Skill Power Journeys Through Mathemati:

MathLand, 1997 Sharpening Everyday Mental/thinking Skills Through Mathematics Problem Solving And Beyond
Alfred S Posamentier, Hans Humenberger, 2024-01-22 Mathematics is a subject taught from kindergarten through to high school and yet it is the one subject that most adults are almost proud to admit to not having been very good at and therefore tend to avoid it where they can. However one of the key factors in mathematics is its ability to enable us to solve everyday problems. When we consider the worst case scenario of the situation it is analogous to solving a mathematical problem by considering extremes. Or we might consider the best path to take from point A to point B where geometric relationships can be helpful. This book is intended to demonstrate a variety of neglected aspects of mathematics in order to demonstrate the power and beauty of the field of mathematics beyond where most people students and teachers believe is possible. The chapters of the book explore a multitude of topics unusual arithmetic calculations and shortcuts entertaining and instructional problem solving strategies unusual applications of algebra and how geometry allows us to better appreciate physical relationships. Only a basic mathematical knowledge is needed to understand these topics and problems however the book also demonstrates that armed with even this level of understanding our mathematical skills far exceed what we learned at school. The final chapter is the most challenging and explores a curious problem solving technique **The Journey Through Four Seasons of Life** Sin Mong Wong, 2015-07-07 This is a success story about the journey of life of a village boy from a poor big family. The three stages of life are classified as the learning stage working phase and yearning or retiring stage. These three stages of his life can be compared to the four seasons. The book has seven chapters. The first chapter consists of the author's general philosophy of life his habits of meditation his drill strategy to enhance skills of his game basketball his secrets of his study strategy his discoveries of his talents as a writer investor and entrepreneur his financial planning his family achievements and his super physical health. The second chapter provides the necessary ingredients information and knowledge that help him in building his financial security. It gives a full description of his strategies building many linear incomes as well as residual income. All these efforts make him a wealthy man. The third chapter is full of information and knowledge to help him living a healthy and fulfilled life. They are plenty examples of life style for anyone who cares to live healthily. The fourth chapter gives a full description of his three stages of life including his family history his struggle from birth to fifteen years old. The experiences of a terrible childhood and child labor. This is comparable to the winter season of his life. His spring season of life begins when his sister gave him the opportunity to study secondary school in the city of Penang. He made full use of the period moving from secondary school to teacher training college and the university. His interest in his game propels him to be a basketball star player. Chapter five gives an account of his working life. After graduating from the university he begins his summer season of his life. His chosen career as a professional teacher becomes his calling and he makes full use of available talents in writing to secure his financial security. His motivation

experiences and contribution give him an edge and he moves up the ladder of success He was not only a successful mathematics teacher and an excellent administrator as his school principal he is also a successful writer investor and entrepreneur making him a wealthy man At the age of fifty one he accomplished his mission seeing all his projects completed he took his optional retirement He left for Australia to pursue his doctoral study Chapter six gives an account of the autumn season of his life He continues to write invest and learn He keeps fit and continues playing his game tennis He keeps fit and enjoys his retirement Chapter seven tells a new story He embarks on a new adventure called Quantum Jumping He provides many successful quantum jumps to heal his headache to learn new concept to achieve new abundance wealth to gain happiness to increase his excitement in happy marriage and finally acquiring joy of his life The journey is well travelled
