**The Culture Facade** Susan M. Rigdon, Oscar Lewis, 1988      Maximum Feasible Participation Stephen Schryer, 2018-06-05 This book traces American writers contributions and responses to the War on Poverty Its title comes from the 1964 Opportunity Act which established a network of federally funded Community Action Agencies that encouraged maximum feasible participation by the poor With this phrase the Johnson administration provided its imprimatur for an emerging model of professionalism that sought to eradicate boundaries between professionals and their clients a model that appealed to writers especially African Americans and Chicanos as associated with the cultural nationalisms gaining traction in the inner cities These writers privileged artistic process over product rejecting conventions that separated writers from their audiences Participatory professionalism however drew on a social scientific conception of poverty that proved to be the paradigm s undoing the culture of poverty thesis popularized by Oscar Lewis Michael Harrington and Daniel Moynihan For writers and policy experts associated with the War on Poverty this thesis described the cultural gap that they hoped to close Instead it eventually led to the dismantling of the welfare state Ranging from the 1950s to the present the book explores how writers like Jack Kerouac Amiri Baraka Gwendolyn Brooks Oscar Zeta Acosta Alice Walker Philip Roth and others exposed the War on Poverty s contradictions during its heyday and kept its legacy alive in the decades that followed      **No Boundaries** Lillian Hoddeson, 2004 Like any great university the University of Illinois owes its prominence to the excellence of its faculty In Lillian Hoddeson s No Boundaries twenty three scholars provide easily accessible vignettes about University of Illinois faculty who have made major contributions to their fields to knowledge and to the world Here are many of the most inspiring and often most amusing people whose work elevated the University of Illinois into a world leader in a variety of areas Their lives demonstrate again and again that the work of the University takes place as much away from campus as on it Oscar Lewis s pioneering studies of poverty in Mexico for example Ralph Grim s geological work in Africa and Nathan Newmark s architectural work in Mexico City Here also are insights into the remarkable careers of classicist William Oldfather chemist Roger Adams the amazing double Nobel Prize winning physicist John Bardeen and accounts of Katharine Sharp s work that made the University of Illinois Library into a national treasure Also included are the legendary contributions of the University of Illinois to computer science biochemistry history literary study and electronic music      *Revolution and Ideology* John A. Britton, 2021-09-15 Mexico and the United States share a border of more than 2 000 miles and their histories and interests have often intertwined The Mexican Revolution which began in 1910 and continued in one form or another for the next thirty years was keenly observed by U S citizens especially those directly involved in Mexico through property ownership investment missionary work tourism journalism and education It differed from many other revolutions in this century in that Marxist Leninist theory was only one of many radical and reformist influences Historian John A Britton examines contemporary accounts written by Americans commenting on social upheaval south of the border radical writers John Reed

Anita Brenner and Carlton Beals novelists Katherine Anne Porter and D H Lawrence social critics Stuart Chase and Waldo Frank and banker diplomat Dwight Morrow to mention a few Their writings constitute a valuable body of information and opinion concerning a revolution that offers important parallels with liberation movements throughout the world today Britton's sources also shed light on the many contradictions and complexities inherent in the relationship between the United States and Mexico

**Exotics at Home** Micaela di Leonardo, 2000-03-16 What is the exotic after all In this study Micaela di Leonardo reveals the face of power within the mask of cultural difference Focusing on the intimate and shifting relations between popular portrayals of exotic Others and the practice of anthropology that profession assumed to be America's Guardian of the Offbeat she casts new light on gender race and the public sphere in America's past and present Chicago's 1893 Columbian World Exposition and today's college town ethnic boutiques frame di Leonardo's century long analysis

Robert Redfield and the Development of American Anthropology Clifford Wilcox, 2006-01-01 Relying upon close readings of virtually all of his published and unpublished writings as well as extensive interviews with former colleagues and students Robert Redfield and the Development of American Anthropology traces the development of Robert Redfield's ideas regarding social change and the role of social science in American society Clifford Wilcox's exploration of Redfield's pioneering efforts to develop an empirically based model of the transformation of village societies into towns and cities is intended to recapture the questions that drove early development of modernization theory Reconsideration of these debates will enrich contemporary thinking regarding the history of American anthropology and international development

People, Plans, and Policies Herbert J. Gans, 1994-06-16 The primary theme of this collection of essays is that the cities basic problems are poverty and racism and until these concerns are addressed by bringing about racial equality creating jobs and instituting other reforms the generally low quality of urban life will persist Gans argues that the individual must work to alter society He believes that not only must parents have jobs to improve their children's school performance but that the country needs a modernized New Deal a more labor intensive economy and a thirty two hour work week to achieve full employment Other controversial ideas presented in this book include Gans's opposition to the whole notion of an underclass which he feels is the latest way for the nonpoor to unjustly label the poor as undeserving He also believes that poverty continues to plague society because it is often useful to the nonpoor He is critical of architecture that aims above all to be aesthetic or to make philosophical statements is doubtful that planners can or should try to reform our social or personal lives and thinks we should concentrate on achieving individual public policies until we learn how to properly plan as a society

**The Poverty of the World** Sheyda F. A. Jahanbani, 2023 Bringing together foreign and domestic policy The Poverty of the World aims to offer a new answer to the question of why Americans became obsessed with poverty in the 1960s A history of how American liberals made sense of US power during a period of unprecedented affluence at home it uses intellectual and political biographies of major figures in postwar US social thought and politics to tell the story of how Americans invented the

problem of global poverty and executed a war against it

### **Poverty, Family, and Kinship in a Heartland Community**

David L. Harvey, 2017-07-12 With a few notable exceptions sociological studies of poor native born non ethnic whites in rural areas are rare This book corrects this oversight with an ethnographic study of a small poor white heartland community that the author calls Potter Addition The community consists of some 100 families and is located on the rural urban fringe of a medium sized Midwestern city Poverty Family and Kinship in a Heartland Community is the story of three generations of rural families who one after another have been driven from the land during the last seventy five years Harvey argues against the grain of a number of recent studies that Potter Addition s poverty like much modern poverty has its origins in the productive contradictions of late capitalism It is not the result of some moral or motivational defect of the poor themselves At the same time he shows even as they struggle to survive their uncertain niche and learn how to adapt these families play an active role in reproducing the everyday material and cultural details of their poverty from the substance of their daily experiences Working from this premise Harvey provides a detailed ethnographic description of Potter Addition and its people The volume focuses especially on the family and kinship structures that have developed in Potter Addition and shows how they fit into the overall response of the poor to their uncertain and unpredictable class situation This is a unique effort by a knowledgeable researcher who in this work boldly steps outside conventional realms of discourse in sociology and geography

*Potter Addition* David L. Harvey, 1993-01-01 With a few notable exceptions studies of poor native born non ethnic whites are rare in the sociological literature This book attempts to correct the oversight by presenting ethnography of an actual small poor white heartland community that the author calls Potter Addition The community consists of some 100 families and is located on the rural urban fringe of a medium sized Midwestern city Poverty Family and Kinship in a Heartland Community is the story of three generations of rural families who one after another have been driven from the land during the last seventy five years Harvey argues against the grain of a number of recent studies that Potter Addition s poverty like much of modern poverty has its origins in the productive contradictions of late capitalism and thus is not the result of some moral or motivational defect of the poor themselves At the same time he argues that the families he studies even as they struggle to survive their uncertain niche and learn how to adapt play an active role in reproducing the everyday material and cultural details of their poverty from the substance of their daily experiences Working from this premise Harvey s work provides a detailed ethnographic description of Potter Addition and its people The volume focuses especially on the family and kinship structures that have developed in Potter Addition and shows the logic and rationality of such arrangements by revealing how they fit into the overall response of the poor to their uncertain and unpredictable class situation This is a unique effort by an outstanding researcher

*Anthropology and Politics* Joan Vincent, 2022-08-16 In considering how anthropologists have chosen to look at and write about politics Joan Vincent contends that the anthropological study of politics is itself a historical process Intended not only as a representation but also as a reinterpretation her study arises from questioning accepted views

and unexamined assumptions This wide ranging cross disciplinary work is a critical review of the anthropological study of politics in the English speaking world from 1879 to the present a counterpoint of text and context that describes for each of three eras both what anthropologists have said about politics and the national and international events that have shaped their interests and concerns It is also an account of how intellectual social and political conditions influenced the discipline by conditioning both anthropological inquiry and the avenues of research supported by universities and governments Finally it is a study of the politics of anthropology itself examining the survival of theses or schools of thought and the influence of certain individuals and departments

**The Anthropological Imagination in Latin American Literature** Amy Fass Emery,1996 Emery develops the concept of an anthropological imagination that is the conjunction of anthropology and fiction in twentieth century Latin American literature Emery also gives consideration to documentary and testimonial writings

*World Poverty* Marie V. Lane,2002 *World Poverty A Bibliography With Indexes* Romantic Motives George W. Stocking,1989-12-12 *Romantic Motives* explores a topic that has been underemphasized in the historiography of anthropology Tracking the Romantic strains in the the writings of Rousseau Herder Cushing Sapir Benedict Redfield Mead L. vi Strauss and others these essays show Romanticism as a permanent and recurrent tendency within the anthropological tradition

The Enormous Vogue of Things Mexican Helen Delpar,1995-12-30 *The Enormous Vogue of Things Mexican* traces the evolution of cultural relations between the United States and Mexico from 1920 to 1935 **A Social History of Anthropology in the United States** Thomas C. Patterson,2020-05-12 In part due to the recent Yanomami controversy which has rocked anthropology to its very core there is renewed interest in the discipline s history and intellectual roots especially amongst anthropologists themselves The cutting edge of anthropological research today is a product of earlier questions and answers previous ambitions preoccupations and adventures stretching back one hundred years or more This book is the first comprehensive history of American anthropology Crucially Patterson relates the development of anthropology in the United States to wider historical currents in society American anthropologists over the years have worked through shifting social and economic conditions changes in institutional organization developing class structures world politics and conflicts both at home and abroad How has anthropology been linked to colonial commercial and territorial expansion in the States How have the changing forms of race power ethnic identity and politics shaped the questions anthropologists ask both past and present Anthropology as a discipline has always developed in a close relationship with other social sciences but this relationship has rarely been scrutinized This book details and explains the complex interplay of forces and conditions that have made anthropology in America what it is today Furthermore it explores how anthropologists themselves have contributed and propagated powerful images and ideas about the different cultures and societies that make up our world This book will be essential reading for anyone interested in understanding the roots and reasons behind American anthropology at the turn of the twenty first century Intellectual historians social scientists and anyone intrigued by

the growth and development of institutional politics and practices should read this book      **Becoming Mexican American**  
George J. Sanchez, 1995-03-23 By focusing on Mexican immigrants to Los Angeles from 1900 to 1945 George J Sanchez sheds light on the process by which temporary sojourners evolved into permanent residents laying the foundation for a new Mexican American culture Analyzing not only government programs aimed at these newcomers but also the world created by these immigrants through family networks religious practice musical entertainment and work and consumption patterns Sanchez uncovers the creative ways Mexicans adapted their culture to life in the United States This award winning study is among the first to examine this process in depth      **The Experts' War on Poverty** Romain D. Huret, 2018-10-15 In the critically acclaimed *La Fin de la Pauvert* Romain D Huret identifies a network of experts who were dedicated to the post World War II battle against poverty in the United States John Angell s translation of Huret s work brings to light for an English speaking audience this critical set of intellectuals working in federal government academic institutions and think tanks Their efforts to create a policy bureaucracy to support federal socio economic action spanned from the last days of the New Deal to the late 1960s when President Richard M Nixon implemented the Family Assistance Plan Often toiling in obscurity this cadre of experts waged their own war not only on poverty but on the American political establishment Their policy recommendations as Huret clearly shows often militated against the unscientific prejudices and electoral calculations that ruled Washington D C politics *The Experts War on Poverty* highlights the metrics research and economic and social facts these social scientists employed in their work and thereby reveals the unstable institutional foundation of successive executive efforts to grapple with gross social and economic disparities in the United States Huret argues that this internal war coming at a time of great disruption due to the Cold War undermined and fractured the institutional system officially directed at ending poverty The official War on Poverty which arguably reached its peak under President Lyndon B Johnson was thus fomented and maintained by a group of experts determined to fight poverty in radical ways that outstripped both the operational capacity of the federal government and the political will of a succession of presidents      Exotic No More  
Jeremy MacClancy, 2010-04-08 Since its founding in the nineteenth century social anthropology has been seen as the study of exotic peoples in faraway places But today more and more anthropologists are dedicating themselves not just to observing but to understanding and helping solve social problems wherever they occur in international aid organizations British TV studios American hospitals or racist enclaves in Eastern Europe for example In *Exotic No More* an initiative of the Royal Anthropological Institute some of today s most respected anthropologists demonstrate in clear unpretentious prose the tremendous contributions that anthropology can make to contemporary society They cover issues ranging from fundamentalism to forced migration child labor to crack dealing human rights to hunger ethnicity to environmentalism intellectual property rights to international capitalisms But *Exotic No More* is more than a litany of gloom and doom the essays also explore topics usually associated with leisure or high culture including the media visual arts tourism and music

Each author uses specific examples from their fieldwork to illustrate their discussions and 62 photographs enliven the text. Throughout the book the contributors highlight anthropology's commitment to taking people seriously on their own terms, paying close attention to what they are saying and doing and trying to understand how they see the world and why. Sometimes this bottom-up perspective makes the strange familiar but it can also make the familiar strange, exposing the cultural basis of seemingly natural behaviors and challenging us to rethink some of our most cherished ideas about gender, free markets, race, and refugees among many others.

**The Ethnographer's Magic and Other Essays in the History of Anthropology** George W. Stocking, 1992. George Stocking has been widely recognized as the premier historian of anthropology ever since the publication of his first volume of essays, *Race, Culture, and Evolution* in 1968. As editor of several publications including the highly acclaimed *History of Anthropology* series, he has led the movement to establish the history of anthropology as a recognized research specialization. In addition to the study of Victorian Anthropology, his work includes numerous essays covering a wide range of anthropological topics. The eight essays collected in *The Ethnographer's Magic* consider the emergence of anthropology since the late nineteenth century as an academic discipline grounded in systematic fieldwork. Drawing extensively on unpublished manuscript materials, the essays focus primarily on Franz Boas and Bronislaw Malinowski, the leading figures in the American and the British academic fieldwork traditions. According to George Marcus of Rice University, the essays represent the most informative and insightful writings on Malinowski and Boas and their legacies that are yet available. Beyond their biographical material, the essays here touch upon major themes in the history of anthropology: its powerfully mythic aspect and persistent strain of romantic primitivism; the contradictions of its relationship to the larger sociopolitical sphere; its problematic integration of a variety of natural scientific and humanistic inquiries; and the tension between its scientific aspirations and its subjectively acquired data. To provide an overview against which to read the other essays, Stocking has also included a sketch of the history of anthropology from the ancient Greeks to the present. For this collection, Stocking has written prefatory commentaries for each of the essays as well as two more extended contextualizing pieces. An introductory essay, *Retrospective/Prescriptive Reflections*, places the volume in autobiographical and historiographical context; the *Afterword/Postscriptive/Prospective Reflections* reconsiders major themes of the essays in relation to the recent past and present situation of academic anthropology.
