Saracho,2019-12-13 The importance of the early years in young children s lives and the rigid inequality in literacy achievement are a stimulating backdrop to current research in young children s language and literacy development This book reports new data and empirical analyses that advance the theory of language and literacy with researchers using

different methodologies in conducting their study with both a sound empirical underpinning and a captivating analytical rationalization of the results. The contributors to this volume used several methodological methods e.g. quantitative qualitative to describe the complete concept of the study, the achievement of the study and the study in an appropriate manner based on the study's methodology. The contributions to this volume cover a wide range of topics including dual language learners, Latino immigrant children, children who have hearing disabilities, parents and teachers' beliefs about language development, early literacy skills of toddlers and preschool children, interventions, multimodalities in early literacies, writing and family literacy. The studies were conducted in various early childhood settings such as child care, nursery school, Head Start, kindergarten and primary grades, and the subjects in the studies represent the pluralism of the globe: a pluralism of language backgrounds, ethnicity, abilities and disabilities. This book was originally published as a special issue of *Early Child Development and Care*.
