

The Binding

**William John PHILLPOTTS (Archdeacon
of Cornwall.)**

The Binding:

The Binding Vine Shashi Deshpande, 2002-09-01 There can be no vaulting over time thinks Urmila the narrator of Shashi Deshpande's profound and soul stirring novel We have to walk every step of the way however difficult or painful it is we can avoid nothing After the death of her baby Urmila finds her own path difficult to endure But through her grief she is drawn into the lives of two very different women one her long dead mother in law a thwarted writer the other a young woman who lies unconscious in a hospital bed And it is through these quiet unexpected connections that Urmila begins her journey toward healing The miracle of *The Binding Vine* and of Shashi Deshpande's deeply compassionate vision is that out of this web of loss and despair emerge strands of life and hope a binding vine of love concern and connection that spreads across chasms of time social class and even death In moving and exquisitely understated prose Deshpande renders visible the extraordinary endurance and grace concealed in women's everyday lives

The Binding of Isaac in Art of Late Antiquity Bonnie L. Kutbay, 2024-12-20 From the third through the sixth centuries the binding of Isaac saw a flourish of representation in Christian Byzantine and Jewish art These images engaged the viewer in a religious experience that highlighted sacrifice salvation and liturgy and reflected an increased visual richness of sacrificial and liturgical concepts In contrast to earlier scholarship on the sacrifice of Isaac that offered general descriptions of the period and digressions on isolated images this book presents the interpretation of specific works depicting the binding of Isaac by his father Abraham across time examining the iconography style social context and purpose of the sacrifice in the artworks

Unlocking the Brain: Volume 2: Consciousness Georg Northoff, 2013-11-11 Neuroscience has made considerable progress in figuring out

how the brain works We know much about the molecular genetic and biochemical underpinnings of sensory and motor functions Recent neuroimaging work has opened the door to investigating the neural underpinnings of higher order cognitive functions such as memory attention and even free will In these types of investigations researchers apply specific stimuli to induce neural activity in the brain and look for the function in question However there may be more to the brain and its neuronal states than the changes in activity we induce by applying particular external stimuli In Volume 2 of *Unlocking the Brain* Georg Northoff addresses consciousness by hypothesizing about the relationship between particular neuronal mechanisms and the various phenomenal features of consciousness Northoff puts consciousness in the context of the resting state of the brain thereby delivering a new point of view to the debate that permits very interesting insights into the nature of consciousness Moreover he describes and discusses detailed findings from different branches of neuroscience including single cell data animal data human imaging data and psychiatric findings This yields a unique and novel picture of the brain and will have a major and lasting impact on neuroscientists working in neuroscience psychiatry and related fields
