Stone Age Present William Allman,1995-11-07 Have you ever wondered why men don't ask for directions Why we react with anger to infidelity Why we love music and art Why war and racism still thrive in our most sophisticated cultures In this fascinating synthesis of the disciplines of anthropology psychology linguistics philosophy and biology William Allman shows us how our minds have evolved in response to challenges faced by our prehistoric ancestors and reveals how our brains continue to harbor that legacy in the present day Scientists speculate that many of the problems of modern life from obesity to war arise because our Stone Age mind hasn't caught up with our technologically sophisticated world But Allman also reveals how morality rather than being the result of arbitrary convention is deeply rooted in our need to cooperate which has been essential to the survival of our species through its evolution

The Evolution of Childhood Melvin Konner,2011-11-30 This book is an intellectual tour de force a comprehensive Darwinian interpretation of human development Looking at the entire range of human evolutionary history Melvin Konner tells the compelling and complex story of how cross cultural and universal characteristics of our growth from infancy to adolescence became rooted in genetically inherited characteristics of the human brain All study of our evolution starts with one simple truth human beings take an extraordinarily long time to grow up What does this extended period of dependency have to do with human brain growth and social interactions And why is play a sign of cognitive complexity and a spur for cultural evolution As Konner explores these questions and topics ranging from bipedal walking to incest taboos he firmly lays the foundations of psychology in biology As his book eloquently explains human learning and the greatest human intellectual accomplishments are rooted in our inherited capacity for attachments to each other In our love of those we learn from we find our way as individuals and as a species Never before has this intersection of the biology and psychology of childhood been so brilliantly described Nothing in biology makes sense except in the light of evolution wrote Dobzhansky In this remarkable book Melvin Konner shows that nothing in childhood makes sense except in the light of evolution

Mittleman, 2015-04-27 What Jewish

tradition can teach us about human dignity in a scientific age This book explores one of the great questions of our time How can we preserve our sense of what it means to be a person while at the same time accepting what science tells us to be true namely that human nature is continuous with the rest of nature What in other words does it mean to be a person in a world of things Alan Mittleman shows how the Jewish tradition provides rich ways of understanding human nature and personhood that preserve human dignity and distinction in a world of neuroscience evolutionary biology biotechnology and pervasive scientism These ancient resources can speak to Jewish non Jewish and secular readers alike Science may tell us what we are Mittleman says but it cannot tell us who we are how we should live or why we matter Traditional Jewish thought in open minded dialogue with contemporary scientific perspectives can help us answer these questions Mittleman shows how using sources ranging across the Jewish tradition from the Hebrew Bible and the Talmud to more than a millennium of Jewish philosophy Among the many subjects the book addresses are sexuality birth and death violence and evil moral agency and politics and economics Throughout Mittleman demonstrates how Jewish tradition brings new perspectives to and challenges many current assumptions about these central aspects of human nature A study of human nature in Jewish thought and an original contribution to Jewish philosophy this is a book for anyone interested in what it means to be human in a scientific age **The Politics of Uncertainty** Peter Marris, 2003-09-02 This book argues the case for strategies of co operation at both

specialist student and lay reader alike American Anthropologist A thoughtful elegant and provocative analysis of aesthetic behavior in the development of our species one that acknowledges its roots in the work of prior thinkers while opening new vistas for those yet to come If you re reading just one book on art anthropology this year make it hers Anthropology and Humanism The Evolution of Human Wisdom Celia Deane-Drummond, Agustín Fuentes, 2017-10-18 This volume addresses key questions about the puzzle of human origins by focusing on a topic that is largely unexplored thus far namely the evolution of human wisdom How can we best understand the human capacity for wisdom where did it come from and how did it emerge It explores lines of convergence and divergence between Christian theology and evolutionary anthropology in its search to identify different aspects of wisdom Critical to this discussion are the philosophical difficulties that arise when two very different methodological approaches to the manner of humans becoming wise are brought together The relative importance and significance of human language is another area of intense debate in defining the meaning of wisdom and its expression How far and to what extent does a theologically informed wisdom discourse push evolutionary anthropology to formulate new questions and vice versa This volume shows that there is no simple consonance between evolutionary anthropology and theology Yet each discipline has much to learn from the other the authors are in agreement that even in the midst of an awareness of dissonance and some tension there can still be mutual respect The goal of this book is to begin to develop a trans disciplinary approach to the evolution of human wisdom where each discipline is challenged to ask questions in a new way This volume tackles the relationship between theology and science in a fresh way by focusing on a specific theme wisdom that is equally generative for both theology and evolutionary anthropology When Elephants Weep Jeffrey Moussaieff Masson, 2009-10-21 This national bestseller exploring the complex emotional lives of animals was hailed as a masterpiece by Elizabeth Marshall Thomas and as marvelous by Jane Goodall The popularity of When Elephants Weep has swept the nation as author Jeffrey Masson appeared on Dateline NBC Good Morning America and was profiled in People for his ground breaking and fascinating study Not since Darwin s The Expression of Emotions in Man and Animals has a book so thoroughly and effectively explored the full range of emotions that exist throughout the animal kingdom From dancing squirrels to bashful gorillas to spiteful killer whales Masson and coauthor Susan McCarthy bring forth fascinating anecdotes and illuminating insights that offer powerful proof of the existence of animal emotion Chapters on love joy anger fear shame compassion and loneliness are framed by a provocative re evaluation of how we treat animals from hunting and eating them to scientific experimentation Forming a complete and compelling picture of the inner lives of animals When Elephants Weep assures that we will never look at animals in the same way again **Worldly Wonder** Mary Evelyn Tucker, 2011-04-15 History illustrates the power of religion to bring about change Mary Evelyn Tucker describes how world religions have begun to move from a focus on God human and human human relations to encompass human earth relations She argues that in light of the environmental crisis religion should move from isolated orthodoxy to interrelated dialogue and use its authority for

liberation rather than oppression Culture's Futures Eric Aronoff, 2025-02-24 This book argues that science fiction has been a key participant along with anthropology and literary theory in the interdisciplinary debates over culture and narrative form from the modernist period to the present Both science fiction and the anthropological ethnography in their modernist forms and post modern postcolonial reinventions are intertwined technologies for constructing culture and difference through narrative worldbuilding This book traces the ways SF authors including Ray Bradbury Ursula K Le Guin and Octavia E Butler as well as Indigenous futurists Craig Strete Celu Amberstone Rebecca Roanhorse and Cherie Dimaline have deployed interrogated and revised these models of culture representation and power to imagine new futures Christian Perspectives on Sexuality and Gender Elizabeth Stuart, Adrian Thatcher, 1996 This collection of articles present a variety of broadly Christian responses to issues such as sexuality and gender spirituality gay and lesbian sexuality sexuality and violence sexuality and singleness and the family **The Crisis in Sociology** Joseph Lopreato, Timothy Alan Crippen, 2001-09-01 Crisis in Sociology presents a compelling portrait of sociology s current troubles and proposes a remedy that is likely to inspire controversy In the authors view sociology s crisis has deep roots traceable to the over ambitious sweep of the discipline s founders Lopreato and Crippen argue that the most disabling flaw is the failure to discover even a single general law or principle necessary to systematically organize empirical observations guide inquiry by suggesting falsifiable hypotheses and form the core of a genuinely cumulative body of knowledge Crisis in Sociology invites sociologists to consider that participation in the new social science exemplified by thriving new fields such as evolutionary psychology may help to build a vigorous scientific sociology
