The Principle of Analogy in Protestant and Catholic Theology Battista Mondin,2012-12-06 In recent years there has been a remarkable revival of interest in the doctrine of analogy and many important studies on this doctrine have appeared in the form of articles and books Today many of the greatest living philosophers and theologians consider some sort of analogy to be an indispensable tool for any fruitful research in metaphysics and theology In this atmosphere we are sure that a study of the history of the principle of analogy in Protestant and Catholic theology is welcome This is one of the reasons for the present undertaking A second reason for this study is to seek to divert the ecumenical dialogue from secondary questions and to direct it to an area where it is necessary to agree in order to be one The title of our work is somewhat misleading it may lead one to believe that it deals with all Catholic and Protestant theologians of past and present Actually it does not It deals only with some of the major figures of Catholic and Protestant theology It concentrates especially on Aquinas analogy of intrinsic attribution on Barth s analogy of faith and on Tillich s symbolic analogy It attempts to compare and evaluate these three theological methods from the standpoint of determining their adequacy to interpret the God creature relation and to justify the use of theological language God, Man and World Marek Jagodziński,2025-03-10 God created the world out of love and for love Creation especially created man is an image of the Holy Trinity Trinitarian theology shows communal

Why Does God Seem So Hidden? Joshua C. Waltman,2023-04-06 Why does God seem so hidden obscure and silent Why doesn t he make himself known in a more explicit way to those who dispute his existence This line of questioning presents a perplexing conundrum for Christian theologians On the one hand Christians affirm that God s revelation of himself is sufficient but on the other hand it appears that some genuine seekers remain unconvinced of his existence In recent decades philosopher J L Schellenberg has proposed an argument for atheism that attempts to exploit this apparent contradiction This book offers a new take by approaching the conversation using a Trinitarian theological lens The character of Trinitarian love shapes the way God communicates in pursuit of relationships Namely God desires spiritually oriented communal divine human relationships and this endeavor necessarily entails hiddenness This work proposes five spiritual criteria that an individual must meet to be open to having a relationship with the triune God and these are the criteria that atheists have failed to consider Articulating these five is exactly what is needed to resolve the vexing theological puzzle of divine hiddenness

especially historic Christian and Jewish theologies of relationality to construct a new framework for addressing present economic and political ills
