The Prevention of Terrorism in British Law Clive Walker, 1992 *Aviation Terrorism and Security* Paul Wilkinson, Brian Jenkins, 2013-11-05 First Published in 1999 The recent conviction of Ramzi Ahmed Yousef for plotting what prosecutors called 48 hours of terror in the sky by conspiring to bomb a dozen US airliners the increasing number of man portable SAM attacks on aircraft and the recent crash of a hijacked Ethiopian airliner off the Comoro Islands causing 127 deaths show that aviation confronts a wide range of security threats The aim of this volume published ten years after Lockerbie is to assess the changing threats to aviation security It is a sad fact that despite major efforts by certain states to enhance security much more needs to be done to remedy weaknesses in international aviation security if further Lockerbies are to be prevented The contributors examine threats and vulnerabilities in the light of recent developments in aviation security and consider the prospects for strengthening the response at national and international levels The study is of obvious relevance not only to security and academic specialists but also to the international civil aviation community and national policy makers

Terrorism: Bridging the Gap with Peace and Conflict Studies Ioannis Tellidis, Harmonie Toros, 2016-01-08 This book opens up the discussion of the interrelation between terrorism studies and peace and conflict studies The aim is to examine the instances and circumstances under which both fields can benefit from each other Even though it is often accepted that terrorism is a form of political violence it is also quite frequent that research on the topic is dismissed when it is approached with conflict analysis frames More importantly policy approaches continue to inhibit obstruct and reject frameworks that are concerned with the transformation and resolution of terrorist conflicts partly because they see the state as the ultimate referent object to be secured At the same time peace and conflict studies seem to be excessively focused on problem solving approaches which overemphasise the role of parity during negotiations and misdiagnose the distribution of power both within conflicts as well as within conflict management resolution and or transformation approaches This book was published as a special issue of Critical Studies on
