Skyline Hubert Damisch, 2022 One of today's foremost art historians and critics presents a strikingly original view of architecture and the city through the twin lenses of cultural theory and psychoanalysis Hubert Damisch whose work on the history of perspective the notion of imitation and the question of representation has emerged as the most important body of critical thought on painting since perhaps Meyer Shapiro's collected essays here engages a subject that has been of continuing interest to him over the last thirty years In the field of architecture this book has been awaited for a long time in the fields of art history and cultural studies it will be welcomed as a powerful argument for utilizing in an urban context interpretive approaches developed for the analysis of spatial and visual phenomena Though architecture has served since Descartes as a structural analogy for philosophical discourse and has played a similar role in literature contemporary studies on architecture have tended to be very specialized with little regard for their accessibility to scholars in the humanities and social sciences This book however with its solid grounding in architecture and urban theory and its profoundly humanistic approach will prove deeply rewarding to specialist and generalist alike The book engages a wide range of subjects including reconstructions of the Egyptian labyrinth architectural museums European visions of New World cities the great spaces and national parks of the American West and landscape gardening in the United States These subjects work together to develop a unique way of looking at the city and its architecture the landscape and its spaces **A**

**Childhood Memory by Piero della Francesca** Hubert Damisch, 2007 Piero della Francesca's Madonna del Parto a celebrated fifteenth century Tuscan fresco in which the Virgin gestures to her partially open dress and her pregnant womb is highly unusual in its iconography Hubert Damisch undertakes an anthropological and historical analysis of an artwork he constructs as a childhood dream of one of humanity's oldest preoccupations the mysteries of our origins of our conception and birth At once parodying and paying homage to Freud's seminal essay on Leonardo da Vinci Damisch uses Piero's enigmatic painting to narrate our archaic memories He shows that we must return to Freud because work in psychoanalysis and art has not solved the problem of what is being analyzed in the triangle of author work and audience where is the psychoanalytic component located A Theory of /Cloud/ Hubert Damisch, 2002 This is the first in a series of books in which one of the most influential of contemporary art theorists revised from within the conceptions underlying the history of art The author's basic idea is that the rigor of linear perspective cannot encompass all of visual experience and that it could be said to generate an oppositional factor with which it interacts dialectically the cloud On a literal level this could be represented by the absence of the sky as in Brunelleschi's legendary first experiments with panels using perspective Or it could be the

vaporous swathes that Correggio uses to mediate between the viewer on earth and the heavenly prospect in his frescoed domes at Parma Insofar as the cloud is a semiotic operator interacting with the linear order of perspective it also becomes a dynamic agent facilitating the creation of new types of pictorial space Damisch puts the signifier cloud between slashes to indicate that he deals with clouds as signs instead of realistic elements This way of looking at the history of painting is especially fruitful for the Renaissance and Baroque periods but it is also valuable for looking at such junctures as the nineteenth century For example Damisch invokes Ruskin and Turner who carry out both in theory and in practice a revision of the conditions of appearances of the cloud as a landscape feature Even for the twentieth century he has illuminating things to say about how his reading of cloud applies to the painters Leger and Batthus In short Damisch achieves a brilliant and systematic demonstration of a concept of semiotic interaction that touches some of the most crucial features of the Western art tradition *Journal of the Society of Architectural Historians* Society of Architectural Historians,2004 Includes special issues American Book Publishing Record ,2001 **Forthcoming Books** Rose Arny,2001 Los Angeles Magazine ,2000-12 Los Angeles magazine is a regional magazine of national stature Our combination of award winning feature writing investigative reporting service journalism and design covers the people lifestyle culture entertainment fashion art and architecture and news that define Southern California Started in the spring of 1961 Los Angeles magazine has been addressing the needs and interests of our region for 48 years The magazine continues to be the definitive resource for an affluent population that is intensely interested in a lifestyle that is uniquely Southern Californian
