Straits Of Power:

Straits of Power Joe Buff, 2011-05-17 In his latest mission Commander Jeffrey Fuller will go head to head against his most dangerous adversary yet his own allies Jeffrey Fuller has a new mission use his cutting edge submarine Challenger to recover a German spy claiming to have key information about the Berlin Boer Axis information that could be crucial to winning the war Fuller will have to navigate his super silent sub through some of the most densely patrolled waters in Europe if he hopes to accomplish his mission But Fuller knows he can't trust the spy code named Zeno an expert in electronic and information warfare The man could be a double agent sent by the enemy to compromise Challenger And when they finally recover the mysterious spy he reveals that only by helping him infiltrate Israel can he hope to prevent an imminent Axis attack Fuller is caught in a terrible dilemma if the man is a double agent he could be dooming Israel but if he does nothing the country could fall to the German assault To go ahead with the plan would pitch Fuller against the best defences of his own allies placing his crew in danger and possibly shattering bonds between nations It is a battle that if fought Fuller will have to fight entirely on his own

Maritime Power and the Law of the Sea James Kraska, 2011 In *Maritime Power and the Law of the Sea* Expeditionary Operations in World Politics Commander James Kraska analyzes the evolving rules governing freedom of the seas and their impact on expeditionary operations in the littoral near shore coastal zone Coastal state practice and international law are developing in ways that restrict naval access to the littorals and associated coastal communities and inshore regions that have become the fulcrum of world geopolitics Consequently the ability of naval forces to project expeditionary power throughout semi enclosed seas exclusive economic zones EEZs and along the important sea shore interface is diminishing and as a result limiting strategic access and freedom of action where it is most needed Commander Kraska describes how control of the global commons coupled with new approaches to sea power and expeditionary force projection has given the United States and its allies the ability to assert overwhelming sea power to nearly any area of the globe But as the law of the sea gravitates away from a classic liberal order of the oceans naval forces are finding it more challenging to accomplish the spectrum of maritime missions in the coastal littorals including forward presence power projection deterrence humanitarian assistance and sea control The developing legal order of the oceans
