Knossos, Mycenae, Troy Natale Barca, 2023-03-31 This work puts a particular emphasis on the mixing and osmosis of the first Mediterranean civilizations with particular reference to the Minoan Cycladic Mycenaean and Trojan and on the causes of their decline which are to be identified in a jumble of natural and human causes and in a long lasting slow but irreversible crisis It takes into account that the Mediterranean Dimension of the Bronze Age is a garden in which many legends flourished clearly distinguishing between myth and history and always bearing in mind that legends are not to be taken literally nonetheless they often have a grain of truth It does not aim to provide an exhaustive report but to compose a broad and evolutionary picture in which the facts and their connections which are deducible from archaeological evidence or from the accounts of ancient historians find their place in their consequentiality Its originality lies not in the choice of the subject but in the way of treating it The author introduces and explains in order to be read and perhaps to get excited Another characterizing element of Knossos Mycenae Troy is the wide use of the historical present that is made there to represent events and construct the text to reduce the reader's distance from the narrated events and facilitates their approach to them This book aims to provide the reader with an overall picture of the cultures that laid the foundations of Western civilization which is not generic but rather detailed and updated and which has scientific solidity

Beyond Boundaries Susan E. Alcock, Mariana Egri, James F. D. Frakes, 2016-05-01 The Roman Empire had a rich and multifaceted visual culture which was often variegated due to the sprawling geography of its provinces In this remarkable

work of scholarship a group of international scholars has come together to find alternative ways to discuss the nature and development of the art and archaeology of the Roman provinces The result is a collection of nineteen compelling essays accompanied by carefully curated visual documentation seven detailed maps and an extensive bibliography organized around the four major themes of provincial contexts tradition and innovation networks and movements and local accents in an imperial context Easy assumptions about provincial dependence on metropolitan models give way to more complicated stories Similarities and divergences in local and regional responses to Rome appear but not always in predictable places and in far from predictable patterns The authors dismiss entrenched barriers between art and archaeology center and provinces even good art and bad art extending their observations well beyond the empire's boundaries and examining phenomena sites and monuments not often found in books about Roman art history or archaeology The book thus functions to encourage continued critical engagement with how scholars study the material past of the Roman Empire and indeed of imperial systems in general
