The Cosmic Winter:

The Cosmic Winter Victor Clube, Bill Napier, 1990-01 *Asian Millenarianism* Hong Beom Rhee, 2007 This groundbreaking book reexamines the Taiping and the Tonghak movements in 19th century Asia Providing an understanding of the movements as an expression in part of deeply rooted Asian spiritual ideas the work also offers historical and philosophical reflections on what studies of Asian millenarianism can contribute to the comparative study of millenarianism

Impact! Gerrit L. Verschuur, 1997-12-18 Most scientists now agree that some sixty five million years ago an immense comet slammed into the Yucatan detonating a blast twenty million times more powerful than the largest hydrogen bomb punching a hole ten miles deep in the earth Trillions of tons of rock were vaporized and launched into the atmosphere For a thousand miles in all directions vegetation burst into flames There were tremendous blast waves searing winds showers of molten matter from the sky earthquakes and a terrible darkness that cut out sunlight for a year enveloping the planet in freezing cold Thousands of species of plants and animals were obliterated including the dinosaurs some of which may have become extinct in a matter of hours In Impact Gerrit L Verschuur offers an eye opening look at such catastrophic collisions with our planet Perhaps more important he paints an unsettling portrait of the possibility of new collisions with earth exploring potential threats to our planet and describing what scientists are doing right now to prepare for this awful possibility Every day something from space hits our planet Verschuur reveals In fact about 10 000 tons of space debris fall to earth every year mostly in meteoric form The author recounts spectacular recent sightings such as over Allende Mexico in 1969 when a fireball showered the region with four tons of fragments and the twenty six pound meteor that went through the trunk of a red Chevy Malibu in Peekskill New York in 1992 the meteor was subsequently sold for 69 000 and the car itself fetched 10 000 But meteors are not the greatest threat to life on earth the author points out The major threats are asteroids and comets The reader discovers that astronomers have located some 350 NEAs Near Earth Asteroids objects whose orbits cross the orbit of the earth the largest of which are 1627 Ivar 6 kilometers wide and 1580 Betula 8 kilometers Indeed we learn that in 1989 a bus sized asteroid called Asclepius missed our planet by 650 000 kilometers a mere six hours and that in 1994 a sixty foot object passed within 180 000 kilometers half the distance to the moon Comets of course are even more deadly Verschuur provides a gripping description of the small comet that exploded in the atmosphere above the Tunguska River valley in Siberia in 1908 in a blinding flash visible for several thousand miles every tree within sixty miles of ground zero was flattened He discusses Comet Swift Tuttle the most dangerous object in the solar system a comet far larger than the one that killed off the dinosaurs due to pass through earth s orbit in the year 2126 And he recounts the collision of Comet Shoemaker Levy 9 with Jupiter in 1994 as some twenty cometary fragments struck the giant planet over the course of several days casting titanic plumes out into space when Fragment G hit it outshone the planet on the infrared band and left a dark area at the impact site larger than the Great Red Spot In addition the author describes the efforts of Spacewatch and other

groups to locate NEAs and evaluates the idea that comet and asteroid impacts have been an underrated factor in the evolution of life on earth Astronomer Herbert Howe observed in 1897 While there are not definite data to reason from it is believed that an encounter with the nucleus of one of the largest comets is not to be desired As Verschuur shows in Impact we now have substantial data with which to support Howe s tongue in cheek remark Whether discussing monumental tsunamis or the innumerable comets in the Solar System this book will enthrall anyone curious about outer space remarkable natural phenomenon or the future of the planet earth *The Road of Life* Martinus,1990 **The Shiva Theory: A Grand Unified Theory of Consciousness, Energy, and the Cosmos** ABHIJEET SARKAR,2025-09-07 The Shiva Theory A Grand Unified Theory of Consciousness Energy and the Cosmos by Abhijeet Sarkar CEO it s an intellectual and spiritual odyssey that will expand your mind and transform your perception of the world It s a must read for anyone fascinated by the mysteries of science the depths of consciousness and the future of human understanding Are you ready to witness the unveiling of reality s deepest secrets Scroll up and click Buy Now to Join the revolution and embark on the journey today Your understanding of the universe will never be the same *Mayan Calendar Prophecies: Predictions for 2012-2052* Gary C. Daniels,2012-11-01 Take a look at the science behind the Mayan calendar prophecies and mythology The Maya believed multiple cycles governed civilization They created various calendars to track these cycles Their short count calendar tracked a 256 year cycle believed to control epidemics famines warfare and more Scientists have found a 250 year solar cycle that also appears to affect epidemics famines warfare and more Their long count calendar tracked a 5000 year cycle related to natural disasters and cosmic catastrophes Scientists have also discovered that the Earth is subjected to periodic bombardment by comets and asteroids that plunges the world into long periods of darkness and cold Mayan mythology appears to record such events and in some instances even the exact dates on which these catastrophes occurred in the past By comparing these dates with ice core records sedimentary records and climate records this book reveals the truth about civilization s darkest days And what may lie ahead in the future **The Breath of Life** John Burroughs,1915 This is a pre 1923 historical reproduction that was curated for quality Quality assurance was conducted on each of these books in an attempt to remove books with imperfections introduced by the digitization process Though we have made best efforts the books may have occasional errors that do not impede the reading experience We believe this work is culturally important and have elected to bring the book back into print as part of our continuing commitment to the preservation of printed works worldwide *Physical History of the Earth in Outline* James Bradford Babbitt,1909 *Harper's Magazine* Henry Mills Alden, Lee Foster Hartman, Thomas Bucklin Wells, Frederick Lewis Allen,1916 Important American periodical dating back to 1850 **Power** Richard Heinberg,2021-09-14 Impeccably researched and masterfully written this book explains how and why humanity is driving itself off the cliff Dahr Jamail author The End of Ice Weaving together findings from a wide range of disciplines Power traces how four key elements developed to give humans extraordinary power tool making ability language

Bombarded Britain: A Search For British Impact Structures Richard Stratford, 2004-07-26 This book describes a search for geological evidence of meteorite impact structures in Britain The statistics of impact structures indicate that Britain should have Phanerozoic impact structures up to tens of kilometres in diameter A constant theme is the importance of atmospheric break up of small asteroids and comets These fragmenting bodies produce anomalously shallow craters with low rims and central peaks three British structures of this type are identified Analysis of fireball statistics implies that damaging fireball explosions occur over the British Isles on a time scale of decades On a time scale of millennia however more damage is done by Atlantic impact tsunami

Magicians of the Gods Graham Hancock, 2015-11-10 Graham Hancock s multi million bestseller Fingerprints of the Gods remains an astonishing deeply controversial wide ranging investigation of the mysteries of our past and the evidence for Earth s lost civilization Twenty years on Hancock returns with the sequel to his seminal work filled with completely new scientific and archaeological evidence which has only recently come to light Near the end of the last Ice Age 12 800 years ago a giant comet that had entered the solar system from deep space thousands of years earlier broke into multiple fragments Some of these struck the Earth causing a global cataclysm on a scale unseen since the extinction of the dinosaurs At least eight of the fragments hit the North American ice cap while further fragments hit the northern European ice cap The impacts from comet fragments a mile wide approaching at more than 60 000 miles an hour generated huge amounts of heat which instantly liquidized millions of square kilometers of ice destabilizing the Earth s crust and causing the global Deluge that is remembered in myths all around the world A second series of impacts equally devastating causing further cataclysmic flooding occurred 11 600 years ago the exact date that Plato gives for the destruction and submergence of Atlantis The evidence revealed in this book shows beyond reasonable doubt that an advanced civilization that flourished during the Ice Age was destroyed in the global cataclysms between 12 800 and 11 600 years ago But there were survivors known to later cultures by names such as the

Sages the Magicians the Shining Ones and the Mystery Teachers of Heaven They travelled the world in their great ships doing all in their power to keep the spark of civilization burning They settled at key locations Gobekli Tepe in Turkey Baalbek in the Lebanon Giza in Egypt ancient Sumer Mexico Peru and across the Pacific where a huge pyramid has recently been discovered in Indonesia Everywhere they went these Magicians of the Gods brought with them the memory of a time when mankind had fallen out of harmony with the universe and paid a heavy price A memory and a warning to the future For the comet that wrought such destruction between 12 800 and 11 600 years may not be done with us yet Astronomers believe that a 20 mile wide dark fragment of the original giant comet remains hidden within its debris stream and threatens the Earth An astronomical message encoded at Gobekli Tepe and in the Sphinx and the pyramids of Egypt warns that the Great Return will occur in our time

Secrets of Esoteric Christianity Gilbert Childs, 2005 For years theologians have agonized over the contradictory accounts of Jesus birth as written in the Gospels of Luke and Matthew Can they be reconciled given the fact that they contain completely different narratives Demonstrating a remarkably erudite approach and authoritative knowledge of biblical sources and other primary texts Dr Childs sheds new light on arcane disputes by revealing secrets of esoteric Christianity in particular the mystery of two mothers named Mary and the different families of Jesus Such mysteries including the meaning of the virgin conception have remained hidden and protected in mystery centers by initiates throughout the past two millennia Today however these matters can be discussed openly The book begins with a thorough examination of Adoptionism as a doctrine the notion that Jesus was adopted as the Son of God after his birth Did Christ incarnate in Jesus at the Jordan River Baptism as many Biblical authorities assert Gilbert Childs provides an overview of the Gospels and introduces the seminal research of Rudolf Steiner as a key to resolving some of their enigmas The book also looks into the relevance of the ancient mystery centers in relation to Christianity and discusses how Christianity itself can be seen as a mystery

The Oxford Handbook of Millennialism Catherine Wessinger, 2016-07 Seventh Day Adventists Melanesian cargo cults David Koresh s Branch Davidians and the Raelian UFO religion would seem to have little in common What these groups share however is a millennial orientation the audacious human hope for a collective salvation which may be either heavenly or earthly The Oxford Handbook of Millennialism offers readers an in depth look at both the theoretical underpinnings of the study of millennialism and its many manifestations across history and cultures

Dead Cities Mike Davis, 2024-10-01 For the late great Mike Davis the ravaging of the climate by capital and his prescient analysis of its consequences for those of us left to deal with the resulting crises was always a central part of his urban geography In these wide ranging incisive and hauntingly relevant essays Davis asks us to consider what we would find if we put a microscope to the ruins of Metropolis and provides a riveting account of the disasters natural man made and those as in the case of climate calamity where the distinction is impossible to make that he finds on the other end He begins his examination by sifting through the rubble of the twin towers in the wake of 9 11 presciently identifying the seeds of war already germinating in the

scorched soil of ground zero and closes by considering how little prepared our hollowed out urban infrastructure is to deal with shocks of any kind be they from car bombs or ice storms In between we are treated to tours of blasted wastelands where American generals built and destroyed replicas of Berlin glimpses of Las Vegas s penchant for annihilating its own best known landmarks and other riveting tales of the dialectic between nature and the city Dead Cities written over twenty years ago abounds with prophecies fulfilled contains echoes of our current moment where conspiracies abound and anxieties drown out official celebrations of prosperity and offers dreams of alternative paths not taken *The Gabriel Chronicles* Dennis Flannery,2022-10-17 In the middle of the twenty first century an exceptional group of men and women set out to colonize another planet which would come to be known as the planet Gabriel Meanwhile those who were left behind create SLFs synthetic life forms designed to aid humanity Then in the twenty fifth century the earth is destroyed by a massive asteroid with a small group of humans and SLFs just barely escaping Now they and the colonists of Gabriel are all that remain of the human race The Gabriel Chronicles the last volume of a trilogy tells the story of the extraordinary lives and adventures of the men and women living in this new world It tells of the birth of two infants who were extraordinary in appearance and abilities and who may represent the next step in human evolution As humanity works to establish itself on Gabriel the colonists experience miracles natural disasters and the new planet s first murder They also encounter an ancient race of alien beings whose intelligence and technology are far beyond those anything they could imagine Now only time will reveal humankind s new place among the races of the galaxy In this science fiction novel the third in a series following the destruction of Earth human colonists work to establish themselves on a distant planet among alien beings Controversy Catastrophism and Evolution Trevor Palmer,2012-12-06 In Controversy Trevor Palmer fully documents how traditional gradualistic views of biological and geographic evolution are giving way to a catastrophism that credits cataclysmic events such as meteorite impacts for the rapid bursts and abrupt transitions observed in the fossil record According to the catastrophists new species do not evolve gradually they proliferate following sudden mass extinctions Placing this major change of perspective within the context of a range of ancient debates Palmer discusses such topics as the history of the solar system present day extraterrestrial threats to earth hominid evolution and the fossil record **Perilous Planet Earth** Trevor Palmer,2003-06-12 A readable account of the history of natural disasters throughout history *On the Origin of Myths in Catastrophic Experience, vol. 1: Preliminaries* Marinus Anthony van der Sluijs,2019-01-01 Creation myths around the world reveal an intricate network of recurrent motifs Many of these are counterintuitive and not widely known describing a time when the sky was low the stars did not yet shine multiple suns appeared the moon was brighter than the sun no land existed deities and mortals maintained frequent contact a world axis in the form of a tree ladder or giant man connected the earth with the sky a devastating flood or fire ended the old order and so forth The present work in multiple volumes aims to find an origin for this cross culturally and internally consistent body of traditions in a series of extraordinary natural events

relating especially to the earth's transition from the last glacial period to the Holocene. This first volume sets the stage for the interdisciplinary hypothesis. Essential lines of research receive a historical introduction: comparative mythology, catastrophism, and the study of the mythical world axis in relation to the earth's rotation. Various astronomical and meteorological interpretations that are not strictly catastrophist are explored for several types of myths about the sun, the moon, and the world axis, but leave many of the most intriguing traditions unexplained. It is argued that a structural core of the worldwide mythology of creation and destruction, in which the cosmic axis takes pride of place, points to a specific period of dramatic natural circumstances in real prehistoric time. A new synopsis is provided of this universal mythological substrate. It emerges that the mythical world axis cannot have been based on a single object seen or imagined at one of the poles, as has usually been supposed. This surprising conclusion paves the way for the innovative geomagnetic theory proposed in volume 2.
