

The Blue Layer

Dean E. Arnold

The Blue Layer:

The Adobe Photoshop Layers Book Richard A. Lynch, 2007 Covering Photoshop CS3 this work shows designers how to create correct and control with layers the most powerful tool in Photoshop and Photoshop Elements Featuring step by step instructions and practical examples this guide includes a CD ROM with a robust library and presets of practice images

Maya Blue Dean E. Arnold, 2024-12-16 One of the great technological achievements of the ancient Maya Maya Blue is one the world s most unusual ancient pigments In Maya Blue Dean E Arnold offers a comprehensive history of its study for almost a century filled with personal anecdotes drawn from his decades of work uncovering the Maya knowledge of its constituents its ancient sources and how it was made including previously unknown methods The book presents a fresh holistic perspective that documents these discoveries and the scientific process that led to them and provides testable hypotheses about how the pigment and the technology used to make it moved throughout Mesoamerica Combining the organic dye indigo and the inorganic clay mineral palygorskite in a highly stable chemical hybrid that unlike indigo resists attacks by acids alkalines and organic solvents and endures without fading Maya Blue has a rich blue color that has survived for centuries in one of the world s harshest climates First used at the site of Calakmul in the tropical forest of southern Mexico during the Late Preclassic period the Maya s abiding hue diffused across Mesoamerica over a period of 1 700 years It appears on Maya pottery sculpture murals and codices and carries multiple meanings standing as a symbol for cultural cornerstones such as sacrifice and the rain god Chaak It was discovered in 1931 at Chich n Itz and its composition was a mystery for more than three decades then questions about its source how and why it achieved such stability and how and why the Maya made the pigment persisted even longer In Maya Blue Arnold summarizes ethnographic archaeological chemical and material science research over the last century from an anthropological perspective This thorough engaging and accessible book chronicles the history of this pigment as no work has done before

Personal Viewpoints J. Paul Getty Museum, Getty Conservation Institute, Getty Research Institute, 2003 In this volume conservators curators and conservation scientists candidly reflect on the challenges and sometimes controversial choices involved in treating works of art

Made in Los Angeles Rachel Rivenc, 2016-04-01 In the 1960s a group of Los Angeles artists fashioned a body of work that has come to be known as the LA Look or West Coast Minimalism Its distinct aesthetic is characterized by clean lines simple shapes and pristine reflective or translucent surfaces and often by the use of bright seductive colors While the role of materials and processes in the advent of these truly indigenous Los Angeles art forms has often been commented on it has never been studied in depth until now Made in Los Angeles focuses on four pioneers of West Coast Minimalism Larry Bell Robert Irwin Craig Kauffman and John McCracken whose working methods often borrowed from other industries featured the use of synthetic paints and resins as well as industrial processes to create objects that are both painting and sculpture Bell for example coated plate glass with films of material that alter the way the light is absorbed reflected and transmitted

while Kauffman employed a process usually reserved for commercial signs for his work McCracken coated plywood with fiberglass then spray painted it with countless layers of automotive paints and Irwin spray painted discs of hammered aluminum or vacuum formed plastics The detailed study of each artist s work is presented in the context of the emergence of modern art in Los Angeles the burgeoning mid twentieth century gallery scene and the light infused LA cityscape Initially undertaken as part of the Pacific Standard Time Art in L A 1945 1980 initiative this volume combines technical art history and scientific analysis to investigate conservation issues associated with the work of these artists which are often emblematic of issues in the conservation of contemporary art in general Introduction to Remote Sensing James B.
