Ireland,1984 The Computer's Voice Liz W. Faber,2020-12-22 A deconstruction of gender through the voices of Siri HAL 9000 and other computers that talk Although computer based personal assistants like Siri are increasingly ubiquitous few users stop to ask what it means that some assistants are gendered female others male Why is Star Trek's computer coded as female while HAL 9000 in 2001 A Space Odyssey is heard as male By examining how gender is built into these devices author Liz W Faber explores contentious questions around gender its fundamental constructedness the rigidity of the gender binary and culturally situated attitudes on male and female embodiment Faber begins by considering talking spaceships like those in Star Trek the film Dark Star and the TV series Quark revealing the ideologies that underlie space age progress She then moves on to an intrepid decade by decade investigation of computer voices tracing the evolution from the masculine voices of the 70s and 80s to the feminine ones of the 90s and 00s Faber ends her account in the present with incisive looks at the film Her and Siri herself Going beyond current scholarship on robots and AI to focus on voice interactive computers The Computer's Voice breaks new ground in questions surrounding media technology and gender It makes important contributions to conversations around the gender gap and the increasing acceptance of transgender people *Aviation*

Air Force And North Vietnam 1966-1973 [Illustrated Edition] Dr Wayne Thompson,2014-08-15 Includes 3 maps and 40 photographs No experience etched itself more deeply into Air Force thinking than the air campaigns over North Vietnam Two decades later in the deserts of Southwest Asia American airmen were able to avoid the gradualism that cost so many lives and planes in the jungles of Southeast Asia Readers should come away from this book with a sympathetic understanding of the men who bombed North Vietnam Those airmen handled tough problems in ways that ultimately reshaped the Air Force into the effective instrument on display in the Gulf War This book is a sequel to Jacob Van Staaveren's Gradual Failure The Air War over North Vietnam 1965-1966 which we have also declassified and are publishing Wayne Thompson tells how the Air Force used that failure to build a more capable service a service which got a better opportunity to demonstrate the potential of air power in 1972 Dr Thompson began to learn about his subject when he was an Army draftee assigned to an Air Force intelligence station in Taiwan during the Vietnam War He took time out from writing To Hanoi and Back to serve in the Checkmate group that helped plan the Operation Desert Storm air campaign against Iraq Later he visited Air Force pilots

and commanders in Italy immediately after the Operation Deliberate Force air strikes in Bosnia During Operation Allied Force over Serbia and its Kosovo province he returned to Checkmate Consequently he is keenly aware of how much the Air Force has changed in some respects how little in others Although he pays ample attention to context his book is about the Air Force He has written a well informed account that is both lively and thoughtful Aviation Fire Control Technician 1 & C.
