tradition that over time these musicians transformed into a cultural expression genuinely their own Called Upstairs is the story of this Labrador Inuit music practice It is not principally a story of forced adoption but of adaptation mediation and agency exploring the transformation of a colonial artifact into an expression of Inuit aesthetic preference spirituality and community identity Often overlaying the Moravian traditions with defining characteristics drawn from pre contact expressive culture Inuit musicians imbued this once alien music with their own voices Told through archival documents oral histories of Inuit musicians and the music itself Called Upstairs tracks the emergence of this Labrador Moravian music tradition across two and a half centuries Tom Gordon presents a chronicle of Inuit leadership and agency in the face of colonialism through a unique lens In this time of reconciliation this story offers a window into Inuit resilience and the power of a culture s creative expressions

A Life in Balkan Archaeology John Chapman,2021-10-13 This memoir is not really about research questions or main conclusions It tells the story of a boy growing up in Plymouth Devon getting excited about archaeology after visits to mainland Greece and Crete trying to get into Greek archaeology and relocating northwards into the Balkans where he spent a career in prehistoric research The chapters alternate between museum university experiences and my major research projects The experiences of working in that part of the world as the Third Balkan War was starting were dramatic and a history style chapter is devoted to these beginnings The Balkan prehistoric club in the west is a very small and select group so there is an intrinsic interest about how westerners did their archaeology there and how they interacted with local colleagues There is also a sense of a colonial relationship between westerners knowledgeable about theory and method with well stocked libraries and large research grants and easterners with little of the above On a basic level the memoir presents stories with implications for east west relationships that will soon disappear from living memory The ways that research projects originated and developed are strongly featured and there is a fund of anecdotes about prehistorians living and dead The publication of this memoir records those fragments of the discipline s history that are in danger of being lost forever But my life story is not erased from this account which is not an anthropological work but rather a participant account with a modicum of relevant personal details The book providing the archaeological results is the publication Forging identities in the prehistory of Old Europe Dividuals individuals and

communities 7000 3000 BC a synthesis of academic research in Balkan prehistory This memoir provides the insider story to the research results *The Storytime Sourcebook* Carolyn N. Cullum,1990 Offers suggestions and ideas for telling stories to children in libraries and also suggests sources for stories **Brain-Mind** Paul Thagard,2019-01-31 How do brains make minds Paul Thagard presents a unified brain based theory of cognition and emotion with applications to the most complex kinds of thinking right up to consciousness and creativity Neural mechanisms are used to explain mental operations for analogy action intention language and the self Brain Mind develops a brilliant account of mental operations using promising new ideas from theoretical neuroscience Single neurons cannot do much by themselves but groups of neurons work together to accomplish powerful kinds of mental representation including concepts images and rules Minds enable people to perceive imagine solve problems understand learn speak reason create and be emotional and conscious Competing explanations of how the mind works have identified it as soul computer brain dynamical system or social construction This book explains minds in terms of interacting mechanisms operating at multiple levels including the social mental neural and molecular Unification comes from systematic application of Chris Eliasmith's powerful Semantic Pointer Architecture a highly original synthesis of neural network and symbolic ideas about how the mind works This book belongs to a trio that includes Mind Society From Brains to Social Sciences and Professions and Natural Philosophy From Social Brains to Knowledge Reality Morality and Beauty They can be read independently but together they make up a Treatise on Mind and Society that provides a unified and comprehensive treatment of the cognitive sciences social sciences professions and humanities
