

A STRANGE LOOP

Strange Loop

Mike Hockney

Strange Loop:

I Am a Strange Loop Douglas R Hofstadter, 2007-08-01 One of our greatest philosophers and scientists of the mind asks where does the self come from and how our selves can exist in the minds of others Can thought arise out of matter Can self soul consciousness I arise out of mere matter If it cannot then how can you or I be here I Am a Strange Loop argues that the key to understanding selves and consciousness is the strange loop a special kind of abstract feedback loop inhabiting our brains The most central and complex symbol in your brain is the one called I The I is the nexus in our brain one of many symbols seeming to have free will and to have gained the paradoxical ability to push particles around rather than the reverse How can a mysterious abstraction be real or is our I merely a convenient fiction Does an I exert genuine power over the particles in our brain or is it helplessly pushed around by the laws of physics These are the mysteries tackled in I Am a Strange Loop Douglas Hofstadter's first book length journey into philosophy since G del Escher Bach Compulsively readable and endlessly thought provoking this is a moving and profound inquiry into the nature of mind *The Strange Loops of Translation* Douglas Robinson, 2021-12-16 One of the most exciting theories to emerge from cognitive science research over the past few decades has been Douglas Hofstadter's notion of strange loops from G del Escher Bach 1979 Hofstadter is also an active literary translator who has written about translation perhaps most notably in his 1997 book *Le Ton Beau de Marot* where he draws on his cognitive science research And yet he has never considered the possibility that translation might itself be a strange loop In this book Douglas Robinson puts Hofstadter's strange loops theory into dialogue with a series of definitive theories of translation in the process showing just how cognitively and affectively complex an activity translation actually is

Postcomposition Sidney I Dobrin, 2011-06-02 Leading a burgeoning self critical moment in composition studies and writing program administration Postcomposition is a fundamental reconsideration of the field that attempts to shift the focus away from pedagogy and writing subjects and toward writing itself In this forceful and reasoned critique of many of the primary tenets and widely accepted institutional structures of composition studies Sidney I Dobrin delivers a series of shocks to the system meant to disrupt the pedagogical imperative and move beyond the existing limits of the discipline Dobrin evaluates the current state of composition studies underscoring the difference between composition and writing and arguing that the field's focus on the administration of writing students and its historically imposed prohibition on theory greatly limit what can be understood about writing Instead he envisions a more significant approach to writing one that questions the field's conservative allegiance to subject and administration and reconsiders writing as spatial and ecological Using concepts from ecocomposition spatial theory network theory complexity theory and systems theory Postcomposition lays the groundwork for a networked theory of writing and advocates the abandonment of administration as a useful part of the field He also challenges the usefulness of rhetoric in writing studies showing how writing exceeds rhetoric Postcomposition is a detailed consideration of how posthumanism affects the field's understanding of subjectivity It

also tears at the seams of the contingent labor problem As he articulates his own frustrations with the conservatism of composition studies and builds on previous critiques of the discipline Dobrin stages a courageous and inevitably polemical intellectual challenge to the entrenched ideas and assumptions that have defined composition studies **The Mathmos** Mike Hockney,2014-09-12 The universe is nothing like how it appears to us So what s it really like What is it in itself Neither our senses nor any experiments can reveal the ultimate truth of existence Fortunately one thing can reason We inhabit the Mathmos the mathematical cosmos This book reveals the compelling secrets of the hidden reality that we will never once see but we can surely know thanks to mathematics Do we live in a rational universe or a random universe This is the choice between a mathematical universe and a scientific universe The mathematical universe has a rational ultimate answer the scientific universe does not The scientific universe is magicked out of non existence as if out of a magician s top hat Are you a member of the magicians cult of science Nothing is more alchemical than modern science You can generate a cosmos out of randomness in nothingness which is a much greater trick than merely manufacturing gold from lead **The Second**

Coming Cyrene,2014-04-25 The Second Coming takes a fresh look at the Gospel of Matthew through the unconditioned eyes of a truth seeker The book reinterprets the Gospel of Matthew from a non dualistic perspective and brings out spiritual insights totally unexpected The book also brings to the forefront the forgotten character of Joseph as the tekton of the Gospel The distinctive feature of the book is that it redefines abstruse or undefined biblical terms such as the Father the Son the Holy Spirit God heaven hell Serpent Satan sin etc in a new light that makes the interpretation internally consistent and also consistent with the external reality According to the book the message of the Gospel is straightforward The human body is the Savior Therefore turn to the body The book goes beneath the literal content of the Gospel of Matthew to discover its soul

The Great Dismissal Henry Sussman,2022-12-29 Veteran scholar and critic Henry Sussman deploys anecdote reportage and memoir to lament and scrutinize the rise of anti intellectualism in the past few decades How are we to reckon with the decline of impartiality and sharp increase in self interested interference in politic legal and cultural spheres the normalization of pathological narcissism in public life and the blanket dismissal of scientific findings and their counterparts in the humanities and social sciences In retracing his own intellectual and experiential steps Sussman revisits many of his lasting inspirations including Walter Benjamin Jacques Derrida Douglas R Hofstadter Immanuel Kant and J Hillis Miller The result is an intellectual meditation on the great dismissal in public and political life of venerable and vital humanistic traditions ethics and ways of thinking Original Knowing J. creature who senses more to the universe than meets the eye In limestone bluffs and butterfly migrations from Stone Age tool making to Sumerian beer making clues are sought to better understand this strange mind that ponders the origins of its own existence When do babies point and why does it matter What does throwing a Frisbee reveal about our distant ancestors Is language the key to our minds as many believe Or perhaps the heart of knowing rests in something more basic in a smile and the powerful social abilities at work allowing us to sense a depth to life to our own lives a depth that our minds help us glimpse if only through a glass darkly Communication and the Human Condition W. Barnett Pearce, 1989 Starting with the premise that we live in communication rather than standing outside communication and using it for secondary purposes Pearce claims that people who live in various cultures and historical epochs not only communicate differently but experience different ways of being human because they communicate differently This century he notes ushered in the communication revolution the discovery that communication is far more important and central to the human condition than ever before realized Essential to the communication revolution is the recognition that multiple forms of discourse exist in contemporary human society Further these forms of discourse are not benign they comprise alternative ways of being human Thus communication theory must encompass all that it means to live a life the shape of social institutions and cultural traditions the pragmatics of social action and the poetics of social order *Playful Intelligence* Henry Sussman, 2014-10-23 This is a guide in theory and in practice to how current technological changes have impacted our interaction with texts and with each other Henry Sussman rereads pivotal moments in literary philosophical and cultural modernity as anticipating the cybernetic discourse that has increasingly defined theory since the computer revolution Cognitive science psychoanalysis and systems theory are paralleled to current trends in literary and philosophical theory Chapters alternate between theory and readings of literary texts resulting in a broad but rigorously grounded framework for the relation between literature and computer science This book is a refreshing perspective on the analog orientated tradition of theory in the humanities and offers the first literary textual genealogy of the digital **The God Within Me** Michael Faust, 2011-10-23 Psychologist Carl Jung and Nobel Prize winning physicist Wolfgang Pauli collaborated to find a means of bridging the gap between the psychological and scientific worlds between mind and matter They failed but everything they sought has been accomplished by the ancient and controversial secret society known as the Illuminati They have provided a framework for understanding all phenomena of whatever nature either scientific or paranormal Discover their startling theory of everything It explains Rupert Sheldrake's theory of Morphic Resonance homeopathy out of body and near death experiences synchronicity remote viewing hypnosis and many other previously inexplicable phenomena And read about dream gnosis the extraordinary means by which the fortunate few encounter their inner God
