic engagement practices tended to be tactics utilized by the state for appeasing or depoliticizing civil society Compared with other Asian regimes the use of transgressive contention as a way to compel the state to engage society is a feature that stands out in the liberal autocratic regime in Hong Kong

Gaining Access John Mark Hansen, 1991-11 Through a comprehensive analysis of American agricultural politics in the past half

century Gaining Access shows when how and why interest groups gain and lose influence in the policy deliberations of the United States Congress By consulting with policy advocates John Mark Hansen argues lawmakers offset their uncertainty about the policy stands that will bolster or impede their prospects for reelection The advocates provide legislators with electoral intelligence in Washington and supportive propaganda at home earning serious consideration of their policy views in return From among a multitude of such informants representatives must choose those they will most closely consult With evidence from congressional hearings personal interviews oral histories farm and trade journals and newspapers Hansen traces the evolution of farm lobby access in Congress He chronicles the rise and fall of the American Farm Bureau the surge and decline of party politics the incorporation of the commodity lobbies the exclusion of the consumer lobbies and the accommodation of urban interests in food stamps Brilliantly combining insights from rational choice theory with historical data Gaining Access is an essential guide for anyone interested in the dynamics of interest group influence

Knowledge and Public Policy Judith Eleanor Innes, This book addresses the question of what it takes to develop social indicators that genuinely influence important public decisions It looks historically at the processes of creating and using three important social indicators in the United States unemployment rates standard budgets and crime rates It then develops principles for choosing concepts designing measures and creating policy processes that institutionalize their use For this second edition Innes has provided a major new introductory essay which reflects on social indicators research and her own and others continuing work on the role of quantitative and other professionally generated information in policy making She contends that in practice knowledge is influential as it becomes part of the myths that shape public life as it empowers some policy actors over others as it establishes the agendas and frames the problem as it sets the terms for negotiation and public discourse For these arguments she draws on her research on human rights policy environmental impact assessment housing policy and local community development The case studies in the original book have stood the test of time and remain valid supports for the author s interpretations The author contends that to understand how knowledge and policy are linked we need to replace the scientific model of explicit knowledge use with a more inclusive interactive model of knowledge influence To do this we must rethink both the education and practice of policy professionals Innes sees indicators as lenses on the world that help define problems and point the way to solutions It is not surprising that the case studies show that the most influential indicators are developed jointly with policy and theories about the problem As she says there are no facts without theories and the only way a statistician can keep out of politics is to collect only irrelevant data This new edition will be of immense interest to those interested in the sociology of ideas policy studies and the emerging field of knowledge transfer Judith Innes is a professor in the city and regional planning department of the University of California Berkeley
