Tarantulas Today:

Tarantulas (Advanced Vivarium Systems) Jerry G. Walls, 2016-11-22 Very few spiders generate the same emotional reaction as the large hairy tarantula. Despite their stereotypical portrayal in movies, these easy-to-care-for spiders make excellent low-maintenance pets. Designed for the beginning tarantula owner, this comprehensive manual includes essential advice on selecting, feeding, and caring for your pet, as well as tips on breeding and health maintenance. A special chapter offers up-to-date information on some of the most popular and readily available species, such as the Costa Rican striped knee and common pink toe tarantulas. This all-new addition to the renowned Herpetocultural Library puts expert-written advice at the fingertips of reptile and invertebrate enthusiasts.

New World Tarantulas Fernando Pérez-Miles, 2020-12-15 The Theraphosidae are the most famous and diverse mygalomorph spiders and include some of the largest arachnids on earth. Their unique defense mechanisms, predatory tactics, reproductive strategies, and ecological adaptations are displayed by a wide range of terrestrial, burrowing, and arboreal species. These arachnids are familiar to the general public thanks to horror movies and a growing interest in tarantulas as pets; however, scientific information on the group is scattered throughout the literature and not easily available. This book reviews all major aspects of New World Theraphosid tarantulas and provides in-depth information on their evolution, taxonomy, behavior, physiology, ecology, reproduction, conservation, and biogeography. As a comprehensive guide to the biology of tarantulas, it will appeal to researchers, students, and terrarium hobbyists alike.

The Tarantula Keeper's Guide Stanley A. Schultz, Marguerite J. Schultz, 2009-01-01 Terrarium hobbyists and arachnid lovers will rejoice at this comprehensive guide on tarantulas. Tarantulas are small and easy to maintain, exotic pets that are fun and captivating to watch. The Tarantula Keeper's Guide includes detailed information on the natural history and biology of these fascinating creatures. This spider book is filled with color photos, scientifically accurate line art, and detailed care instructions. It's no wonder that The Tarantula Keeper's Guide is considered the Bible of Arachnoculture by hobbyists and arachnid enthusiasts.

Matthews, 2007 1950s Cold War era monsters meet 21st century terrorists. Matthews provides a thoughtful interpretation of sci-fi movies that examines the similarities and differences between the political environment and popular culture of two eras. This well-researched examination and appreciation of science fiction films includes behind-the-scenes tales about their production and many quotes from those who produced and starred in the films. The book will tantalize not only fans of the science fiction genre but also sociologists, film historians, and politicians. The author draws parallels between the Cold War fears of the 1950s and 60s and the constant terrorism alerts of the September 11th era, exploring how the politics and the psychological climate of the times influences and is reflected in this vehicle of popular culture. This book is the first of its kind studying the pop culture genre in the wake of the September 11th tragedy. The alien invaders of the 1950s signified a Russian invasion of America, while other films of the genre such as *Invaders from Mars* depicted aliens utilizing mind control to manipulate humans to commit acts of sabotage, signifying Communist enslavement. If such a film were made now, such invaders could be seen as terrorist masterminds using human slaves to commit terrorist acts. Then the 1954 atomic mutation classic is the spiritual ancestor of the 2002 film *Eight Legged Freaks*. Finally, several 1950s films depicted the end of the world at a time when Americans expected a nuclear war with Russia. *Godzilla*, the only 1950s era monster to remain a movie star beyond that era, can be fashioned to reflect whatever issues dominate the times: nuclear war.

in the 1950s environmental pollution in the 1970s Conceivably a Godzilla for the age of terrorism is soon to be released The immediate pre September 11th era witnessed films presenting galactic threats to mankind's existence Independence Day Armageddon Deep Impact while the early 2000s witnessed the popularity of the Left Behind Christian films dramatizing the Tribulation period in the Book of Revelation It seems that whatever the era and whatever the challenges and crises confronting America many entertainment themes remain the same reflecting their respective times and the relevant issues

Melvin E Matthews Jr is a freelance writer and a horror movie aficionado who has been studying the genre for thirty years In this work he shares his personal correspondence with film and television star Beverly Garland and brings together a wealth of detail about the fun and the challenges of the costumes stunts and special effects as well as the actors and producers thoughts on the meaning behind the stories

The Tarantula Scientist Sy Montgomery, 2007-10-01 A School Library Journal Best Book of the Year A fascinating photo filled book on these amazing arachnids Booklist Yellow blood Skeletons on the outside These attributes don't belong to comic book characters or alien life forms but to Earth's biggest and hairiest spiders tarantulas In this book you are invited to follow Sam Marshall spider scientist extraordinaire he's never been bitten as he explores the dense rain forest of French Guiana knocking on the doors of tarantula burrows trying to get a closer look at these incredible creatures You'll also visit the largest comparative spider laboratory in America where close to five hundred live tarantulas sit in towers of stacked shoeboxes and plastic containers waiting for their turn to dazzle and astound the scientists who study them Superb color photos abound in this spectacular series addition This is a vivid look at an enthusiastic scientist energetically and happily at work A treat even for arachnophobes School Library Journal starred review A Sibert Honor Book An ALA Notable Book A John Burroughs Nature Book for Young Readers A Kirkus Reviews Editors Choice

This Is the Way the World Ends James Morrow, 2013-08-20 Nebula Award Finalist A fantastical and darkly comic tale of nuclear apocalypse that begins where Dr Strangelove ends The Philadelphia Inquirer George Paxton is a simple man happy enough with his job carving inscriptions on gravestones All he needs is a high tech survival garment a scopa suit to protect his beloved daughter in the event of nuclear Armageddon But when George finally acquires the coveted suit the deal comes with a catch He must sign a sales contract admitting to his complicity in the nuclear arms race between the US and the Soviets Inevitably the bombs fall and our hero finds himself imprisoned on a submarine headed for Antarctica where he and five other survivors will stand trial for crimes against humanity George Paxton's accusers are no ordinary plaintiffs They are the unadmitted potential people whose hypothetical lives were canceled in consequence of humankind's self extinction In the months that follow George's dark journey will take him through the hellscape that was once the Earth through a human past that has become as unthinkable as the human future to his day in court before the South Pole tribunal and finally into the intolerable heart of loss From the World Fantasy Award winning author of Only Begotten Daughter and Towing Jehovah this is an astute highly engaging and moving journey into a bizarre postapocalyptic world Los Angeles Times
