Steiner's spiritual science the greatest spiritual event of our time is the renewal and reawakening of our human suprasensory relationship to the higher spiritual worlds. The force that leads to this development, called by various names in different cultural and religious traditions, is called the Christ impulse by Anthroposophy in accordance with Christian terminology. Because of new naturally endowed suprasensory faculties, human beings are increasingly able to experience and perceive through an act of grace the great spiritual force of the Christ impulse. This experience is said to be a naturally given initiation, and today we increasingly hear of such suprasensory experiences. Today, however, a healthy approach to these natural phenomena requires us to comprehend suprasensory experiences with full awareness and clear thinking. This book builds an all-important bridge between the naturally given suprasensory experience and its conscious cognition. As a result, empirical suprasensory research can investigate the different aspects of Christ's etheric becoming and appearance in a way that both methodically and experientially fulfils the justified cognitive and scientific requirements of our age. This new paperback edition adds a new introductory chapter.

The Cycle of Human Existence Lafontant Clervil, 2009-05. Inspired by the role Mother Nature plays in governing and placing everything in the universe in order, author Lafontant Clervil wrote *The Cycle of Human Existence*. The book is his attempt to answer questions he has grappled with for years: about man, man's nature, and man's destiny. Clervil's extraordinary narrative embraces and explains his persuasive theory that each human being's life is an endless cycle. In the process of birth, growth, aging, and death, man goes through three natural reigns: animal, mineral, and vegetable. During his time on earth, man is in the animal reign. After life, decomposition changes the body into the mineral reign. The chemicals and minerals from the body are used by plants, which produce foods rich in the same chemicals and minerals to rebuild, repair the body, and sustain life. In this respect, man's existence is an endless cycle. Clervil believes that man is built by, with, and in the power of God, the donor of life. Man is a sum of energy and has the power to do marvels. The essence of man is eternity because man cannot be destroyed according to the natural law of conservation of energy, just transformed.

The Miracle Kit Behind the Power of Prayer Nehemiah Davis, 2023-10-17. This book, *The Miracle Kit behind the Power of Prayer*, offers an analysis of a mystic, ancient form of prayer that manipulates subtle cosmic energies through ancient techniques of yoga, science, and religious rituals that are not understood in today's materialistic, modern science. The mystic prayer technique that this book is advocating uses the spoken word along with positive imagination and visualization to invoke and harness this power of cosmic energies or pranas. This book goes into detail on the ancient science for manipulating the five major pranas that flow through our subtle bodies and gross physical body. The technique also uses pranayama techniques, an ancient method of breath control that allows man to control the flow of prana that enters and exits the body's psychic centers, Chakras. The prayer technique also incorporates mudra yoga that assists the prayer practitioner in sealing and redirecting pranas so that they can be impregnated with a mind substance that has the
