Stanislaw Puppel, 1995-07-27 This volume brings together 15 papers on the evolution and origin of language The authors approach the subject from various angles exploring biological cultural psychological and linguistic factors A wide variety of topics is discussed such as animal communication language acquisition the essentialist evolutionist debate and genetic classification **Why We Talk**

Jean-Louis Dessalles, 2007-01-04 Constant exchange of information is integral to our societies The author explores how this came into being Presenting language evolution as a natural history of conversation he sheds light on the emergence of communication in the hominine congregations as well as on the human nature **The Origins of Complex Language**

Andrew Carstairs-McCarthy, 1999 This book proposes a new theory of the origins of human language ability and presents an original account of the early evolution of language It explains why humans are the only language using animals challenges the assumption that language is a consequence of intelligence and offers a new perspective on human uniqueness Brilliantly executed this book draws on evidence from archaeology linguistics cognitive science and evolutionary biology **The Evolution of Language**

Andrew D. M. Smith, 2010 This volume comprises refereed papers and abstracts of the 8th International Conference on the Evolution of Language EVOLANG8 held in Utrecht on 14-17 April 2010 As the leading international conference in the field the biennial EVOLANG meeting is characterized by an invigorating multidisciplinary approach to the origins and evolution of human language and brings together researchers from many subject areas including anthropology archaeology biology cognitive science computer science genetics linguistics neuroscience palaeontology primatology and psychology The latest theoretical experimental and modelling research on language evolution is presented in this collection including contributions from many leading scientists in the field *The Evolution of Language* W.

Tecumseh Fitch, 2010-04-01 Language more than anything else is what makes us human It appears that no communication system of equivalent power exists elsewhere in the animal kingdom Any normal human child will learn a language based on

rather sparse data in the surrounding world while even the brightest chimpanzee exposed to the same environment will not. Why not? How and why did language evolve in our species and not in others? Since Darwin's theory of evolution questions about the origin of language have generated a rapidly growing scientific literature stretched across a number of disciplines much of it directed at specialist audiences. The diversity of perspectives from linguistics, anthropology, speech science, genetics, neuroscience and evolutionary biology can be bewildering. Tecumseh Fitch cuts through this vast literature bringing together its most important insights to explore one of the biggest unsolved puzzles of human history.

Ideophones and the Evolution of Language John Haiman, 2018-01-11. Ideophones have been recognized in modern linguistics at least since 1935 but they still lie far outside the concerns of mainstream Western linguistic debate in part because they are most richly attested in relatively unstudied, often unwritten languages. The evolution of language on the other hand has recently become a fashionable topic but all speculations so far have been almost totally data free. Without disputing the tenet that there are no primitive languages, this book argues that ideophones may be an atavistic throwback to an earlier stage of communication where sounds and gestures were paired in what can justifiably be called a prelinguistic fashion. The structure of ideophones may also provide answers to deeper questions among them how communicative gestures may themselves have emerged from practical actions. Moreover, their current distribution and behaviour provide hints as to how they may have become conventional words in languages with conventional rules.

The Evolution of Language Thomas C. Scott-Phillips, Monica Tamariz, Erica A. Cartmill, 2012. The Evolang conferences are the leading international conferences for new findings in the study of the origins and evolution of language. They attract a multidisciplinary audience. The proceedings are an important resource for researchers in the field.

Language Evolution Morten H. Christiansen, Simon Kirby, 2003-07-24. What is it that makes us human? This is one of the most challenging and important questions we face. Our species defining characteristic is language; we appear to be unique in the natural world in having such an incredibly open ended system for putting thoughts into words. If we are to truly understand ourselves as a species we must understand the origins of this strange and unique ability. To do so we need to answer some of the most intriguing questions in contemporary scientific research: Where did language come from? How did it evolve? Why are we unique in possessing it? This book for the first time brings together the leading thinkers who are trying to unlock the puzzle of language evolution. Here we see the latest ideas and theories from fields as diverse as anthropology, archaeology, artificial life, biology, cognitive science, linguistics, neuroscience and psychology. In a series of seventeen well written and accessible chapters we get an unrivalled view of the state of the art in this exciting area. Current controversies are revealed and new perspectives uncovered in a clear and readable guide to the latest theories. This collection marks a major step forward in our quest to understand the origins and evolution of human language. In doing so it sheds new light on the process of evolution, the workings of the brain, the structure of language and most importantly what it means to be human. *Language Evolution* is essential reading for researchers and students working in the areas

covered and has been used as a textbook for courses in the field It will also attract the general reader who wants to know more about this fascinating subject
