Barber, Jorge J. E. Gracia, 1994-07-01 Philosophy in the sixteenth through eighteenth centuries has traditionally been characterized as being primarily concerned with epistemological issues This book is not intended to overturn this characterization but rather to balance it through an examination of equally important metaphysical or ontological positions held explicitly or implicitly by philosophers in this period Major philosophers whose views are discussed in this book include Descartes Malebranche Spinoza Locke Berkeley Hume Leibniz Wolff and Kant In addition the contributors of minor Cartesians especially Regis and Desgabets are analyzed in a separate chapter Although the views of early modern philosophers on individuation and identity have been discussed before these discussions have usually been treated as asides in a larger context This book is the first to concentrate on the problems of individuation and identity in early modern philosophy and to trace their philosophical development through the period in a coherent way The Sight Sickness Christine Faltz Grassman, 2009-03-05 It was an epidemic It was a plague that shocked both those who got it and those who did not It was coined the white sickness For inexplicable reasons random citizens became blind and the sickness was believed to be contagious Instead of teaching people to manage their disability the government rounded up the newly blind and caged them like animals The quarantine facilities had no organization no plumbing no electricity and no law and order Both the blind and the seeing were terrified When the crisis subsided the officials in charge were tried for their role in the

inhumane treatment of the citizens they were acquitted One vigilante group is not satisfied with the verdict Calling themselves the Cellmates they kidnap seven people and hold them hostagekeeping them blinded so they can experience the same fears as those who were blinded in the plague A blend of social commentary criticism parody and polemic author Christine Faltz Grassman offers an anti sequel to *Blindness* a psychological thriller written by Jos Saramago *The Sight Sickness* Grassmans personal response to the publics fear of blindness works to show that with the right attitude the right tools and the right techniques blindness is manageable

A Checklist of Kim Stanley Robinson Christopher P. Stephens,1992

More Than Meets the Eye Georgina Kleege,2018 *More Than Meets the Eye* seeks to dismantle traditional understandings of blindness through scrutiny of philosophical speculation scientific case studies literary depictions and museum access programs for the blind It introduces blind and visually impaired artists whose work has shattered stereotypes and opened up new aesthetic possibilities for everyone

Lenses on Blindness Sharon Packer, M.D.,2023-02-24 Blindness or vision loss is a major medical concern that has also drawn the attention of artists writers musicians mythologists filmmakers religions philosophers and others Covering everything from pop culture to high culture this text is an illuminating anthology of essays examining various representations of blindness Comprehensive in scope this collection of essays analyzes depictions and explorations of blindness in many pieces of media Essays explore blindness in horror films science fiction literature high art superhero fiction Jewish and indigenous traditions music and more This book aims to show how a world of darkness can hold so much light

The First Frame Pannill Camp,2014-12-04 In the late eighteenth century a movement to transform France s theatre architecture united the nation Playwrights philosophers and powerful agents including King Louis XV rejected the modified structures that had housed the plays of Racine and Moli re and debated which playhouse form should support the future of French stagecraft In *The First Frame* Pannill Camp argues that these reforms helped to lay down the theoretical and practical foundations of modern theatre space Examining dramatic theory architecture and philosophy Camp explores how architects dramatists and spectators began to see theatre and scientific experimentation as parallel enterprises During this period of modernisation physicists began to cite dramatic theory and adopt theatrical staging techniques while playwrights sought to reveal observable truths of human nature Camp goes on to show that these reforms had consequences for the way we understand both modern theatrical aesthetics and the production of scientific knowledge in the present day
