Stranger Than Science

Martin K. Ettington

Stranger Than Science:

Stranger Than Science Frank Edwards, 1992-05-01 Presents accounts of true and unusual incidents that are unable to be explained by modern science

Stranger Than Science Frank Edwards, 1959 *Stranger Than Science Stories and Facts* Martin K. Ettington, I first read the book *Stranger Than Science* By Frank Edwards when I was about 10 years old and it was an important turning point in my life The book has many stories of strange events and it really built my curiosity about the world Later I went to Engineering School and also had many paranormal experiences from learning meditation and other practices I have now researched and written over 100 books on strange and mysterious phenomena My fascination with strange things has become a major passion in my life This book is kind of an updated version of that famous Frank Edwards book based on my experiences and research of many phenomena I m sure you will find the stories in this book fascinating since they are all samples of much of what I experienced researched and have written about It contains over 32 chapters of my favorite stories on various topics to provide a question mark for your beliefs and assumptions about the world and universe we live in When you finish this volume maybe you will see my point of view which is that as much as we think we know about this world and the universe there are still many mysteries and strange things out there

Stranger Than Science Stories and Facts-Volume Two Martin K Ettington, 2022-03-30 This book is my second on stranger than science stories and facts The idea is from the book *Stranger Than Science* by Frank Edwards that I read when I was a kid It made a great impression on me since it caused me to be curious about all of the unknown facts in the world In this Volume Two I ve gone through my 120 plus books again to find interesting subjects I ve either experienced or researched which were not discussed in the first book My goal is to open the eyes of the reader to facts and stories about the unknown they may not know about Hopefully this will lead you to become more open minded and think seriously about new things which may not have been part of your life before Here you will read stories about the Paranormal Spiritual Enlightenment Legendary animals like Dragons giant snakes living dinosaurs ball lightning alien anti gravity technology improving longevity and much more I promise you will not be bored with the materials we cover here After reading this book I hope you can see that our world is truly mysterious and the more we know the more questions we have and the more there is to know

Accepted Science & Paradigms Which Are Likely Wrong Martin K. Ettington, As an engineer and student of science I try to keep up with publications of the latest discoveries and paradigm shifts in science around the world I believe that there are several big problems with science today First is that much science is biased which might be because some scientists want to keep their point of view prominent and the others because many focuses of science are supported by biased funding This will be discussed in this book The other issue is that many scientists limit their thinking to only support age old paradigms and refuse to accept changes to their theories or throw out evidence because it doesn t conform their current beliefs In this book we will cover many issues such as the belief among many cosmologists that the Big Bang never happened We will also look at

ideas we thought settled but which have lots of contrary evidence and anecdotal counter stories such as time travel and dimensional crossings After you read this book you may question much of what is commonly accepted by scientists in the world today Stranger Than Science Stories and Facts Ettington Martin (author),1901 **The Fortean Influence on Science Fiction** Tanner F. Boyle,2020-12-23 Charles Fort was an American researcher from the early twentieth century who cataloged reports of unexplained phenomena he found in newspapers and science journals A minor bestseller with a cult appeal Fort s work was posthumously republished in the pulp science fiction magazine Astounding Stories in 1934 His idiosyncratic books fascinated scared and entertained readers many of them authors and editors of science fiction Fort s work prophesied the paranormal mainstays of SF literature to come UFOs poltergeists strange disappearances cryptids ancient mysteries unexplained natural phenomena and everything in between Science fiction authors latched on to Fort s topics and hypotheses as perfect fodder for SF stories Writers like Arthur C Clarke Philip K Dick Robert Heinlein H P Lovecraft and others are examined in this exploration of Fortean science fiction a genre that borrows from the reports and ideas of Fort and others who saw the possible science fictional nature of our reality **The Spiritual Enlightenment of an Engineer** Martin K. Ettington, I ve written quite a few books about spirituality and my experiences and beliefs in our abilities to expand our consciousness through spiritual development practices meditation and the paranormal This book includes my experiences with paranormal abilities acquired from the spiritual development process and different enlightenment experiences Having been raised in a technical family and gone to engineering school my perspective is pretty unique since I developed both traditional technical knowledge of the world while I was also going through the spiritual development and enlightenment process There are many engineers and scientists who are also religious but I ve found that technical people who are as deeply into spiritual enlightenment practices and paranormal experiences are pretty rare What I ve found is that this dual background has given me more clarity about the world we live in and better objectivity in many cases regarding strange or unusual phenomena The theme of this book is to review how I went through this dual track system of learning in my life to become both a traditional engineer and to have fairly adept knowledge of spiritual and paranormal experiences

Creating Your Own Reality Martin K. Ettington, There are a lot of books written on the topic of visualization Mine is a little different As an engineer and experiencer of many paranormal events I ve got a different perspective enabled by my research and experience There are many subjects I ve studied that indicate that the mind really can affect our reality In this book I will review why my research and experience says that visualization really works and some lessons on how to do it The Reality we live in is much more malleable than we think and so why not set our goals and purposes to get that reality to work the way we want it Techniques included in this book include various visualization techniques and building your own vision board Strange Tales from National Parks Martin K. Ettington, National Parks here and abroad have an unusual number of strange scary and weird activities going on It may be because these areas cover some of the most hidden and still natural

and undisturbed locations in the world These parks offer undisturbed areas where man does not intrude normally and many activities can be hidden there The stories in this book are mostly by Park Rangers who spent years in the outback of these parks and tell of their unusual and sometimes very scary experiences I ve divided up these stories mainly by types like missing persons Bigfoot sightings Aliens and UFOs and more Some experiences are so weird or unusual they were hard to categorize so they are in the chapter titled Random Stories From my own experiences camping the wilderness I know that you need to be prepared for the unexpected All of these stories were reported as true but who is to say what the real truth is
