Chew,2001 In any conflict the players seem to invariably view that conflict through the filter of their own cultural experiences This collection of essays draws on a variety of disciplines to analyze fundamental assumptions about how conflict arises and how it is resolved **Culture and International Conflict Resolution** Tarja Vayrynen,2001-12-07 The book will be of interest to students of conflict and peace studies both advanced undergraduate and postgraduate as well as students of International Relations studying conflict resolution Jacket **Political Psychology** Stanley A Renshon,John Duckitt,2000-08 Military force transforms political institutions branches of government continually battle for power and position leaders rise and leaders fall but the key to the dynamics of these phenomena the psychology of our political leaders and that underlying most political processes remains one of the most understudied aspects of political life New political forces such as the trend toward globalization have resulted in an ever growing need to understand the relationship between psychology culture and politics *Paul Rogers: A Pioneer in Critical Security Analysis and Public Engagement* Paul Rogers,2018-07-30 This book brings together a collection of writings over the past half century from Professor Paul Rogers As a leading peace researcher he has gained an international reputation for the critical independent and rigorous analysis of international security and the underlying causes of global conflict His work on the responses to 9 11 and the continuing failure of the war on terror in particular has shown prescience that has attracted widespread attention Moreover he has coupled his academic analysis with a determination to communicate widely beyond the university environment With many thousands of radio and television interviews hundreds of public lectures and a world wide following for his web publishing this extramural engagement consistently seeks to raise the level of public debate on international security issues Provides a radically different perspective on global security based on 50 years of analysis Uniquely integrates economic environmental and security analysis into a single overview Cogently demonstrates the urgent need to rethink our entire approach to global security **Handbook on Building Cultures of Peace** Joseph de Rivera,2008-11-28 Mediation and negotiation personal transformation non violent struggle in the community and the world these behaviors and their underlying values underpin the United Nations definition of a culture of peace and are crucial to the creation of such a culture The Handbook on Building Cultures of Peace addresses this complex and daunting task by presenting an accessible blueprint for this development Its perspectives are international and interdisciplinary involving the developing as well as the developed world with illustrations of states and citizens using peace based values to create progress on the individual community national and global levels The result is both realistic and

visionary a prescription for a secure future *Hamas and Suicide Terrorism* Rashmi Singh, 2013-01-11 This book analyses the root causes of suicide terrorism at both the elite and rank and file levels of the Hamas and also explains why this tactic has disappeared in the post 2006 period This volume adopts a multi causal multi level approach to analyse the use of suicide bombings by Hamas and its individual operatives in the Israeli Palestinian conflict It uses extensive fieldwork and on the ground interviews in order to delve beneath the surface and understand why and how suicide operations were adopted as a sustained mechanism of engagement within the Israeli Palestinian conflict Three core factors fuelled Hamas s suicide bombing campaigns First Palestinian suicide operations are a complex combination of instrumental and expressive violence adopted by both organisations and individuals to achieve political and or societal survival retaliation and competition In other words suicide bombings not only serve distinct political and strategic goals for both Hamas and its operatives but they also serve to convey a symbolic message to various audiences within Israel the Palestinian territories and around the world Second suicide operations perform a crucial role in the formation and consolidation of Palestinian national identity and are also the latest manifestation of the historically entrenched cultural norm of militant heroic martyrdom Finally Hamas s use of political Islam also facilitates the articulation justification and legitimisation of suicide operations as a modern day jihad against Israel through the means of modern interpretations and fatwas This approach not only facilitates a much needed multifaceted holistic understanding of suicide bombings in this particular region but also yields policy relevant lessons to address extreme political violence in other parts of the world This book will be of much interest to students of Hamas terrorism Middle East politics and security studies **Learning Democracy** Leslie E. Anderson, Lawrence C.

Dodd, 2009-11-15 Historically Nicaragua has been mired in poverty and political conflict yet the country has become a model for the successful emergence of democracy in a developing nation Learning Democracy tells the story of how Nicaragua overcame an authoritarian government and American interventionism by engaging in an electoral revolution that solidified its democratic self governance By analyzing nationwide surveys conducted during the 1990 1996 and 2001 Nicaraguan presidential elections Leslie E Anderson and Lawrence C Dodd provide insight into one of the most unexpected and intriguing recent advancements in third world politics They offer a balanced account of the voting patterns and forward thinking decisions that led Nicaraguans to first support the reformist Sandinista revolutionaries only to replace them with a conservative democratic regime a few years later Addressing issues largely unexamined in Latin American studies Learning Democracy is a unique and probing look at how the country s mass electorate moved beyond revolutionary struggle to establish a more stable democratic government by realizing the vital role of citizens in democratization processes Human Rights and Structural Adjustment M. Rodwan Abouharb, David Cingranelli, 2007-12-13 Structural adjustment has been a central part of the development strategy for the third world Loans made by the World Bank and the IMF have been conditional on developing countries pursuing rapid economic liberalization programmes as it was believed this would

strengthen their economies in the long run M Rodwan Abouharb and David Cingranelli argue that conversely structural adjustment agreements usually cause increased hardship for the poor greater civil conflict and more repression of human rights therefore resulting in a lower rate of economic development Greater exposure to structural adjustment has increased the prevalence of anti government protests riots and rebellion It has led to less respect for economic and social rights physical integrity rights and worker rights but more respect for democratic rights Based on these findings the authors recommend a human rights based approach to economic development

Forming a Global Community Joseph de Rivera, 2022-10-18 To address global problems such as pandemics warming economic inequality mass migration and widespread terrorism Joseph de Rivera argues that we must form a global community A community of eight billion humans is difficult to conceive However it can be imagined and created if we transform our understanding of who humans are and what community entails We can understand who persons are how they are motivated and how a community can be conceived in a way that offers an alternative to individualism and collectivism The mutualism that is proposed provides a moral compass for navigating the challenges that confront us and encourages specific governing structures political economies and rituals that will further the formation of a global community Based on the philosophical analysis of John Macmurray the author s argument relies on an extensive review of the current literature on self personhood emotional motivation social identity forms of community and religious and secular rituals Interdisciplinary in nature it aims to direct philosophy and the social sciences to the challenges of globalism and the creation of a global community

States, Scarcity, and Civil Strife in the Developing World Colin H. Kahl, 2018-06-05 Over the past several decades civil and ethnic wars have undermined prospects for economic and political development destabilized entire regions of the globe and left millions dead States Scarcity and Civil Strife in the Developing World argues that demographic and environmental stress the interactions among rapid population growth environmental degradation inequality and emerging scarcities of vital natural resources represents one important source of turmoil in today s world Kahl contends that this type of stress places enormous strains on both societies and governments in poor countries increasing their vulnerability to armed conflict He identifies two pathways whereby this process unfolds state failure and state exploitation State failure conflicts occur when population growth environmental degradation and resource inequality weaken the capacity legitimacy and

cohesion of governments thereby expanding the opportunities and incentives for rebellion and intergroup violence State exploitation conflicts in contrast occur when political leaders themselves capitalize on the opportunities arising from population pressures natural resource scarcities and related social grievances to instigate violence that serves their parochial interests Drawing on a wide array of social science theory this book argues that demographically and environmentally induced conflicts are most likely to occur in countries that are deeply split along ethnic religious regional or class lines and which have highly exclusive and discriminatory political systems The empirical portion of the book evaluates the theoretical argument through in depth case studies of civil strife in the Philippines Kenya and numerous other countries The book concludes with an analysis of the challenges demographic and environmental change will pose to international security in the decades ahead
