Text Work Representing Organization And Organizing Representation:

Text/Work Stephen Linstead, 2003-09-02 The concepts of social sciences social action and organizations as texts are no longer unfamiliar ones The use of language in social analysis has made researchers acutely aware of the importance of language use not only to contain and express experience but also to create second order accounts of these experiences This way of using language to shape our knowledge and guide social action it is urged makes social action and organization a text Text Work is an innovative exploration of our understanding of the textual nature of organizational life and considers the consequences of textual nature for organization studies How can organizations be profitably written into textual forms This is a bold investigation into a challenging and exciting area of study Boundary-Spanning in Organizations Janice Langan Fox, Cary Cooper, 2013-11-12 In more recent times the essence of the gatekeeper s role has moved to the boundary spanner a systems thinker who understands the specific needs and interests of the organization and whose greatest asset is their ability to move across and through the formal and informal features of the modern organization There are many types of boundaries associated with an organization for example horizontal function and expertise vertical status hierarchy geographic demographic and stakeholder Boundaries are the defining characteristic of organizations and boundary roles are the link between the environment and the organization Aldrich Herker 1977 with functions crucial to the effectiveness and success of the organization Despite being a critical success factor for an organization beginning in the 1970s the term boundary spanning has had an intermittent research history there has been no systematic body of research that has evolved over time This book aims to invigorate excite and expand the literature on boundary spanning in a diverse range of disciplines such as sociology organizational psychology management medicine defence health social work and community services The book serves as the first collection of reviews on boundary spanning in organizations Untold Stories in Organizations Michal Izak, Linda Hitchin, David Anderson, 2014-11-13 The field of organizational storytelling research is productive vibrant and diverse Over three decades we have come to understand how organizations are not only full of stories but also how stories are actively making sustaining and changing organizations This edited collection contributes to this body of work by paying specific attention to stories that are neglected edited out unintentionally omitted or deliberately left silent Despite the fact that such stories are not voiced they have a role to play in organizational analysis The chapters in this volume variously explore how certain realities become excluded or silenced The stories that remain below the audible range in organizations offer researchers an access to study political practices which marginalise certain organisational realities whilst promoting others This volume offers a further contribution by paying heed to silence and the processes of silencing These silences influence the choice of issues on organisational agendas the choice of audience s to which these discourses are addressed and the ways of addressing them In exploring these relatively understudied terrains Untold Stories in Organizations comprises an important contribution to the organizational storytelling space opening paths for new trajectories in storytelling

research The Social Construction of Management Nancy Harding,2004-06 A critical and empirical study that explores the constitution of managerial identities in the age of mass education in management and challenges the way we think about organizations and their management *Research Skills for Management Studies* Alan Berkeley Thomas,2004-08-02 The recent growth of interest in the systematic study of management has transformed a once neglected area of research into one that now attracts a huge number of postgraduate students Despite this there has been a distinct lack of research guides tailored specifically for management studies Designed as a comprehensive introduction to the main phases of a research project this textbook fills that void It leads students from the very first stage of initiation through to final publication considering the nature of research skills and the fundamental elements of the research process whilst exploring the institutional context in which management research is carried out Taking current debates and the surrounding philosophical and strategic issues in hand this book combines the key theories with the best practical advice to offer a completely rounded introduction to the topic It includes guidance and specific reference to real management research projects as well as case examples activities and further reading lists and is essential reading for anyone undertaking a management studies research project **Management and Neoliberalism** Alexander Styhre,2014-04-16 After the financial collapse of 2008 and the bailing out of banks in the US and the UK the long term viability of the neoliberal doctrine has come under new scrutiny The elimination of regulatory control the financialization of the economy including the growth of increasingly complex financial innovations and the dominance of a rentier class have all been subject to thorough criticism Despite the unexpected meltdown of the financial system and the substantial costs for restoring the finance industry critics contend that the same decision makers remain in place and few substantial changes to regulatory control have been made Even though neoliberal thinking strongly stresses the role of the market and market based transactions the organization theory and management literature has been marginally concerned with neoliberalism as a political agenda and economic policy This book examines the consequences of neoliberalism for management thinking and management practice Managerial practices in organizations are fundamentally affected by a political agenda emphasizing competition and innovation Concepts such as auditing corporate social responsibility shareholder value and boundariless careers are some examples of managerial terms and frameworks that are inextricably entangled with the neoliberal agenda This book introduces the literature on neoliberalism its history and controversies and demonstrates where neoliberal thinking has served to rearticulate managerial practice including in the areas of corporate governance human resource management and regulatory control of organizations

Style Differences in Cognition, Learning, and Management Stephen Rayner,Eva Cools,2012-12-06 This book aims to mark fifteen years of contributions to the field of style research in cognition and learning presented at the annual conference of the European Learning Styles Information Network The style field is a multidisciplinary global community made up of researchers in several domains of knowledge including education psychology business computer science

information systems management human resources and other related fields The book will be relevant for readers who are interested in differences in thinking and learning covering a wide range of style related themes with appeal to readers seeking an international and interdisciplinary perspective Interested practitioners will include professionals working in the areas of HR Management Organizational Learning Business Management and all phases of Education The application of style differences for example impacts widely upon work and human performance in areas of policy making team management and project development sports social agency and medicine New or alternative research paradigms facilitating revision and consensus in the field of style differences are presented The aim of integrating research and practice is developed to achieve consensual theory for style differences in human performance *Style Differences in Performance* is a timely and field defining volume that will change the way academics and practitioners across international and disciplinary boundaries think and talk about the field of learning style and its implications for human achievement **Efficiency and Management** Guy

Callender,2008-11-19 It is widely accepted that management concepts such as strategic management human resource management and management development have a well defined body of knowledge designed to inform management praxis however the notion of efficiency has no such body of knowledge to support its application within management praxis This book proposes the replacement of the generalised term efficiency with the more comprehensive notion of performance efficiency to provide a reliable basis on which to evaluate management behaviour Given the scope of the investigation the outcome is not designed to prove the success or failure of the inherent nature of efficiency but rather to establish a new starting point for yet wider empirical research At a macro level it advances the proposition that the notion of efficiency has become an ideological statement of support for any management intention rather than a practical means to inform or evaluate a range of management actions *The Public Services Under Reconstruction* Marja Gastelaars,2009-01-13 This

book examines the services in and around the public domain analysing a number of socio cultural changes relevant to these services including the rationalising efforts of the New Public Management and the introduction of IT Values-based Service for Sustainable Business Bo Edvardsson,Bo Enquist,2008-10-31 This is the first book on the role of values in developing and managing service companies emphasizing sustainable business The authors examine the role of values in forming a service culture which creates customer value
