Investigation of Concentration of Economic Power United States. Congress. Temporary National Economic Committee,1941      **Economics for Prophets** Walter L. Owensby,1988 Owensby has written this book to help Christians take part more confidently and effectively in the dialogue on ethics and economics Economics for Propbets is an introduction to the subject it assumes no previous exposure to economics studies or jargon that takes a helpful three step approach It explains some of the basic concepts of our economic system explores how these concepts function in the real world and critiques both the concepts and their practical working out from a biblical theological ethical perspective Book jacket

**Buddhism in Dialogue with Contemporary Societies** Carola Roloff,Wolfram Weiße,Michael Zimmermann,2020 The growing pluralization of religion and culture in Europe means that we encounter an increasing number of Buddhist immigrants as well as Western converts Against this background in June 2018 the Academy of World Religions and the Numata Center for Buddhist Studies at the University of Hamburg Germany invited scholars of Therav da East Asian and Tibetan Buddhism The questions discussed referred to Does Buddhism matter today What can it contribute Must Buddhism adapt to the modern world How can Buddhism adapt to a non Asia context When Buddhism travels what must be preserved if Buddhism is to remain Buddhism The contributions in this volume show not only that Buddhism matters in the West but that it already has its strong impact on our societies Therefore universities in Europe should include Buddhist theories and techniques in their curricula      *The West and the Growth of the National Ideal* Frederic Logan Paxson,1912      Economic Doctrines of Islam Afzalur Rahman,1976-01-01 Third part of a 4 Volume series Economic Doctrines of Islam by the economist Mr Afzal ur Rahman The author has discussed in detail all the aspects of the Economics of the present age in the light of Islamic teachings He has also discussed the prevalent Economic systems of the modern world analysed them to the Economic system of Islam Third volume explains the modern theories of interest and presents the Islamic Theory of Zero Rate of interest It also discusses the system of Zakat and the Law of Inheritance and their place in the Islamic System      *Vigor* Reza Shadmehr,Alaa A. Ahmed,2025-02-18 An examination of the link between the vigor with which we move and the value that the brain assigns to the goal of the movement Why do we reflexively run toward people we love but only walk toward others In *Vigor* Reza Shadmehr and Alaa Ahmed examine the link between how the brain assigns value to things and how it controls our movements They find that brain regions thought to be principally involved in decision making also affect movement vigor and that brain regions thought to be principally responsible for movement also bias patterns of decision making Shadmehr and Ahmed first consider the relationship of value and vigor from a behavioral and mathematical perspective considering a series of fascinating observations including for example data showing that people in certain cities tend to walk faster than those living elsewhere through the lens of optimal foraging theory They then go on to explore the neural basis of vigor and valuation synthesizing results from experiments that have measured activity in various brain structures and neuromodulators

including dopamine and serotonin They speculate that in the future technologies may be able to predict our personal preferences by measuring our movements through the vigor with which we move we unwittingly reveal one of our well guarded secrets how much we value the object of our attention     Invertebrate Models of Natural and Drug-Sensitive Reward Robert Huber, Moira van Staaden, 2019-10-17 The rewarding properties of drugs depend on their capacity to activate appetitive motivational states Because the mechanisms underlying natural reward are an important life sustaining process and strongly conserved throughout metazoan evolution invertebrate models provide a powerful complement to the mammalian systems traditionally used in addiction research A wide range of organizational complexity combined with genetically manipulable and relatively simple accessible nervous systems make invertebrates excellent models in which to explore general addiction principles These include the role of natural reward systems in learning the basic biological mechanisms of drug addiction and the long term effects of early drug exposure The contributions to this e book illustrate the current state of invertebrate addiction research The chapters show that the reward circuits of invertebrate taxa are surprisingly sensitive to human drugs of abuse Employing learning paradigms typically used in vertebrate studies viz conditioned place preference and operant self administration paradigms invertebrates are shown to exhibit aspects of the addiction cycle from activational effects of common psychostimulants sensitization with repeated application to extinction withdrawal and reinstatement This highlights the value of the comparative approach for both exploring conserved mechanisms underlying drug addiction and the utility of invertebrate models in seeking potential solutions     **Andean Countries Mining Industry Handbook - Strategic Information and Regulations** IBP, Inc., 2016-12-16 2011 Updated Reprint Updated Annually Andean Development Corporation CAF Handbook     Bolivia Country Study Guide Volume 1 Strategic Information and Developments IBP USA, 2017-04-10 Bolivia Country Study Guide Strategic Information and Developments Volume 1 Strategic Information and Developments     *Population Theories and their Economic Interpretation* Sydney H.
