Tanzania Party Transformation And Economic Development:

Tanzania Henry Bienen,1970 **Tanzania** H. Bienen,1970 Tanu before independence a political history Organization recruitment and ideology Tanu and the economy of Tanganyika Conditions apparatus and goals Crises and conclusions

Turbulence and Order in Economic Development Hazel Gray,2018-02-08 The terms of debate on the role of institutions in economic development are changing Stable market institutions in particular secure private property rights and democratically accountable governments that uphold the rule of law are widely seen to be a pre requisite for economic transformation in low income countries yet over the last thirty years economic growth and structural transformation has surged forward in a range of countries where market and state institutions have differed these ideals as well as from each other Turbulence and Order in Economic Development studies the role of the state in two such countries examining the interplay between market liberalization institutions and the distribution of power in Tanzania and Vietnam Tanzania and Vietnam were two of the poorest countries in the world in the early 1980s but over the last thirty years both have experienced significant changes in the pace and character of economic development While both countries experienced faster rates of GDP growth their paths of economic transformation were very different as Vietnam experienced rapid poverty reduction associated with the expansion of manufacturing while Tanzania s path of industrialization was characterized by the rise of mining and a much slower pace of poverty reduction Employing a political settlements approach this book considers the comparative role of the state in driving economic transformation In both countries the experiences of socialism continued to shape the role of the state in the economy even after extensive market liberalization however the distribution of political and economic power was very different This had important consequences for the overlapping role of the state in generating political order and in driving economic transformation Turbulence and Order in Economic Development studies the formal and informal ways that the state influenced economic transformation through its role in public financial management land and industrial policy Tanzania Henry S. Bienen,2015-03-08 In this 1970 expanded edition which includes a new Preface and Introduction and a long new chapter Professor Bienen discusses the events and significance of the Arusha Declaration in the light of his continued research since 1967 while a Visiting Lecturer at University College Nairobi Originally published in 1967 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 Toxic Aid Sebastian Edwards,2014-04-24 For many years Tanzania was the darling of international aid agencies During the 1970s it received more assistance per capita than any other nation in the world And yet the economy performed dismally growth was negative exports collapsed and poverty increased massively In

the mid 1980s however the international community changed tacks and developed an approach based on conditionality and program ownership Since 1996 the country has grown steadily and social conditions have improved significantly This book provides an economic history of Tanzania since independence in 1961 It covers the policies of African Socialism and the Arusha Declaration the collapse of the early 1980s the rocky relationships with the IMF and the reforms of the 1990s and 2000s

Developmental State and the Dalit Question in Madhya Pradesh: Congress Response Sudha Pai,2013-05-13 Dalit assertion has been a central feature of the states in the Hindi heartland since the mid 1980s leading to the rise of political consciousness and identity based lower caste parties The present study focuses on the different political response of the Congress party to identity assertion in Madhya Pradesh under the leadership of Digvijay Singh In Uttar Pradesh and Bihar in response to the strong wave of Dalit assertion that swept the region parties such as the Bahujan Samaj Party BSP and the Rashtriya Janata Dal RJD used strategies of political mobilisation to consolidate Dalit backward votes and capture state power In Madhya Pradesh in contrast the Congress party and Digvijay Singh at the historic Bhopal Conference held in January 2002 adopted a new model of development that attempted to mobilise Dalits and tribals and raise their standard of living by providing them economic empowerment This new Dalit Agenda constitutes an alternative strategy at gaining Dalit tribal support through of state sponsored economic upliftment as opposed to the political mobilisation strategy employed by the BSP in Uttar Pradesh The present study puts to test the limits of the model of state led development of the use of political power by an enlightened political elite to introduce change from above to address the weaker sections of society The working of the state is thus analysed in the context of the society in which it is embedded and the former s ability to insulate itself from powerful vested interests In interrogating this state led redistributive paradigm the study has generated empirical data based on extensive fieldwork and brought to the fore both the potentials and the limitations of using the model of development from above in a democracy It suggests that the absence of an upsurge from below limits the ability of an enlightened political elite that mans the developmental state to introduce social change and help the weaker sections of society

Political Order and Political Decay Francis Fukuyama,2014-09-30 The second volume of the bestselling landmark work on the history of the modern state

Writing in The Wall Street Journal David Gress called Francis Fukuyama's *Origins of Political Order* magisterial in its learning and admirably immodest in its ambition In The New York Times Book Review Michael Lind described the book as a major achievement by one of the leading public intellectuals of our time And in The Washington Post Gerard DeGroot exclaimed this is a book that will be remembered Bring on volume two Volume two is finally here completing the most important work of political thought in at least a generation Taking up the essential question of how societies develop strong impersonal and accountable political institutions Fukuyama follows the story from the French Revolution to the so called Arab Spring and the deep dysfunctions of contemporary American politics He examines the effects of corruption on governance and why some societies have been successful at rooting it out He explores the different legacies of colonialism in Latin America Africa and Asia and offers a clear eyed account of why some regions have thrived and developed more quickly than others And he boldly reckons with the future of democracy in the face of a rising global middle class and entrenched political paralysis in the West A sweeping masterful account of the struggle to create a well functioning modern state *Political Order and Political Decay* is destined to be a classic

Scarcity, Choice and Public Policy in Middle Africa Donald Rothchild, Robert L. Curry Jr., 2023-11-15 New challenges and opportunities have come to the fore as the middle African States have consolidated their independence In grappling with economic scarcity and restricted choice decision makers must transform domestic institutions and practices and reformulate their relationship to the global economy The authors of this book believe that their efforts can be advanced by resorting to a problem solving focus Such an approach will in their opinion allow social scientists to remain true to their professional disciplines while permitting them to embrace African designated objectives By inquiring into decision processes and results policy analysis seeks to identify optimal courses of action in the context of prevailing societal demands and constraints In general African decision makers have adopted three choice strategies with an eye to reducing scarcity and expanding alternatives accommodation reorganization and transformation When these choice strategies are related to system goals striking variations in preferences and priorities emerge the most significant of which concern decision on mobilizing and distributing resources and achieving freedom from external control In various trade off situations involving negotiations by producer cartels bargaining between multinational companies and African host countries and external economic assistance diverse policy patterns among the groups in relating to the benefits and costs of particular lines of action appear Each choice strategy has its own benefit cost combination Since no approach may be equally valid cross nationally the decision elites of each country are left with the responsibility for determining their own goals and priorities New challenges and opportunities have come to the fore as the middle African States have consolidated their independence In grappling with economic scarcity and restricted choice decision makers must transform domestic institutions and practices and ref

Mukandala,1999-06-03 In contrast to the bulk of the literature on foreign aid which deals with it as an instrument of foreign policy or focuses on problems of implementation this book examines the role of the aid agencies themselves from a recipient s perspective and provides longitudinal as well as comparative analysis The principal aid agencies of China Sweden and the United States began their operations in Tanzania simultaneously in the early 1960s but from very different ideological premises Nonetheless they all fell into operational traps that have limited the effectiveness of their contributions to Tanzanian development The editors draw lessons about how foreign aid if it is going to continue needs to be reformed at the agency level *Changing the Rules* Aili Mari Tripp,2021-01-08 This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1997 **Language Use and**

Politics in Comparative Perspective Goran Hyden, 2005-12-05 This 2006 book reviews fifty years of research on politics in Africa It synthesizes insights from different scholarly approaches and offers an interpretation of the knowledge accumulated over the years It discusses how research on African politics relates to the study of politics in other regions It focuses on such key issues as the legacy of a movement approach to political change the nature of the state the economy of a location the policy deficit the agrarian question gender and politics and ethnicity and conflict It ends by reviewing what scholars agree upon and what the accumulated knowledge offers as insights for more effective political and policy reforms This book is for undergraduate and graduate courses in African and Comparative Politics as well as development oriented courses in Political Science and related disciplines It is also of great relevance to governance and development analysts and practitioners in international organizations **Multi-Ethnic Coalitions in Africa** Leonardo R. Arriola, 2012-10-15 Why are politicians able to

form electoral coalitions that bridge ethnic divisions in some countries and not others This book answers this question by presenting a theory of pecuniary coalition building in multi ethnic countries governed through patronage Focusing on sub Saharan Africa the book explains how the relative autonomy of business from state controlled capital affects political bargaining among opposition politicians in particular While incumbents form coalitions by using state resources to secure cross ethnic endorsements opposition politicians must rely on the private resources of business to do the same This book combines cross national analyses of African countries with in depth case studies of Cameroon and Kenya to show that incumbents actively manipulate financial controls to prevent business from supporting their opposition It demonstrates that opposition politicians are more likely to coalesce across ethnic cleavages once incumbents have lost their ability to blackmail the business sector through financial reprisals
