The Creation Of Mythology:

Creation Myths Marie-Louise von Franz, 2001-05-01 A leading Jungian scholar analyzes common motifs in creation myths from cultures around the world explaining how they inform the collective unconscious and contribute to our ability to create as human beings Parabola Creation myths are the deepest and most important of all myths because they are concerned with both the basic patterns of existence and the ultimate meaning of life In this book an eminent Jungian analyst examines the recurring motifs that appear in creation myths from around the world and shows what they teach us about the mysteries of creativity the cycles of renewal in human life and the birth of consciousness in the individual psyche Among the topics discussed are Why the creative process is often accompanied by anxiety depression loneliness and fear of the unknown The meaning of creation motifs such as the egg the seed the primordial being the creative fire the separation of heaven and earth and the four stages of creation Creation symbolism in the alchemical opus of medieval tradition How creation myth motifs appear in the dreams of people who are on the verge of a leap forward in consciousness *First Light* G.R.

Evans, 2013-11-19 Did the universe start with a bang or has it existed always Was there a supernatural being behind it all or just mindless forces The beginning of things has forever tested the limits of curiosity and such questions have both challenged atheists and inspired believers Ancient cultures resorted to myth and symbolism to tell vibrant stories about human origins Later civilizations added philosophical and scientific explanations but these are not definitive The nature and meaning of existence the why as much as the how questions are in the end mysterious In this lively and wide ranging book G R Evans explores the world s myriad creation stories against the background of the biggest question there is what are we doing here Discussing Swahili legends that resemble the Book of Genesis Greek tales about the Titans Native American Inca and Mesopotamian mythologies and Vedic creation cycles that begin with a cosmic egg or seed the author surveys polytheist monotheist and dualist ideas about supernatural power Tracing the history of humanity as it has struggled over many millennia to make sense of itself The Creation Myth will attract students of religion history and philosophy and general readers alike *Creation Myths of the World* David A. topographical features seem to survive with greater persistence than any other trait of primitive culture. These beliefs lie at the base of nearly all religions and the myths in which the beliefs are preserved are the foundation of literature. Therefore the preservation and study of origin myths are of much importance in the reconstruction of the history of humanity which is the chief aim of anthropology. The peoples of the Philippines have rich and varied mythology yet little has been explored but which will one day command much attention. Among the Christianized peoples of the plains the myths are preserved chiefly as folk tales but in the mountains their recitation and preservation are a real and living part of the people's daily religious life. Very few of these myths are written the great majority are preserved by oral tradition. Bizarrely this region's Mythology seems connected to various other world mythologies in some cases almost identical. Until recent years it has been believed that all ancient records written in the syllabic alphabets which the Filipinos possessed at the time of the Spanish conquest had been lost.
