The Control Of The Sea Bed An Updated Report:

The Control of the Sea-bed Evan Luard,1977 **Negotiating the Law of the Sea** James K. Sebenius,1984 The Law of the Sea LOS treaty resulted from some of the most complicated multilateral negotiations ever conducted Difficult bargaining produced a remarkably sophisticated agreement on the financial aspects of deep ocean mining and on the financing of a new international mining entity This book analyzes those negotiations along with the abrupt U S rejection of their results Building from this episode it derives important and subtle general rules and propositions for reaching superior sustainable agreements in complex bargaining situations James Sebenius shows how agreements were possible among the parties because and not in spite of differences in their values expectations and attitudes toward time and risk He shows how linking separately intractable issues can generate a zone of possible agreement He analyzes the extensive role of a computer model in the LOS talks Finally he argues that in many negotiations neither the issues nor the parties are fixed and develops analytic techniques that predict how the addition or deletion of either issues or parties may affect the process of reaching agreement **Hearings, Reports and Prints of the Senate Committee on Foreign Relations** United States.
