**The Art of Childhood and Adolescence** John Matthews, 2003-09-02 The Art of Childhood and Adolescence is composed of completely new research on the development of representational thinking from infancy through to adolescence. It makes an important contribution to the theory of children's development and to practitioners' understanding as well as suggesting new paths of inquiry. The book draws on highly detailed longitudinal studies conducted over 24 years: 20 in London and 4 in Singapore. Line drawings and photographs are used to illustrate important concepts. Matthews, highly respected internationally, also sheds light on current debates such as the opposition of culturally specific and universal development in children the world over.

**Trauma-Attachment Tangle** Joan Lovett, 2014-12-05 Trauma Attachment Tangle offers informative and inspiring clinical stories of children who have complex trauma and attachment issues from experiences such as adoption, hospitalization, or death of a parent. Some of these children display puzzling or extreme symptoms like prolonged tantrums, self-hatred, attacking their parents, or being fearful of common things like lights, solid foods, or clothing. Dr. Lovett presents strategies for unraveling the traumatic origins of children's symptoms and gives a variety of tools for treating complex trauma and for promoting attunement and attachment.
