## **The Crowd A Study Of The Popular Mind:**

The Crowd Gustave Le Bon, 2017-07-12 Gustav Le Bon's *The Crowd* is not only a classic but one of the best selling scientific books in social psychology and collective behavior ever written. Here Le Bon analyzes the nature of crowds and their role in political movements. He presents crowd behavior as a problem of science and power, a natural phenomenon with practical implications. Originally published in 1895, Le Bon's was the first to expand the scope of inquiry beyond criminal crowds to include all possible kinds of collective phenomena. Its continuing significance is evident even in the Los Angeles riots of 1992 in which Le Bon's theories were cited in testimony. Le Bon emphasizes the various areas of modern life where crowd behavior holds sway, particularly political upheavals. He focuses on electoral campaigns, parliaments, juries, labor agitation, and street demonstrations. At the same time, his treatment of crowds is far from complimentary. He likens crowds to primitive beings, social formations barking back to the evolutionary origins of humankind. Le Bon believed that ideas and images spread through a crowd by means of contagion, an automatic process that produces a state of transitory madness in its victims, extinguishing reason and will. Yet he does more than dwell on the pathologies of crowd life; he also writes of the heroism, the generosity, and the sacrifices of crowds, of the indispensable roles they have played in erecting the pillars of modern civilization. In a new introduction to this edition, Robert Nye presents a broad analytical understanding of the relationship between power and knowledge in crowd theory. He also discusses the historical circumstances and the various personalities who have shaped our understanding of crowds. Nye emphasizes *The Crowd*'s continuing usefulness to cultural historians, psychologists, sociologists, and political scientists. He also places Le Bon in a rich tradition of European social theory.

**The Crowd** Gustave Le Bon, 1896 A work devoted to the study and characteristics of crowds. An endeavor to examine the difficult problem presented by crowds in a purely scientific matter, proceeding with method without being influenced by opinions, theories, and doctrines. With sections devoted to the mind of crowds, opinions and beliefs of crowds, and the classification and description of the different kinds of crowds.

*The Crowd* Gustave Le Bon, 2015-01-01 In *The Crowd*, Le Bon examines the various characteristics of crowd psychology: impulsiveness, irritability, incapacity to reason, the absence of judgment, the critical spirit, the exaggeration of sentiments, and others. He believes that an individual immersed for some length of time in a crowd soon finds himself either in consequence of magnetic influence given out by the crowd or from some other cause of which we are ignorant in a special state which much resembles the state of fascination in which the hypnotized individual finds himself in the hands of the hypnotizer. This Crowd Psychology has been applied to modern investing, product development, and social media development. Gustave Le Bon was a French social psychologist, sociologist, anthropologist, inventor, and amateur physicist. His writings incorporate theories of national traits, herd behavior, and crowd psychology. He is best known for this work, *The Crowd: A Study of the Popular Mind*.

as victory in a war or the spread of a religion that would be beyond simply one person's effort Hitler Mussolini in addition to Freud were familiar with LeBon's work and it is readily apparent that their followers acted very similar to the behavior that LeBon describes

**The Crowd** Gustave Le Bon, 2014-01 In this fascinating book Gustave Le Bon examines the psychology of crowds He posits that crowds have personalities just like individuals and that individuals change when part of a crowd The most careful observations seem to prove that an individual immersed for some length of time in a crowd in action soon finds himself either in consequence of the magnetic influence given out by the crowd or from some other cause of which we are ignorant in a special state which much resembles the state of fascination in which the hypnotized individual finds himself in the hands of the hypnotizer The activity of the brain being paralysed in the case of the hypnotized subject the latter becomes the slave of all the unconscious activities of his spinal cord which the hypnotizer directs at will The conscious personality has entirely vanished will and discernment are lost All feelings and thoughts are bent in the direction determined by the hypnotizer This edition has been completely reset in fresh type
