From Part One Our ignorance of the marine world is much greater still It is such that I do not hesitate to claim that in the ocean everything is still possible Faced with the immensity of Neptune s realm a certain degree of gullibility is preferable to blind incredulity If it was claimed tomorrow that a real mermaid had been captured not just an ugly manatee but a creature boasting Marilyn Monroe s bust and the tail of a coelacanth the attitude of the zoologist who wished to see it would be much more scientifically justifiable than that of his colleague who would merely shrug the news away The sea covers more than three fifths of the surface of the globe but our ships cross it only along rather narrow and fixed paths This book looks at the science behind the stories

paralysis How do these animals go about their deadly work How did they develop such intricate potent toxins Wilcox takes us around the world and down to the cellular level to find out Throughout her journey Wilcox meets the intrepid scientists who risk their lives studying these lethal beasts as well as self immunizers who deliberately expose themselves to snakebites Along the way she puts her own life on the line narrowly avoiding being envenomated herself Drawing on her own research Wilcox explains how venom scientists are untangling the mechanisms of some of our most devastating diseases and reports on pharmacologists who are already exploiting venoms to produce lifesaving drugs We discover that venomous creatures are in fact keystone species that play crucial roles in their ecosystems and ours and for this alone they ought to be protected and appreciated Thrilling and surprising at every turn Venomous will change everything you thought you knew about the planet s most dangerous animals Library of Congress Catalogs Library of Congress,1977 **Power Engineering** ,1976
