## Tao Of Objects:

**The Tao of Objects** Gary Entsminger, 1995 Introduces the concept of object oriented programming provides examples in C Delphi Visual Basic and dBASE for Windows and looks at current applications *Object Technologies for Advanced Software* Shojiro Nishio, 1993-10-07 This volume constitutes the proceedings of the First International Symposium organized by the Japan Society for Software Science and Technology The symposium was held in Kanazawa Japan November 4 6 1993 and attracted many researchers from academia and industry as well as ambitious practitioners Object technologies in particular object oriented programming object oriented databases and software object bases currently attract much attention and hold a great promise of future research and development in diverse areas of advanced software The volume contains besides 6 invited presentations by renowned researchers and 25 contributed papers carefully selected by an international program committee from a total of 92 submissions *Pattern-Oriented Software Architecture, Patterns for Concurrent and Networked Objects* Douglas C. Schmidt, Michael Stal, Hans Rohnert, Frank Buschmann, 2013-04-22 Designing application and middleware software to run in concurrent and networked environments is a significant challenge to software developers The patterns catalogued in this second volume of Pattern Oriented Software Architectures POSA form the basis of a pattern language that addresses issues associated with concurrency and networking The book presents 17 interrelated patterns ranging from idioms through architectural designs They cover core elements of building concurrent and network systems service access and configuration event handling synchronization and concurrency All patterns present extensive examples and known uses in multiple programming languages including C C and Java The book can be used to tackle specific software development problems or read from cover to cover to provide a fundamental understanding of the best practices for constructing concurrent and networked applications and middleware About the Authors This book has been written by the award winning team responsible for the first POSA volume A System of Patterns joined in this volume by Douglas C Schmidt from University of California Irvine UCI USA Visit our Web Page [The Case for Repatriating China's Cultural Objects](#) Zuozhen Liu, 2016-02-25 This book investigates China's demands for the repatriation of Chinese cultural relics lost during the country's modern history It addresses two main research questions Can the original owners or their rightful successors of cultural objects looted stolen or illicitly exported before the adoption of the 1954 Hague Convention and the 1970 UNESCO Convention reclaim their cultural objects pursuant to remedies provided by international or national law And what are the philosophical ethical and cultural considerations of identity underlying the international conventions protecting cultural objects and claims made for repatriating them The first part of the book explores current positive legal regimes while the second part focuses on the philosophical ethical and cultural considerations regarding repatriation of cultural objects Consisting of seven chapters and an introduction it outlines the loss of Chinese cultural relics in modern history and the normative framework for the protection of cultural heritage It presents case studies designed to assess the possibility of

seeking legal remedies for restitution under contemporary legal regimes and examines the cultural and ethical issues underpinning the international conventions protecting cultural heritage and claims for the repatriation of cultural heritage It also discusses issues of cultural identity the right to cultural identity and heritage multiculturalism the politics of recognition cosmopolitanism the right to cultural heritage and other related issues The concluding chapter answers the two research questions and offers suggestions for future research

*The Ultimate Lost and Philosophy* Sharon Kaye, 2010-10-26 Health Economics and Financing What are the metaphysics of time travel How can Hurley exist in two places at the same time What does it mean for something to be possibly true in the flash sideways universe Does Jack have a moral obligation to his father What is the Tao of John Locke Dude So there s like this island And a bunch of us were on Oceanic flight 815 and we crashed on it I kinda thought it was my fault because of those numbers I thought they were bad luck We ve seen the craziest things here like a polar bear and a Smoke Monster and we traveled through time back to the 1970s And we met the Dharma dudes Arzt even blew himself up For a long time I thought I was crazy But now I think it might have been destiny The island s made me question a lot of things Like why is it that Locke and Desmond have the same names as real philosophers Why do so many of us have trouble with our dads Did Jack have a choice in becoming our leader And what s up with Vincent I mean he s gotta be more than just a dog right I dunno We ve all felt pretty lost I just hope we can trust Jacob otherwise whoa With its sixth season series finale *Lost* did more than end its run as one of the most talked about TV programs of all time it left in its wake a complex labyrinth of philosophical questions and issues to be explored Revenge redemption love loss identity morality all of *Lost* s key themes are examined in this fully updated guide which reveals the deeper meaning behind every twist and turn in this historic one of a kind show

### **Evaluation and Comparison of CORBA (Object Request Broker) Implementations**

Roland Gelbmann, 2002-07-11 Inhaltsangabe Abstract Common Object Request Broker Architecture CORBA a standard from the Object Management Group OMG defines a vendor independent architecture and infrastructure for distributed systems Further CORBA species a client server platform as well as an object oriented programming model for distributed computing The Object Request Broker ORB implements the part of CORBA which manages communication and data exchange between objects CORBA based applications often have to communicate with ORBs from different vendors Therefore testing the interoperability is one important point in this work Six actually available ORB implementations are shown and compared at given features If a problem has to be solved with CORBA it is necessary to choose the best ORB implementation for that purpose because they differ often at significant points Important details for decision are Standard Conformity Robustness Functionality as well as Functional Range or Interoperability Exactly these properties are to be examined in this work The investigation is performed on six at the web available ORBs indeed Jacorb 1 4 beta 2 Orbacus 4 1 0 Orbix E2A 2 0 OpenORB 1 2 0 J2SE ORB 1 4 0 as well as TAO 1 2 1 all in their most actual released version Additionally to these properties the correct implementation of the most important CORBA Services is checked They are Event Service Notification Service Name

Service and Transaction Service The ORBs are compared at this given properties It shows that the ORBs differ very much from each other and that the CORBA Services are often implemented incorrectly Further a high costly implementation is no guarantee for best quality at all points The evaluation shows that a freely available ORB can be as good as or better than a commercial one

Sharf,2005-11-30 The issue of sinification the manner and extent to which Buddhism and Chinese culture were transformed through their mutual encounter and dialogue has dominated the study of Chinese Buddhism for much of the past century Robert Sharf opens this important and far reaching book by raising a host of historical and hermeneutical problems with the encounter paradigm and the master narrative on which it is based *Coming to Terms with Chinese Buddhism* is among other things an extended reflection on the theoretical foundations and conceptual categories that undergird the study of medieval Chinese Buddhism Sharf draws his argument in part from a meticulous historical philological and philosophical analysis of the *Treasure Store Treatise* Pao tsang lun an eighth century Buddho Taoist work apocryphally attributed to the fifth century master Seng chao 374 414 In the process of coming to terms with this recondite text Sharf ventures into all manner of subjects bearing on our understanding of medieval Chinese Buddhism from the evolution of T ang gentry Taoism to the pivotal role of image veneration and the problematic status of Chinese Tantra The volume includes a complete annotated translation of the *Treasure Store Treatise* accompanied by the detailed exegesis of dozens of key terms and concepts

*Transactions on Large-Scale Data- and Knowledge-Centered Systems VI* Abdelkader Hameurlain,Josef Küng,Roland Wagner,Stephen W. Liddle,Klaus-Dieter Schewe,Xiaofang Zhou,2012-09-22 The LNCS journal *Transactions on Large Scale Data and Knowledge Centered Systems* focuses on data management knowledge discovery and knowledge processing which are core and hot topics in computer science Since the 1990s the Internet has become the main driving force behind application development in all domains An increase in the demand for resource sharing across different sites connected

through networks has led to an evolution of data and knowledge management systems from centralized systems to decentralized systems enabling large scale distributed applications providing high scalability Current decentralized systems still focus on data and knowledge as their main resource Feasibility of these systems relies basically on P2P peer to peer techniques and the support of agent systems with scaling and decentralized control Synergy between grids P2P systems and agent technologies is the key to data and knowledge centered systems in large scale environments This the sixth issue of Transactions on Large Scale Data and Knowledge Centered Systems contains eight extended and revised versions of papers selected from those presented at DEXA 2011 Topics covered include skyline queries probabilistic logics and reasoning theory of conceptual modeling prediction in networks of moving objects validation of XML integrity constraints management of loosely structured multi dimensional data data discovery in the presence of annotations and quality ranking for Web articles

Multimedia Software Engineering Shi-Kuo Chang, 2012-12-06 Multimedia has two fundamental characteristics that can be expressed by the following formula Multimedia Multiple Media Hypermedia How can software engineering take advantage of these two characteristics Will these two characteristics pose problems in multimedia systems design These are some of the issues to be explored in this book The first two chapters will be of interest to managers software engineers programmers and people interested in gaining an overall understanding of multimedia software engineering The next six chapters present multimedia software engineering according to the conceptual framework introduced in Chapter One This is of particular use to practitioners system developers multimedia application designers programmers and people interested in prototyping multimedia applications The next three chapters are more research oriented and are mainly intended for researchers working on the specification modeling and analysis of distributed multimedia systems but will also be relevant to scientists researchers and software engineers interested in the systems and theoretical aspects of multimedia software engineering Multimedia Software Engineering can be used as a textbook in a graduate course on multimedia software engineering or in an undergraduate course on software design where the emphasis is on multimedia applications It is especially suitable for a project oriented course

**Mixed Motives** Marc Levine, 2025-04-01 This book combines foundational constructions in the theory of motives and results relating motivic cohomology to more explicit constructions Prerequisite for understanding the work is a basic background in algebraic geometry The author constructs and describes a triangulated category of mixed motives over an arbitrary base scheme Most of the classical constructions of cohomology are described in the motivic setting including Chern classes from higher K theory push forward for proper maps Riemann Roch duality as well as an associated motivic homology Borel Moore homology and cohomology with compact supports

**Internet-based Intelligent Information Processing Systems** Robert J. Howlett, 2003 The Internet WWW has made it possible to easily access quantities of information never available before However both the amount of information and the variation in quality pose obstacles to the efficient use of the medium Artificial intelligence techniques can be useful tools in

this context Intelligenet systems can be applied to searching the Internet and data mining interpreting Internet derived material the human Web interface remote condition monitoring and many other areas This volume presents the latest research on the interaction between intelligent systems neural networks adaptive and connectionist paradigms fuzzy and rule based systems intelligent agents and the Internet WWW It surveys both the employment of intelligent systems to facilitate and enhance the use of the Internet and applications where the Internet is a channel through which intelligent techniques are applied Contents Search and Resource Discovery Techniques Adaptive Content Mapping for Internet Navigation Flexible Queries to XML Information Agent Based Hypermedia Models Self Organizaing Neural Networks Application for Information Organization Emotion Orientated Intelligent Systems Public Opinion Channel A New Era of Intelligent E Commerce Automated Internet Trading Based on Optimized Physics Models of Markets Readership Engineers researchers students and technical managers interested in Internet based intelligent systems      **Spatial Data Management** Nikos Mamoulis,2012

Spatial database management deals with the storage indexing and querying of data with spatial features such as location and geometric extent Many applications require the efficient management of spatial data including Geographic Information Systems Computer Aided Design and Location Based Services The goal of this book is to provide the reader with an overview of spatial data management technology with an emphasis on indexing and search techniques It first introduces spatial data models and queries and discusses the main issues of extending a database system to support spatial data It presents indexing approaches for spatial data with a focus on the R tree Query evaluation and optimization techniques for the most popular spatial query types selections nearest neighbor search and spatial joins are portrayed for data in Euclidean spaces and spatial networks The book concludes by demonstrating the ample application of spatial data management technology on a wide range of related application domains management of spatio temporal data and high dimensional feature vectors multi criteria ranking data mining and OLAP privacy preserving data publishing and spatial keyword search Table of Contents Introduction Spatial Data Indexing Spatial Query Evaluation Spatial Networks Applications of Spatial Data Management Technology      Advances in Bioprocessing Engineering Xiusheng H. Yang,Juming Tang,2002 This book consists of peer reviewed articles reporting on the latest developments in several food engineering and agricultural processing laboratories at US land granted universities The contributors are leading experts in their respective fields The topics covered in the book include new food processing technologies such as high voltage electric field processing and microwave sterilization pasteurization conversion of agricultural by products into high quality refined cellulose or biodegradable plastics and advances in machine vision inspection and sorting techniques for fruit and vegetable packaging lines Each chapter begins with a general background review with important references and ends with the latest results from each research laboratory

Advances in Computers ,2016-07-04 Advances in Computers an ongoing series since 1960 presents detailed coverage of innovations in computer hardware software theory design and applications It has also provided contributors with a medium

in which they can explore their subjects in greater depth and breadth than journal articles usually allow As a result many articles have become standard references and continue to be of significant lasting value in this rapidly expanding field Presents detailed coverage of recent innovations in computer hardware software theory design and applications Includes in depth surveys and tutorials on new computer technology that pertain to computing with topics such as combinatorial testing constraint based testing and black box testing Written by well known authors and researchers in the field Includes extensive bibliographies with most chapters Presents volumes devoted to single themes or subfields of computer science

**Handbook of Research on Mobile Multimedia** Khalil, Ismail, 2006-05-31 This handbook provides insight into the field of mobile multimedia and associated applications and services Provided by publisher **Distributed Information Resources** , 1999-07-26 Since its first volume in 1960 Advances in Computers has presented detailed coverage of innovations in hardware and software and in computer theory design and applications It has also provided contributors with a medium in which they can examine their subjects in greater depth and breadth than that allowed by standard journal articles As a result many articles have become standard references that continue to be of significant lasting value despite the rapid growth taking place in the field **Proceedings 2003 VLDB Conference** VLDB, 2003-12-02 Proceedings of the 29th Annual International Conference on Very Large Data Bases held in Berlin Germany on September 9 12 2003 Organized by the VLDB Endowment VLDB is the premier international conference on database technology **From Object to Concept** Stacey Pierson, 2013-01-01 Ming porcelain is widely regarded among the world s finest cultural treasures From ordinary household items patiently refined for imperial use porcelain became a dynamic force in domestic consumption in China and a valuable commodity in export trade In the modern era it has reached unprecedented heights in art auctions and other avenues of global commerce This book examines the impact of consumption on the evolution of porcelain and its transformation into a foreign cultural icon The book begins with an examination of ways in which porcelain was appreciated in Ming China followed by a discussion of encounters with Ming porcelain in several global regions including Europe and the Americas The book also looks at the invention of the phrase and concept of the Ming vase in English speaking cultures and concludes with a history of the transformation of Ming porcelain into works of art
