The Cosmic Adventure Science Religion And The Quest For Purpose:

Science and Religion in Search of Cosmic Purpose John F. Haught, 2000-03-03 Many scientists today think of the universe as essentially purposeless Likewise modern and postmodern philosophers have often been suspicious of any religious claims that the natural world embodies and eternal meaning or teleology Not all scientific thinkers subscribe to this cosmic pessimism however and some would even argue that contemporary knowledge is consistent with a religious sense of cosmic purpose This stimulating book offers candid reflections on the question of cosmic purpose written both by prominent scientists and by scholars representing the world's religious traditions Examining the issue from a wide variety of perspectives this is the only current book to deal with cosmic purpose from an interreligious and interdisciplinary perspective Here scientists such as physicist Andrei Linde and biologist Francisco Ayala come face to face with Islamic scholar Seyyed Hossein Nasr Hindu philosopher Anindita Niyogi Balslev and others They examine such perplexing issues as the possible existence of multiple universes and the implications of seemingly purposive features in life The contributions address the question of whether a religiously based notion of a purposeful cosmos is consistent with the latest scientific understanding of nature and whether theology can affirm the presence of divine action without contradicting science These essays will challenge readers to ponder their own place in the cosmos as they seek to interpret the visions of the world's great spiritual traditions in the light of natural science [The Cosmic Adventure](#) John F. Haught, 1984 **Science, Religion and Deep**

Time Lowell Gustafson, Barry Rodrigue, David Blanks, 2022-07-05 This book examines the meaning of religion within the scientific evidence based history of our known past since the big bang While our current major religions are only centuries or millennia old our volume discusses the origins and development of human religious practice and belief over our species existence of 300 000 years The volume also connects the scientific approach to natural and social history with ancient truths of our religious ancestors using new lines of inquiry new technologies new modes of expression and new concepts It brings together insights of natural scientists social scientists philosophers writers and theologians to discuss narratives of the universe The essays discuss that to apprehend religion scientifically or to interpret and explain science theologically the subject must be examined through a variety of disciplinary lenses simultaneously and raise several theoretical philosophical and moral problems With a singular investigation into the meaning of religion in the context of the 13.8 billion year history of our universe this book will be indispensable for scholars and students of religious studies big history sociology and social anthropology philosophy and science and technology studies **A John Haught Reader** John F. Haught, 2018-11-06

Classical Christian theologies came to expression at a time when the universe seemed relatively fixed and unchanging The otherworldly spiritual instincts of many religions reflected a static vertical and hierarchical understanding of the natural world Today however especially because of developments in the sciences it appears that the universe is still coming into being The writings offered in this book reflect their author's belief that if the universe is unfinished new thoughts about God

and all the traditional theological topics are essential to make sense of it all John Haught argues that the universe is best understood according to the metaphor of drama rather than design This means that the most important question in science and theology today is not whether the intricate complexity of life points to a deity or even how God acts in nature but whether the cosmic drama as a whole carries a meaning Unfortunately the devotional life of most religious people on our planet still presupposes an essentially immobile universe Christian instruction for example continues to nurture an otherworldly piety that estranges nature unnecessarily from God The readings in this book however suggest that the ancient Abrahamic hope for the coming of God from out of the future may now become the foundation of a scientifically up to date theology of nature that affirms divine transcendence without robbing nature of its significance *The Creationist Debate, Second Edition* Arthur McCalla, 2013-08-29 Whereas scholarly study of Creationism usually places it in the context of religion and the history or philosophy of science *The Creationist Debate* here revised and completely updated in its second edition has been written in the conviction that creationism is ultimately about the status of the Bible in the modern world Creationism as a modern ideology exists in order to defend the authority of the Bible as a repository of transhistorical truth from the challenges of any and all historical sciences It belongs to and is inseparable from Protestant Fundamentalists desire to resubject the modern world to the authority of the inerrant Bible Intelligent Design creationism to the extent that it distinguishes itself from reactionary biblicism is a program advocating a supernaturalist providentialist understanding of the world Accordingly *The Creationist Debate* situates Creationism and Intelligent Design in relation to the rise from the early modern period onwards of historical thinking in various scientific and scholarly disciplines including theories of the earth chronology civil history geology biblical criticism paleontology evolutionary biology and anthropology in their complex relationship to the status of the Bible as an historical authority It argues that the debate over Creationism is at bottom a debate over how to interpret the biblical text rather than over how to interpret the world *The Cosmic Pilgrim* Margaret MacIntyre, 2010-03-01 *The Cosmic Pilgrim* is an introduction to the world of eco theology Based on the vision of Pierre Teilhard de Chardin it describes the nature of reality in our Cosmos that is continually unfolding within our expanding consciousness and the journey the pilgrimage of the universe through space and time toward its consummate destiny within the fullness of God This radical evolutionary perspective is part of the new story of science and religion Mathematical cosmologist and visionary Brian Swimme is the chosen guide to this new cosmology and his insights form the continuing thread of the book His mentor Thomas Berry is well represented here as are other great thinkers from the realms of science and theology Jürgen Moltmann Alfred North Whitehead C S Lewis John Polkinghorne and John Haught *The Cosmic Pilgrim* presents a personal easy to grasp map of the current interface between ecology religion and science It aims to develop a spirituality that is grounded in the present struggle of moving beyond our Earth damaging industrial mindset toward a higher vision of vibrant planetary community At the same time it seeks out the wider horizon of ultimate meaning and ponders the

mystery of the far future and our cosmic destiny Although the book reflects the author's Christian background it is nonsectarian in approach and could be enjoyed by any seeker interested in developing a green spirituality

God and the Natural World Ted Peters, Marie Turner, 2020-05-01 This collection of essays is a fitting tribute to Denis Edwards who was one of Australia's leading theologians In exploring the most challenging questions of our time these essays canvas some of the great themes of Christian theology that were the focus of Edwards research Denis Edwards was a theologian of dialogue dialogue with our rich theological tradition dialogue with science dialogue with contemporary theologians The contributors to this volume enter into a dialogue with substantial parts of the theological output of Denis Edwards In the process they capture something of his humanity his love of creation and his concern for our common home The book demonstrates the commitment Denis Edwards had to a theology that is truly ecumenical and always learning from the insights of others The editors and authors have done a great service in helping many others to deepen reflection on Denis Edwards contribution to our understanding of God and the natural world

Ecotheology and the Practice of Hope Anne Marie Dalton, Henry C. Simmons, 2010-09-29 Is there any hope for a more sustainable world Can we reimagine a way of living in which the nonhuman world matters Anne Marie Dalton and Henry C Simmons claim that the ecotheology that arose during the mid twentieth century gives us reason for hope While ecotheologians acknowledge that Christianity played a significant role in creating societies in which the nonhuman world counted for very little these thinkers have refocused religion to include the natural world To borrow philosopher Charles Taylor's concept they have created a new social imaginary reimagining a better world and a different sense of what is and what should be A new mindset is emerging inspired by ecotheological texts and evident in the many diverse movements and activities that operate as if the hope imparted by ecotheology has already been realized While making this powerful argument Dalton and Simmons also provide an essential overview of key ecotheological thinkers and texts

Religion and the Natural Sciences James E. Huchingson, 2005-02-07 The first half of Religion and the Natural Sciences is an introduction to the discussion of science and religion Here the reader learns why there is any debate at all and what resources exist for responding to it The second half deals with specific issues that arise in the individual sciences from astronomy and physics to biology and ecology Any project hoping to connect science and religion must supply the categories of connection which are found primarily although not exclusively in philosophy The simplicity of the arrangement and the nature of the selections are intended to make Religion and the Natural Sciences available to as wide an audience as possible including students from the sciences and technology the professions the humanities and liberal studies and theology

A More Perfect Union Linda Sargent Wood, 2012-10-18 This book uncovers a holistic sensibility in post World War II American culture that challenged Cold War logic and fed some of the century's most powerful social movements This impulse is illustrated by focusing on Rachel Carson Buckminster Fuller Martin Luther King Jr Abraham Maslow Pierre Teilhard de Chardin and the Esalen Institute

Where Was God: Evil, Theodicy, and Modern Science

Gary A. Stilwell, 2009 **Creation, God, and Humanity** Catherine Wright, 2017 Examines the history and development of ecological theological anthropology and how it engages human suffering so that people of faith can better understand the suffering inherent to earth's creative processes and that inflicted by human sin Victorian Popularizers of Science Bernard Lightman, 2009-10-15 The ideas of Charles Darwin and his fellow Victorian scientists have had an abiding effect on the modern world But at the time *The Origin of Species* was published in 1859 the British public looked not to practicing scientists but to a growing group of professional writers and journalists to interpret the larger meaning of scientific theories in terms they could understand and in ways they could appreciate *Victorian Popularizers of Science* focuses on this important group of men and women who wrote about science for a general audience in the second half of the nineteenth century Bernard Lightman examines more than thirty of the most prolific influential and interesting popularizers of the day investigating the dramatic lecturing techniques vivid illustrations and accessible literary styles they used to communicate with their audience By focusing on a forgotten coterie of science writers their publishers and their public Lightman offers new insights into the role of women in scientific inquiry the market for scientific knowledge tensions between religion and science and the complexities of scientific authority in nineteenth century Britain *The Narrative Complexity of Ordinary Life* William L. Randall, 2015-08-20 Our everyday lives are enmeshed in storytelling the stories we tell about our memories the people we know and the world we inhabit those we tell about our families and communities and the narratives we encounter in books movies and television Narrative structures how we view ourselves and everything around us In *The Narrative Complexity of Ordinary Life* William L Randall shows how concepts central to the study of narrative psychology such as narrative development and the interrelation between narrative and identity cognition and development are integral to everyday life He makes the case that all people function as narrative psychologists by continually storying their lives in memory and imagination as well as speculating on the stories that others may be living a process that Randall refers to as storyotyping Relying heavily on narrative Randall draws from experiences in his own life to illustrate various concepts in narrative psychology His inquiry leads him to the topics of gossip rumor and the narrative complexity of nostalgia In doing so he makes the case that all people function as narrative psychologists by continually storying or cementing their lives in memory and imagination a process Randall refers to as storyotyping **Evolution and Eden** Jerry D. Korsmeyer, 1998 In this study Jerry Korsmeyer examines how an evolutionary perspective impacts on a traditional understanding of original sin He reviews the history of the doctrine as well as the church's interaction with the theory of evolution Using clues provided by evolution and process thought the author suggests an interpretation of original sin that incorporates both modern Catholic scholarship and scientific evidence Ultimately he moves toward a theology of evolution BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved *Process Theology: A Guide for the Perplexed* Bruce G. Epperly, 2011-03-24 This is an introductory guide to Process Theology for undergraduates As part of Continuum's Guide for

the Perplexed series this text provides an accessible introduction to process theology aimed at nurturing the theological imagination of undergraduates pastors and interested laypersons It describes the major themes of process theology and relates them to the everyday lives and spiritual commitments of people today In addition to addressing traditional theological issues Epperly addresses cutting edge issues in theology and ethics such as pluralism and postmodernism matters of life and death science technology and genetics and emerging forms of Christianity This text is designed for seminary and university classes as well as congregational study It will help readers to overcome the obstacles created by the technical language often employed by process theologians Continuum s Guides for the Perplexed are clear concise and accessible introductions to thinkers writers and subjects that students and readers can find especially challenging or indeed downright bewildering Concentrating specifically on what it is that makes the subject difficult to grasp these books explain and explore key themes and ideas guiding the reader towards a thorough understanding of demanding material

The Voice of the Earth

Theodore Roszak, 2001-01-01 What is the bond between the human psyche and the living planet that nurtured us and all of life into existence What is the link between our own mental health and the health of the greater biosphere In this bold ambitious philosophical essay Publishers Weekly historian and cultural critic Roszak explores the relationships between psychology ecology and new scientific insights into systems in nature Drawing on our understanding of the evolutionary self organizing universe Roszak illuminates our rootedness in the greater web of life and explores the relationship between our own sanity and the larger than human world The Voice of the Earth seeks to bridge the centuries old split between the psychological and the ecological with a paradigm which sees the needs of the planet and the needs of the person as a continuum The Earth s cry for rescue from the punishing weight of the industrial system we have created is our own cry for a scale and quality of life that will free us to become whole and healthy This second edition contains a new afterword by the author

Evolutionary History in Theological Perspective Mario Anthony Russo, 2024-06-10 Evolutionary History in Theological Perspective Exploring the Scientific Story of the Cosmos develops a new theological interpretation of evolutionary history Exploring both secular and theological interpretations of evolutionary history this new interpretation hinges on the similarities between individual redemption and the eschatological story of cosmic redemption as mediated by the Holy Spirit throughout evolutionary history This new lens is then applied to relevant questions raised by the evolutionary process especially suffering and helps overcome the current shortcomings of contemporary interpretations of evolutionary history

Tradition and Incarnation William L. Portier, 1994 This two part text for introductory theology courses at the undergraduate level explores foundational concepts dealing with revelation and various christological themes

Introducing Ecofeminist Theologies Heather Eaton, 2005-02-07 This book is about ecofeminism and its encounter with theology predominantly that of Christian theology in Euro western contexts It introduces and explores ecofeminism and the encounter The goal is to understand the significance and implications of ecofeminism and its contribution and challenge to

theology A further goal is to assist ecofeminist theology or theologies to be more effective in preventing ecological ruin assisting women s struggles for freedom and supporting the flourishing of all life on earth Ecofeminism represents ways of discerning associations of many kinds between the feminist and ecological movements and between the oppression and domination of both women and the earth Ecofeminism is an insight referring to critical analyses political actions historical research intuitions and ideals The ecological crisis is creating a pivotal moral and religious challenge and new contexts for theology There is a renewed spiritual sensitivity towards the natural world We are in a time of a spiritual awakening wherein the earth and all life are experienced as sacred where it is possible to experience awe and wonder and encounter the ineffable Ecofeminist theologies are at the intersection of these ideas and experiences They are the efforts of particular people who see and experience possibilities for greater life more justice and freedom They do not accept that injustice and ecological ruin are inevitable Ecofeminist efforts are directed towards reducing further ecological and social devastation and awakening consciousness to the immense beauty and elegance of all life on this fragile yet awesome blue green planet
