Text Databases and Document Management: Theory and Practice Chin, Amita Goyal, 2000-07-31 The ability of relational databases to store and manage large amounts of limited data types is well proven but the basics of representing textual information and its subsequent retrieval in a meaningful fashion still provides many challenges This is because documents do not easily map to traditional database solutions The primary objective of Text Databases and Document Management Theory and Practice is to provide a focal point for concrete theories and practices in the handling of textual data as well as documents as a whole **Effective Databases for Text & Document Management** Shirley A.

Becker, 2003-01-01 Focused on the latest research on text and document management this guide addresses the information management needs of organizations by providing the most recent findings How the need for effective databases to house information is impacting organizations worldwide and how some organizations that possess a vast amount of data are not able to use the data in an economic and efficient manner is demonstrated A taxonomy for object oriented databases metrics for controlling database complexity and a guide to accommodating hierarchies in relational databases are provided Also covered is how to apply Java triggers for X Link management and how to build signatures *Advanced Topics in Database Research* Keng Siau, 2003-07-01 This book presents the latest research ideas and topics on how to enhance current database systems improve information storage refine existing database models and develop advanced applications It provides insights into important developments in the field of database and database management With emphasis on theoretical issues regarding databases and database management the book describes the capabilities and features of new technologies and methodologies and addresses the needs of database researchers and practitioners Note This book is part of a new series entitled Advanced Topics in Database Research This book is Volume Three within this series Vol III 2004 **ERP & Data Warehousing in Organizations: Issues and Challenges** Grant, Gerald G., 2000-01-01 Offering enterprise resource planning ERP deployment strategies for information as diverse as patient records police and community relations and geospatial services this text addresses the complex issues that information and communication technologies pose for small midsize and large organizations Provided are recent research findings as well as practical assessments and suggestions for managers **Web-powered Databases** David Taniar, Johanna Wenny Rahayu, 2003-01-01 Providing a snapshot of current methods and development activities in the area of Internet databases this book supplies answers to many questions that have been raised regarding database access through the web Provided are a number of case studies of successful web database applications including multiple choice assessment through the web an online pay claim a product catalog and content management and dynamic web pages Also covered are querying and mining of web data and issues such as gaining physical low level access to web powered databases and heterogeneous web databases **Managing Data Mining Technologies in Organizations** Parag C. Pendharkar, 2003-01-01 Portals present unique strategic challenges in the academic environment

Their conceptualization and design requires the input of campus constituents who seldom interact and whose interests are often opposite. The implementation of a portal requires a coordination of applications and databases controlled by different campus units at a level that may never before have been attempted at the institution. Building a portal is as much about constructing intra campus bridges as it is about user interfaces and content. Designing Portals: Opportunities and Challenges discusses the current status of portals in higher education by providing insight into the role portals play in an institution's business and educational strategy by taking the reader through the processes of conceptualization, design, and implementation of the portals in different stages of development at major universities and by offering insight from three producers of portal software systems in use at institutions of higher learning and elsewhere. *Text Mining and its Applications to Intelligence, CRM and Knowledge Management* A. Zanasi, 2007-09-30 Organizations generate and collect large volumes of textual data. Unfortunately, many companies are unable to capitalize fully on the value of this data because information implicit within it is not easy to discern. Primarily intended for business analysts and statisticians across multiple industries, this book provides an introduction to the types of problems encountered and current available text mining solutions. *The Text Mining Handbook* Ronen Feldman, James Sanger, 2007 Text mining is a new and exciting area of computer science research that tries to solve the crisis of information overload by combining techniques from data mining, machine learning, natural language processing, information retrieval, and knowledge management. Similarly, link detection is a rapidly evolving approach to the analysis of text that shares and builds upon many of the key elements of text mining; also, it provides new tools for people to better leverage their burgeoning textual data resources. The Text Mining Handbook presents a comprehensive discussion of the state of the art in text mining and link detection. In addition to providing an in-depth examination of core text mining and link detection algorithms and operations, the book examines advanced pre-processing techniques, knowledge representation considerations, and visualization approaches. Finally, the book explores current real-world mission-critical applications of text mining and link detection in such varied fields as M/A business intelligence, genomics research, and counter-terrorism activities. **Handbook of Research on Text and Web Mining Technologies** Song, Min, Brook Wu, Yi-Fang, 2008-09-30 Examines recent advances and surveys of applications in text and web mining which should be of interest to researchers and end users alike. *Intelligent Text Categorization and Clustering* Felipe M. G. França, Alberto Ferreira de Souza, 2008-10-01 Automatic Text Categorization and Clustering are becoming more and more important as the amount of text in electronic format grows and the access to it becomes more necessary and widespread. Well-known applications are spam filtering and web search, but a large number of everyday uses exist: intelligent web search, data mining, law enforcement, etc. Currently, researchers are employing many intelligent techniques for text categorization and clustering, ranging from support vector machines and neural networks to Bayesian inference and algebraic methods such as Latent Semantic Indexing. This volume offers a wide spectrum of research work developed for intelligent text categorization.
