Good Neighbor Empires Elena Jackson Albarrán, 2024-09-16 A class of child artists in Mexico a ship full of child refugees from Spain classrooms of child pageant actors and a pair of boy ambassadors revealed facets of hemispheric politics in the Good Neighbor era Culture makers in the Americas tuned into to children as producers of cultural capital to advance their transnational projects In many instances prevailing conceptions of children as innocent primitive dependent and underdeveloped informed perceptions of Latin America as an infantilized region a lesser Other Americas on the continent In other cases children s interventions in the cultural politics economic projects and diplomatic endeavors of the interwar period revealed that Latin American children saw themselves as modern professional participants in forging inter American relationships Good Neighbor Empires is a skillfully crafted study of children as actors and as symbolic centerpieces in the infantilized image of Latin America Marrying deep research in transnational archives with engaging storytelling Albarrán examines the social meaning of children by crafting a story where they emerge as powerful artists exiles and diplomats in open air art schools dormitories and classrooms By vividly demonstrating how children s experiences and the metaphors surrounding them both reaffirmed and contested diplomacy and hemispheric understandings in the Americas the book asserts the relevance of childhood studies

and transnational history to understandings of Latin American politics and culture Sonia Robles author of Mexican Waves Radio Broadcasting along Mexico's Northern Border 1930-1950 The University of Arizona Press 2023 Elena Albarrán is an internationally renowned authority on the history of childhood in Latin America and especially Mexico Good Neighbor Empires masterfully tells a transnational history of children their cultural production and their public perception in Latin America during the 1930s and 1940s a time in which the United States discarded military intervention and heavy handed diplomacy in favor of an approach focused on the soft power of commerce media and migration At the heyday of U.S. imperialism cartoons had often represented the Latin American republics as children in need of Uncle Sam's guidance and Latin Americans both adults and children remained infantilized in the U.S. imagination throughout the Good Neighbor era Focusing on the agency of children in three contexts from Mexican folklore to Spanish Republican refugees to Pan Americanism as an effort to foster hemispheric solidarity during an era of totalitarian threats the author shows that children and the families they belonged to emerged as part of a new populist rhetoric that reinforced both international capitalist cooperation and patriarchy A cutting edge contribution to the history of the Americas in the twentieth century J. Regan Buchenau Dowd Term Chair of Capitalism Studies UNC Charlotte Albarrán makes significant contributions to the scholarship on both childhood studies and the history of cultural relations in Good Neighbor Empires As well as examining the discourses of childhood that built upon colonial and neocolonial legacies and shaped Pan Americanism Albarrán gives voice to the children who sometimes refashioned these discourses in surprising ways based on their own understandings of childhood Latin America and the United States Grounded in Mexican cultural history but providing insights that demonstrate the usefulness of children as a category of analysis f

that no matter where life's journey takes us the bonds of love and friendship will always lead us home **Rethinking settler colonialism** Annie Coombes, 2017-03-01 Rethinking settler colonialism focuses on the long history of contact between indigenous peoples and the white colonial communities who settled in Australia Aotearoa New Zealand Canada and South Africa It interrogates how histories of colonial settlement have been mythologised narrated and embodied in public culture in the twentieth century through monuments exhibitions and images and charts some of the vociferous challenges to such histories that have emerged over recent years Despite a shared familiarity with cultural and political institutions practices and policies amongst the white settler communities the distinctiveness which marked these constituencies as variously Australian South African Canadian or New Zealander was fundamentally contingent upon their relationship to and with the various indigenous communities they encountered In each of these countries these communities were displaced marginalised and sometimes subjected to attempted genocide through the colonial process Recently these groups have renewed their claims for greater political representation and autonomy The essays and artwork in this book insist that an understanding of the political and cultural institutions and practices which shaped settler colonial societies in the past can provide important insights into how this legacy of unequal rights can be contested in the present It will be of interest to those studying the effects of colonial powers on indigenous populations and the legacies of imperial rule in postcolonial societies
