**The Crisis of Soviet Industrialization** Evgeniĭ Alekseevich Preobrazhenskii, 1980 *The Crisis of Soviet Industrialization* Eugenii A. Preobrazhensky, 2017-10-03 This title was first published in 1979 With the revival of interest in Marxist ideas over the past ten or so years Evgeny Preobrazhensky one of the leading political and intellectual figures to emerge from the Bolshevik Revolution has become known to a far wider circle than just the occasional specialist in Soviet history For the English reader direct familiarity with Preobrazhensky s writings became possible only in 1965 with the publication of a translation of his most famous theoretical work *The New Economics* This collection expands the translation of Preobrazhensky s work with an extended bibliography advising an additional Russian material *The Crisis of Soviet Industrialization* Evgeniĭ Alekseevich Preobrazhenskii, 1979 *Selected Writings on Soviet Law and Marxism* P.I. Stuchka, Robert Sharlet, Peter B. Maggs, Piers Beirne, 2019-07-23 The Latvian born legal theorist P I Stuchka 1865 1932 generally recognized as one of the principal architects of modern Soviet legal theory and the Soviet legal system itself was a prodigious author and editor Twenty essays by Stuchka written between 1917 and 1931 were selected for translation

*Soviet State and Society Between Revolutions, 1918-1929* Lewis H. Siegelbaum, 1992-08-20 The evolution of the ruling Communist Party and its New Economic Policy is explored in the first book to analyze the relationship between the Soviet state and society from 1917 through the early 1930s through the changing fortunes of its peoples [The Caucasus Under Soviet Rule](#) Alex Marshall, 2010-09-13 The Caucasus is a strategically and economically important region in contemporary global affairs This book provides the first comprehensive study of the impact of Soviet policy on the Caucasus focusing in particular on the period from 1917 to 1955 It argues that understanding the Soviet legacy in the region remains critical to analysing both the new states of the Transcaucasus and the autonomous territories of the North Caucasus **Russia and Eastern Europe, 1789-1985** Raymond Pearson, 1989 [The Bibliographical Dictionary of Russian and Soviet Economists](#) Robert Campbell, 2012-08-21 Despite the restrictions on their work and actions the economists of the Soviet period produced a great deal of bold and important work With the erosion of the old Stalinist controls economists in the Soviet Union themselves became very interested in the history of their profession not least in order to find authentic voices that might offer reinforcement or counterpoint to the policy analyses and recommendations with which policy makers in the transition countries are today being bombarded This major new reference work pulls together many years of research in order to present a bio bibliographic dictionary of Russian and Soviet economists many of whom have previously had no coherent record compiled of their careers achievements and wider significance Through exploring this rich tradition of economic thought we can go some way in understanding the role of economists in the functioning of the Soviet system as well as bringing previously forgotten work to light raising new questions and providing a memorial to those who suffered as a result of the system This hugely detailed and important new volume takes into account all the nuances of the story of Russian and

Soviet economic thought such as regional issues the reform and transition to a market economy and the economic output of non economists Featuring nearly 500 entries and including a detailed contextual introduction this landmark volume will be a vitally important reference work for all those with an interest in the history of economic thought the history of economics and Russian and Soviet history more generally **Industrialization in the Modern World** John Hinshaw, Peter N.

the Industrial World: v. 1: The Failure of the Soviet Experiment Dusan Pokorny, 2019-07-04 In the last years of the Soviet Union with remarkable suddenness it became commonplace to observe that what the country needed was a free market private property and integration into the global economy But why aside from the obvious fact that the alternative was failing should this consciousness dawn in our day This book argues that the time has come to reflect on what the epochal events of our era are teaching us about larger questions the relationship between economy and society culture and market Dusan Pokorny asks precisely these questions revisiting the ideas of classic and contemporary philosophers in the light of the failure of the Soviet order and the exigencies of post Soviet transformation As Pokorny also points out integration in a post industrial global economy entails profound changes in the domain of property rights a redefinition of the relation between equity and efficiency and a regrouping of national consciousness The present volume examines the implications of these demands for the post Soviet societies another on the European and North American experiments in economic integration is in preparation

The Socialist Imperative Michael A. Lebowitz, 2015-07-22 In a little more than a decade economist Michael A. Lebowitz has written several major works about the transition from socialism to capitalism Beyond Capital winner of the Deutscher Prize Build It Now The Socialist Alternative and The Contradictions of Real Socialism Here he develops and deepens the analysis contained in those pathbreaking works by tracing major issues in socialist thought from the nineteenth century through the twenty first Lebowitz explores the obvious but almost universally ignored fact that as human beings work together to produce society's goods and services we also produce something else namely ourselves Human beings are shaped

by circumstances and any vision of socialism that ignores this fact is bound to fail or at best reproduce the alienation of labor that is endemic to capitalism But how can people transform their circumstances in a way that allows them to re organize production and at the same time fulfill their human potential Lebowitz sets out to answer this question first by examining Marx s Critique of the Gotha Programme and from there investigates the experiences of the Soviet Union and more recent efforts to build socialism in Venezuela He argues that socialism in the twenty first century must be animated by a central vision in three parts social ownership of the means of production social production organized by workers and the satisfaction of communal needs and communal purposes These essays repay careful reading and reflection and prove Lebowitz to be one of the foremost Marxist thinkers of this era

**The Political Economy of Imperialism** Ronald M. Chilcote, 2012-12-06 This book brings together important essays by distinguished scholars who have devoted past attention to the study of imperialism and development It complements an anthology of previously published essays that brings together important theoretical perspectives around the issues and debates on these themes this volume will be published by Humanity Press forthcoming Both projects relate to a lengthy chapter Theories of Imperialism which will be published in my book Theories of Comparative Political Economy Forthcoming These projects represent a culmination of many years of teaching in both economics and political science During that time I taught two political science courses on development and under development but I was unable to convince my colleagues of the usefulness of a course on imperialism that linked historical issues and debates with the more recent developmental literature When in 1990 I was welcomed into economics my colleagues endorsed a graduate seminar on the political economy of imperialism Thus this volume evolved out of that experience in an effort to encourage new analysis that reflects retrospectively on past contributions as well as the prospects for imperialism and development in the contemporary world

Efficiency and Justice in the Industrial World: The failure of the Soviet experiment Dušan Pokorný, 1993 In the last years of the Soviet Union it suddenly became commonplace to claim that what the country needed was a free market private property and integration into the global economy But why should this consciousness dawn in our day This book examines the issues and aims to answer that question

*October Song* Paul Le Blanc, 2017-11-14 A panoramic account of the Russian Revolution of 1917 and its aftermath animated by the lives ideas and experiences of workers peasants intellectuals artists and revolutionaries of diverse persuasions October Song vividly narrates the triumphs of those who struggled for a new society and created a revolutionary workers state Yet despite profoundly democratic and humanistic aspirations the revolution is eventually defeated by violence and authoritarianism October Song highlights both positive and negative lessons of this historic struggle for human liberation

The Political Economy of Chinese Development Mark Selden, 2016-09-16 The first edition of The Political Economy of Chinese Socialism reconceptualized the political economy of China by highlighting the changing character of urban rural and state society conflicts in the era of Mao Zedong s leadership and in the contemporary post Mao reforms The economic and social crises

that engulfed China and indeed much of the rest of the socialist world in the late 1980s culminating in the 1989 democratic movement and its suppression stimulated a rethinking of central propositions of the first edition. It particularly led the author to inquire anew into the meaning of socio political as well as economic development in a populous and poor agrarian nation. This volume then assesses the economic performance and social consequences of China's political economy over four decades with a focus on China's countryside and city countryside relations. In addition to a reconceptualization and updating of the introductory chapter there is a new chapter The Social Origins and Limits of the Chinese Democratic Movement.

*The Contradictions of "Real Socialism": The Conductor and the Conducted* Michael A. Lebowitz, 2012. In this concise volume noted scholar and economist Michael A. Lebowitz considers the legacy of twentieth century socialist societies or what some have termed real socialism. While these societies were able to claim major achievements in areas from health care to education to popular culture they nonetheless met limited success in eroding what Marx called the opposition of the worker as direct producer and the proprietor of the means of production. That this opposition between workers and managers continued to exist in one form or another under real socialism means that according to L

Unending Capitalism Karl Gerth, 2020-05-14. What forces shaped the twentieth century world? Capitalism and communism are usually seen as engaged in a fight to the death during the Cold War. With the establishment of the People's Republic of China in 1949 the Chinese Communist Party aimed to end capitalism. Karl Gerth argues that despite the socialist rhetoric of class warfare and egalitarianism Communist Party policies actually developed a variety of capitalism and expanded consumerism. This negated the goals of the Communist Revolution across the Mao era 1949-1976 down to the present. Through topics related to state attempts to manage what people began to desire

wristwatches and bicycles films and fashion leisure travel and Mao badges Gerth challenges fundamental assumptions about capitalism communism and countries conventionally labeled as socialist In so doing his provocative history of China suggests how larger forces related to the desire for mass produced consumer goods reshaped the twentieth century world and remade people's lives
