Bucke, 2007-12-01 Wildly arrogant stunningly bombastic and undeniably fascinating This 1901 work the masterpiece of an eclectic genius whose life encompassed medical science mystical transcendence and prospecting for gold posits a higher form of sentience that only a few humans have ever achieved among them Jesus Buddha Mohammed Dante William Blake and the author himself of course As Bucke shares his metaphysical experience of the cosmic consciousness and offers evidence for the few instances in history of its occurrence it may as well be frankly stated at once that the view of the present editor is that Francis Bacon wrote the Shakespeare plays and poems the reader may well be moved to throw this bizarre and highly intriguing book furiously across the room if the reader can put it down at all that is Canadian mystic and doctor RICHARD MAURICE BUCKE 1837 1902 was a pioneer in the medical treatment of mental illness his famous friendship with Walt Whitman was the subject of the 1992 movie Beautiful Dreamers He also wrote Man s Moral Nature 1879 and an 1883 authorized biography of Whitman

Cosmic Consciousness Richard Maurice Bucke, 1923 *Cosmic Consciousness* Richard Maurice Bucke, 2007-04 What is Cosmic Consciousness The present volume is an attempt to answer this question but notwithstanding it seems well to make a short prefatory statement in as plain language as possible so as to open the door as it were for the more elaborate exposition to be attempted in the body of the work Cosmic Consciousness then is a higher form of consciousness than that possessed by the ordinary man *Cosmic Consciousness* Richard Maurice Bucke, 2011-01-27 This work published in 1901 is the culmination of a lifetime of research and contemplation in which Richard Maurice Bucke 1837 1902 expounds his theory of the development and evolution of consciousness in living things He uses his own experiences those of contemporaries such as Tennyson and of historical figures such as Francis Bacon as evidence for moments of higher consciousness and intellect known as cosmic consciousness Bucke s theory is of three states of progressive consciousness attained through evolution The Simple Consciousness of animals Self Consciousness of man to understand his place in the universe and Cosmic Consciousness where man might grow to understand the life and order of the cosmos This pinnacle of understanding is a progression assisted by evolution that Bucke hopes will one day come to all men A thought provoking book at any time full of optimism for the intellectual future of the human race Cosmic Consciousness Richard Maurice Bucke, 1923 **Cosmic**

Consciousness Richard Maurice Bucke, 1923 This work is the magnum opus of Bucke's career a project that he researched and wrote over many years In it Bucke described his own experience that of contemporaries most notably Whitman but also unknown figures like C P and the experiences and outlook of historical figures including Buddha Jesus Paul Plotinus Muhammad Dante Francis Bacon and William Blake Bucke developed a theory involving three stages in the development of consciousness the simple consciousness of animals the self consciousness of the mass of humanity encompassing reason imagination etc and cosmic consciousness an emerging faculty and the next stage of human development Among the effects of this progression he believed he detected a lengthy historical trend in which religious conceptions and theologies had become less and less fearful A classic work *Cosmic Consciousness: A Study in the Evolution of the Human Mind* Richard Maurice Bucke, 1948-01-01 WHAT is Cosmic Consciousness The present volume is an attempt to answer this question but notwithstanding it seems well to make a short prefatory statement in as plain language as possible so as to open the door as it were for the more elaborate exposition to be attempted in the body of the work Cosmic Consciousness then is a higher form of consciousness than that possessed by the ordinary man This last is called Self Consciousness and is that faculty upon which rests all of our life both subjective and objective which is not common to us and the higher animals except that small part of it which is derived from the few individuals who have had the higher consciousness above named To make the matter clear it must be understood that there are three forms or grades of consciousness 1 Simple Consciousness which is possessed by say the upper half of the animal kingdom By means of this faculty a dog or a horse is just as conscious of the things about him as a man is he is also conscious of his own limbs and body and he knows that these are a part of himself 2 Over and above this Simple Consciousness which is possessed by man as by animals man has another which is called Self Consciousness By virtue of this faculty man is not only conscious of trees rocks waters his own limbs and body but he becomes conscious of himself as a distinct entity apart from all the rest of the universe It is as good as certain that no animal can realize himself in that way Further by means of self consciousness man who knows as the animal knows becomes capable of treating his own mental states as objects of consciousness The animal is as it were immersed in his consciousness as a fish in the sea he cannot even in imagination get outside of it or one moment so as to realize it But man by virtue of self consciousness can step aside as it were from himself and think Yes that thought that I had about that matter is true I know it is true and I know that I know it is true The writer has been asked How do you know that animals cannot think in the same manner The answer is simple and conclusive it is There is no evidence that any animal can so think but if they could we should soon know it Between two creatures living together as dogs or horses and men and each self conscious it would be the simplest matter in the world to open up communication Even as it is diverse as is our psychology we do by watching his acts enter into the dog's mind pretty freely we see what is going on there we know that the dog sees and hears smells and tastes we know that he has intelligence adapts means to ends that he reasons If he was self conscious we must have learned it long

ago We have not learned it and it is as good as certain that no dog horse elephant or ape ever was self conscious Another thing on man s self consciousness is built everything in and about us distinctively human Language is the objective of which self consciousness is the subjective Self consciousness and language two in one for they are two halves of the same thing are the sine qua non of human social life of manners of institutions of industries of all kinds of all arts useful and fine If any animal possessed self consciousness it seems certain that it would upon that master faculty build as man has done a superstructure of language of reasoned out customs industries art But no animal has done this therefore we infer that no animal has self consciousness

Cosmic Consciousness M. D. Richard Maurice Bucke, 2011-03 Cosmic Consciousness A Study in the Evolution of the Human Mind is Richard Bucke s theory that our mental states are evolving and that to date we have experienced three stages in the development of consciousness the simple consciousness of animals the self consciousness of the vast majority of humans reason self awareness imagination etc and in some cases cosmic consciousness a mystical state of being beyond self consciousness and the next stage of human development Bucke hypothesized that cosmic consciousness is slowly beginning to appear in humans and will eventually spread widely throughout the human race He posited that certain notable individuals throughout history have demonstrated that they have attained cosmic consciousness In the book he cites examples such as Jesus Buddha Mohammed Dante St Paul Francis Bacon William Blake and his close friend Walt Whitman Whitman an American poet and journalist described cosmic consciousness as ineffable light light rare untellable light beyond all signs descriptions and languages At the age of thirty five Bucke found himself in this elevated mental state and he describes in the third person the manifestations leading up to it 1 The person suddenly without warning has a sense of being immersed in a flame or rose colored cloud or perhaps rather a sense that the mind is itself filled with such a cloud of haze 2 At the same instant he is as it were bathed in an emotion of joy assurance triumph salvation 3 Simultaneously or instantly following the above sense and emotional experiences there comes to the person an intellectual illumination quite impossible to describe Like a flash there is presented to his consciousness a clear conception a vision in outline of the meaning and drift of the universe He does not come to believe merely but he sees and knows that the cosmos which to the self conscious mind seems made up of dead matter is in fact far otherwise is in very truth a living presence He sees that instead of men being as it were patches of life scattered through an infinite sea of non living substance they are in reality specks of relative death in an infinite ocean of life He sees that the life which is in man is eternal as all life is eternal that the soul of man is as immortal as God is that the universe is so built and ordered that without any peradventure all things work together for the good of each and all that the foundation principle of the world is what we call love and that the happiness of every individual is in the long run absolutely certain He goes on to say The person who passes through this experience will learn in the few minutes or even moments of its continuance more than in months or years of study and he will learn much that no study ever taught or can teach After reading Bucke s writings P D Ouspensky the
